Linux Recipes for Oracle DBAs Darl Kuhn, Bernard Lopuz, Charles Kim, 2008-12-01 Linux Recipes for Oracle DBAs is an example-based book on managing Oracle Database in a Linux environment. Covering commonly used distributions such as Red Hat Enterprise Linux and Oracle Enterprise Linux, the book is written for database administrators who need to get work done and lack the luxury of curling up fireside with a stack of Linux documentation. The book is task-oriented: Look up the task to perform. See the solution. Read up on the details. Get the job done. Takes you directly from problem to solution Covers the "right" mix of Linux user and administration tasks for database administrators Respects your time by being succinct and to-the-point

The Rise of Caring Power Annemieke van Drenth, Francisca de Haan, 1999 This original study discusses the role of women in developing and dispersing caring power and, vice-versa, the role of caring power in constituting 'women' as modern social subjects, processes which began around 1800. Based on the historian-/philosopher Foucault's concept of pastoral power, caring power also takes into account the vital role played by gender. Both humanitarian and religious motives fostered the ideal of serving the well-being of individual 'others' and thereby the interest of society as a whole. With the rise of caring power, this book argues, women began to feel responsible for 'those of their own sex' and to organize themselves in all-female organizations. In the

process they carved out new gender identities for themselves and the women in their care. The authors illustrate this profound historical change with the work of the reformers Elizabeth Fry (1780-1845) and Josephine Butler (1828-1906) and trace their impact in Britain and the Netherlands.

Assessment and Intervention for Executive Function Difficulties George McCloskey,Lisa A. Perkins,Bob Van Diviner,2008-12-05 In *Assessment and Intervention for Executive Function Difficulties*, McCloskey, Perkins, and Diviner provide a unique blend of theory, research, and practice that offers clinicians an overarching framework for the concept of executive functions (EFs) in educational settings. The conceptual model of executive functions is detailed, including their role in behavior, learning, and production across all settings. The heart of the book focus on the practical issues involved in the use of assessment tools, tests, report writing, and the implementation and follow-up of targeted interventions using the EF model. Six case studies are introduced in Chapter 1 and followed throughout the book, building understanding of the executive function difficulties of each child, assessment for identifying the difficulties, and interventions for dealing with the difficulties. An additional case study is discussed in detail in one of the concluding chapters, and downloadable resources will provide the practitioner with a

wealth of assessment forms, parent and teacher handouts, behavior tracking charts, and report/documentation forms.
