Republic of Yemen International Monetary Fund,2010-09-29 Yemen is confronted with a range of difficult economic challenges. The reduction in oil revenues in the past year has affected the Yemeni economy through a set of direct and indirect channels. The loss of oil revenue contributed to a record fiscal deficit of about 10 percent of GDP in 2009, financed in large part by the central bank. The balance of payments was also put under considerable strain. The identified measures are home-grown and designed to have a long-lasting impact on the structure of the budget.
