The Challenge of Democracy Hugh Cunningham, 2014-10-29 This authoritative and thought-provoking history takes a fresh view of what was a period of unprecedented and rapid change. Assuming no prior knowledge of the subject, Hugh Cunningham provides a clear narrative of political events, and an analysis of change and continuity in ideas and in economic and social structure. Britain is set firmly in the context of world power and the possession of empire. An overarching theme is the challenge presented by democracy in a period framed by the First and Fourth Reform Acts. 'Democracy' had no stable meaning, and its opponents were just as vocal as its advocates. The book explores its implications for the role of the state, for the governance of empire, and for the relationship between the different nations within the United Kingdom.

Teaching Primary Science Constructively Keith Skamp, Christine Preston, 2017-09-05 Teaching Primary Science Constructively helps readers to create effective science learning experiences for primary students by using a constructivist approach to learning. This best-selling text explains the principles of constructivism and their implications for learning and teaching, and discusses core strategies for developing science understanding and science inquiry processes and skills. Chapters also provide research-based ideas for implementing a constructivist approach within a number of content strands. Throughout there are strong links to the key ideas, themes and terminology of the revised Australian Curriculum: Science. This sixth edition includes a new introductory chapter addressing readers' preconceptions and concerns about teaching primary science.

Visualization: Theory and Practice in Science Education John K. Gilbert, Miriam Reiner, Mary Nakhleh, 2007-12-05 External representations (pictures, diagrams, graphs, concrete models) have always been valuable tools for the science teacher. This book brings together the insights of practicing scientists, science education researchers, computer specialists, and cognitive scientists, to produce a coherent overview. It links presentations about cognitive theory, its implications for science curriculum design, and for learning and teaching in classrooms and laboratories.
