Inside Teacher Education: Challenging Prior Views of Teaching and Learning S.M. Bullock, 2011-07-23 Learning to teach is complex. Teacher candidates begin a preservice program with powerful tacit assumptions about how teachers teach based on lengthy apprenticeships of observation over many years as students. Virtually all teacher education programs provide a mixture of coursework and classroom experience. Much has been written about the theory-into-practice approach in teacher education, an approach that assumes teacher candidates who have been provided with instructions about how to teach will be able to recall and apply them in a school setting. In reality, teacher candidates report considerable difficulty enacting theory in practice, to the point that many question the value of coursework. This book takes an in-depth look at five future teachers in one teacher education program, analyzing and interpreting how they and their teacher educators learn from experience during both coursework and practicum experiences. Many assumptions about the complex challenges of teaching teachers are called into question. Is the role of a teacher educator to synthesize research-based best practices for candidates to take to their field placements? Does the preservice practicum experience challenge or reinforce a lifetime of socialized experiences in schools? Must methods courses always be seen by most teacher candidates as little more than sites for collecting resources? Where and how do candidates construct professional knowledge of teaching? The data illustrate clearly that methods courses can be sites for powerful learning that challenges tacit assumptions about how and why we teach.

Michael, 2016-06-16 As educational standards continue to transform, it has become essential for educators and pre-service teachers to receive the support and training necessary to effectively instruct their students and meet societal expectations. However, there is not a clear consensus on what constitutes teacher effectiveness and quality within the education realm. The Handbook of Research on Professional Development for Quality Teaching and Learning provides theoretical perspectives and empirical research on educator preparation and methods for enhancing the teaching process. Focusing on teacher effectiveness and support provided to current and pre-service educators, this publication is a comprehensive reference source for practitioners, researchers, policy makers, graduate students, and university faculty.

Becoming a Teacher in a Field-based Setting Donna Louise Wiseman, Donna Danell Cooner, Stephanie L. Knight, 2002 Designed to support those teacher-preparatory programs that are becoming more field-based, this text offers a traditional framework for the methods or education course, while adding the field based component. While most texts offer methods and philosophies of teaching, BECOMING A TEACHER IN A FIELD-BASED SETTING presents these and then links all the theory to actual practice. This text is praised for its participatory nature through the use of activities and portfolio entries that help students reflect on their field experiences.

Learning to Teach Sue L. T. McGregor, 2023-10-01 This primer is about learning how to teach. As its name suggests, it provides a basic introduction to what is involved in becoming an effective, efficient, and efficacious educator. The targeted audiences are (a) preservice teachers (PST) (i.e., nonprofessional student teachers enrolled in a university Bachelor of Education degree), (b) early-career (novice) inservice teachers (c) or any educator for that matter who wants to build or bolster their essential foundation for teaching. The primer is unabashedly oriented to a synthesis of the technical (how-to) aspects of teaching because without prowess in these skills, even the most dedicated and committed teacher may not be effective and efficient let alone efficacious. Although teaching is both a science and an art, this primer is about the science of teaching. Other books focus on teaching as inquiry, thinking educators, reflective educators, and the sociocultural/political aspects of teaching. The book adopts a before-during-after class approach. It addresses how to (a) prepare lessons before a class (learning styles, learning objectives, lesson planning, and learning environments); (b) deliver lessons during a class (instructional strategies, questioning strategies, and classroom management); and (c) evaluate learning after the class (student assessment and evaluation strategies, and teacher self-reflection). This basic tool kit is further underscored with

details about the larger constructs of (d) developing courses, modules, and units from which daily lessons emerge. Higher level notions of (e) educational philosophies, (f) curriculum theories and (g) curriculum development approaches are also included to illustrate how they, as the educational context, shape teachers' pedagogies.
