The Evolution of Migration Management in the Global North Christina Oelgemöller, 2017-03-16 The Evolution of Migration Management in the Global North explores how the radically violent migration management paradigm that dominates today's international migration has been assembled. Drawing on unique archive material, it shows how a forum of diplomats and civil servants constructed the 'transit country' as a site in which the illegal migrant became the main actor to be vilified. Policy-makers are divided between those who oppose migration, and those who support it, so long as it is properly managed. Any other position is generally seen at best as utopian. This volume advances a new way of conceptualizing policy-making in international migration at the regional and international level. Introducing the concept of 'informal plurilateralism', Oelgemöller explores how the Inter-Governmental Consultations on Asylum, Migration and Refugees (IGC), created the hegemonic paradigm of 'Migration Management', thus enabling today's specific ways the 'migrant' has their juridico-political status violently denied. This raises crucial questions about what democracy is and about the way in which the value of a human being is established, granted or denied. Inviting debate in a field which is often under-theorized, this work will be of great interest to students and scholars of International Relations, Migration Studies and International Relations Theory.

Hegel's Foundation Free Metaphysics Gregory S.

Moss,2020-05-20 Winner of the hegelpd-prize 2022

Contemporary philosophical discourse has deeply problematized the possibility of absolute existence. Hegel's Foundation Free Metaphysics demonstrates that by reading Hegel's Doctrine of the Concept in his Science of Logic as a form of Absolute Dialetheism, Hegel's logic of the concept can account for the possibility of absolute existence. Through a close examination of Hegel's concept of self-referential universality in his Science of Logic, Moss demonstrates how Hegel's concept of singularity is designed to solve a host of metaphysical and epistemic paradoxes central to this problematic. He illustrates how Hegel's revolutionary account of universality, particularity, and singularity offers solutions to six problems that have plagued the history of Western philosophy: the problem of nihilism, the problem of instantiation, the problem of the missing difference, the problem of absolute empiricism, the problem of onto-theology, and the third man regress. Moss shows that Hegel's affirmation and development of a revised ontological argument for God's existence is designed to establish the necessity of absolute existence. By adopting a metaphysical reading of Richard Dien Winfield's foundation free epistemology, Moss critically engages dominant readings and contemporary debates in Hegel scholarship. Hegel's Foundation Free Metaphysics will appeal to scholars interested in Hegel, German Idealism, 19th- and 20th-century European philosophy, metaphysics, epistemology, and contemporary European thought.

Organizing Words Yiannis Gabriel,2008 Organizing Words presents a series of essays on some 220 widely used--and much debated--terms in the social sciences, and organization studies. Each essay explores the meanings and uses of the word; and also the controversies they have sparked. The book aims to be a first port of call for students, researchers and scholars who wish to familiarize themselves with these key ideas and use them in their own work. The book is neither an encyclopaedia nor a dictionary, but a thesaurus. As such it combines both the original meaning of a thesaurus as a treasure trove, with its more contemporary characteristics of an accessible and practical resource. Primarily aimed to those interested in social and organizational studies, it will appeal to all those interested in the human sciences. It does not claim to be canonical or all-inclusive, but each entry seeks to enlighten and help, without patronizing or obscuring disagreements and difficulties. The book seeks to be re-assuring without being complacent or comfortable, to be authoritative

without being doctrinaire, and to be critical without being destructive. Words help us express ourselves, and make sense of our experiences and our actions; and they help us to organize ourselves, our thoughts and our universe. Organizing Words will be an invaluable resource for essay-writing and a useful tool in planning and carrying out projects and dissertations. Most of the entries have been written by Yiannis Gabriel, with 40 essays coming from experts in particular areas.
