Joseph W. A. Whitehorne

The Whirlwind War Frank N. Schubert, 1995 CMH Publication 70-30. Edited by Frank N. Schubert and Theresa L. Kraus. Discusses the United States Army's role in the Persian Gulf War from August 1990 to February 1991. Shows the various strands that came together to produce the army of the 1990s and how that army in turn performed under fire and in the glare of world attention. Retains a sense of immediacy in its approach. Contains maps which were carefully researched and compiled as original documents in their own right. Includes an index.

Space Shuttle Missions Summary (NASA/TM-2011-216142) Robert D. Legler, Floyd V. Bennett, 2011-09-01 Full color publication. This document has been produced and updated over a 21-year period. It is intended to be a handy reference document, basically one page per flight, and care has been exercised to make it as error-free as possible. This document is basically as flown data and has been compiled from many sources including flight logs, flight rules, flight anomaly logs, mod flight descent summary, post flight analysis of mps propellants, FDRD, FRD, SODB, and the MER shuttle flight data and inflight anomaly list. Orbit distance traveled is taken from the PAO mission statistics.

Defending Air Bases in an Age of Insurgency Shannon Caudill,Air University Press,2014-08 This anthology discusses the converging operational issues of air base defense and counterinsurgency. It explores the diverse challenges associated with defending air assets and joint personnel in a counterinsurgency environment. The authors are primarily Air Force officers from security forces, intelligence, and the office of special investigations, but works are included from a US Air Force pilot and a Canadian air force officer. The authors examine lessons from Vietnam, Iraq, Afghanistan, and other conflicts as they relate to securing air bases and sustaining air operations in a high-threat counterinsurgency environment. The essays review the capabilities, doctrine, tactics, and training needed in base defense operations and recommend ways in which to build a strong, synchronized ground defense partnership with joint and combined forces. The authors offer recommendations on the development of combat leaders with the depth of knowledge, tactical and operational skill sets, and counterinsurgency mind set necessary to be effective in the modern asymmetric battlefield.

The Birth of the Palestinian Refugee Problem, 1947-1949 Benny Morris,1989-02-24 This book is the first full-length study of the birth of

the Palestinian refugee problem. Based on recently declassified Israeli, British and American state and party political papers and on hitherto untapped private papers, it traces the stages of the 1947-9 exodus against the backdrop of the first Arab-Israeli war and analyses the varied causes of the flight. The Jewish and Arab decision-making involved, on national and local levels, military and political, is described and explained, as is the crystallisation of Israel's decision to bar a refugee repatriation. The subsequent fate of the abandoned Arab villages, lands and urban neighbourhoods is examined. The study looks at the international context of the war and the exodus, and describes the political battle over the refugees' fate, which effectively ended with the deadlock at Lausanne in summer 1949. Throughout the book attempts to describe what happened rather than what successive generations of Israeli and Arab propagandists have said happened, and to explain the motives of the protagonists.

The Combat Edge ,2000-12

Day Of Deceit Robert Stinnett,2001-05-08 Using previously unreleased documents, the author reveals new evidence that FDR knew the attack on Pearl Harbor was coming and did nothing to prevent it.

By Sea, Air, and Land Edward J. Marolda,1996-07 Depicts the U.S. Navy's contribution to the twenty-five-year American and Vietnamese campaign to defend the Republic of Vietnam. Two million U.S. naval personnel, more than 2,551 of whom lost their lives, served their country in southeast Asia. The

text and the 100s of photos in this book cover all naval aspects of this prolonged campaign, particularly the operations of carrier, surface, amphibious, logistic, riverine, coastal and mine forces. U.S. Navy Medal of Honor winners. Aircraft Tailcodes. Maps and charts. Glossary of terms. Bibliography.

Lost Enlightenment S. Frederick Starr,2015-06-02 The forgotten story of Central Asia's enlightenment—its rise, fall, and enduring legacy In this sweeping and richly illustrated history, S. Frederick Starr tells the fascinating but largely unknown story of Central Asia's medieval enlightenment through the eventful lives and astonishing accomplishments of its greatest minds—remarkable figures who built a bridge to the modern world. Because nearly all of these figures wrote in Arabic, they were long assumed

to have been Arabs. In fact, they were from Central Asia—drawn from the Persianate and Turkic peoples of a region that today extends from Kazakhstan southward through Afghanistan, and from the easternmost province of Iran through Xinjiang, China. *Lost Enlightenment* recounts how, between the years 800 and 1200, Central Asia led the world in trade and economic development, the size and sophistication of its cities, the refinement of its arts, and, above all, in the advancement of knowledge in many fields. Central Asians achieved signal breakthroughs in astronomy, mathematics, geology, medicine, chemistry, music, social science, philosophy, and theology, among other subjects. They gave algebra its name, calculated the earth's diameter with unprecedented precision, wrote the books that later defined European medicine, and penned some of the world's greatest poetry. One scholar, working in Afghanistan, even predicted the existence of North and South America—five centuries before Columbus. Rarely in history has a more impressive group of polymaths appeared at one place and time. No wonder that their writings influenced European culture from the time of St. Thomas Aquinas down to the scientific revolution, and had a similarly deep impact in India and much of Asia. *Lost Enlightenment* chronicles this forgotten age of achievement, seeks to explain its rise, and explores the competing theories about the cause of its eventual demise. Informed by the latest scholarship yet written in a lively and accessible style, this is a book that will surprise general readers and specialists alike.

The Inspectors General of the United States Army, 1903-1939 Joseph W. A. Whitehorne, 1998 Recounts how the inspectorate became one of the most consistent and important agents for change within the War Department. Provides the analyses, much of the criticism, and most of the description of the Army's metamorphosis.

The Demands of Humanity Gaines M. Foster, 2005-01-01 From the earliest days

of the Republic, the United States Army has not just maintained the national defense but has also performed a wide variety of peacetime missions. Army officers helped explore the West, Army engineers built early flood control systems, and Army pilots flew the first airmail routes. The Army Medical Department in particular has long aided the civilian community. Its members regularly contributed to the advancement of medical knowledge and in special situations provided health care for civilians. The Demands of Humanity examines one aspect of that direct assistance, medical aid rendered during natural disasters. Discussing help given both at home and abroad, this third volume in the Special Studies Series examines the origin of the relief mission in the nineteenth century and recounts its history to 1976. With their special expertise in public health and the treatment of mass casualties, Army medical personnel during these years compiled an impressive record of assistance. After the Spanish-American War, Army doctors made medical history in their campaigns against epidemic diseases in Cuba, Puerto Rico, and the Philippines. In times of twentieth century floods, hurricanes, tornadoes, earthquakes, famines, and epidemics, Army medical personnel aided individuals and furnished stricken communities valuable advice on sanitation and health care. The Demands of Humanity chronicles the humanitarian contribution made by Army doctors, nurses, and medical corpsmen during disaster situations. It also examines the problems their units encountered in relief operations and explains the development of the Army's assistance role.

It thereby contributes not only to the often-neglected history of the peacetime role of the military but to the history of social welfare policy in the United States as well. James L. Collins, Jr. Brigadier General, USA Chief of Military History
