Designing Efficient BPM Applications Christine McKinty,Antoine Mottier,2016-03-07 Looking for efficiency gains in your business? If you're a business analyst, this practical guide will show you how to design effective business process management (BPM) applications. Every business uses business processes—these everyday tasks help you gain and retain customers, stay profitable, and keep your operations infrastructure functioning. BPM specialists Christine McKinty and Antoine Mottier show you step-by-step how to turn a simple business procedure into an automated, process-based application. Using hands-on examples, you'll quickly learn how to create an online process that's easy to use. Each chapter builds on earlier material. You don't have to have any programming experience to design business processes—and if you have skills in designing workflows and understanding human interactions with processes, you already have a headstart. Through the course of this book, you will: Build a prototype of an application page Create the most frequent use flow in a process, and define the data model Generate real process forms and produce the first version of the application Connect your application to external information systems, and then build and test the complete application

The "How To" Grants Manual David G. Bauer,2015-03-17 This book breaks down the sometimes overwhelming and difficult task of creating a successful grant winning proposal into a series of clear and definable steps that lead to grant success. The implementation of these pro-active grant steps results in government, foundation and corporate grants success. Whether you are with a non-profit organization, a school district, or an institution of higher education, this step-by-step process will demystify the grants process and help you become a confident and knowledgeable grantseeker. Researching the grantor, reviewing previously funded proposals, and making pre-proposal contact with the funding source are just a few of the pro-active steps that will help to assure you that what you propose is right for the grantor and that the grantor should therefore select you to fund. The exhibits/worksheets in The "How To" Grants Manual further support this successful system. If your organization or institution wants to increase your success in attracting grants, this book is for you. From operating grants to technology to research, this book will help you outline your plan for success.

Exploring Inner Experience Russell T. Hurlburt,Christopher L. Heavy,2006-01-01 Written for the professional psychologist and philosopher, Exploring Inner Experience shows (a) how DES avoids the traps that destroyed the introspections of the previous century; (b) why DES reports of inner experience should be considered reliable and valid; (c) that DES reports of inner experience are the most accurate that have ever been produced by Western science; and (d) how to use the DES method. This book will be basic reading for all psychologists, philosophers, and students interested in consciousness, as well as anyone (professional or layperson) who is seriously concerned with understanding the human condition or any of its components.

Beyond-CMOS Technologies for Next Generation Computer Design Rasit O. Topaloglu,H.-S. Philip Wong,2018-08-20 This book describes the bottleneck faced soon by designers of traditional CMOS devices, due to device scaling, power and energy consumption, and variability limitations. This book aims at bridging the gap between device technology and architecture/system design. Readers will learn about challenges and opportunities presented by "beyond-CMOS devices" and gain insight into how these might be leveraged to build energy-efficient electronic systems.

Federated States of Micronesia: 2021 Article IV Consultation-Press Release; Staff Report; and Statement by the Executive Director for the Federated States of Micronesia International Monetary,International Monetary Fund. Asia and Pacific Dept,2021-11 The COVID-19 pandemic and related containment measures have put severe strains on the economy. The economic policy response has been strong and generally appropriate, helping counter the negative effects of the pandemic. Nevertheless, as the international borders remain shut, the economic contraction is likely to deepen in FY2021. A slow recovery is expected for FY2022 driven by a gradual border reopening. The FSM is facing significant medium-term uncertainty, owing to the possible expiration of grants and other assistance provided under the Compact Agreement with the United States. The FSM is also highly vulnerable to climate change-induced natural disasters.

Personal Information Management William P. Jones,Jaime Teevan,2011-07-01 In an ideal world, everyone would always have the right information, in the right form, with the right context, right when they needed it. Unfortunately, we do not live in an ideal world. This book looks at how people in the real world currently manage to store and process the massive amounts of information that overload their senses and their systems, and discusses how tools can help bring these real information interactions closer to the ideal. Personal information management (PIM) is the study and practice of the activities people perform to acquire, organize, maintain, and retrieve information for everyday use. PIM is a growing area of interest as we all strive for better use of our limited personal resources of time, money, and energy, as well as greater workplace efficiency and productivity. Personal information is currently fragmented across electronic documents, email messages, paper documents, digital photographs, music, videos, instant messages, and so on. Each form of information is organized and used to complete different tasks and to fulfill disparate roles and responsibilities in an individual’s life. Existing PIM tools are partly responsible for this fragmentation. They can also be part of the solution that brings information together again. A major contribution of this book is its integrative treatment of PIM-related research. The book grows out of a workshop on PIM sponsored by the National Science Foundation, held in Seattle, Washington, in 2006. Scholars from major universities and researchers from companies such as Microsoft Research, Google, and IBM offer approaches to conceptual problems of information management. In doing so, they provide a framework for thinking about PIM as an area for future research and innovation.

Conversation and Community Anne Gentle,2012 Anne Gentle's Conversation and Community has become the go-to reference for social media and technical communication. Her clear-eyed survey of the social media landscape has been adopted by many universities and is widely used by technical communicators. Design Space Exploration and Resource Management of Multi/Many-Core Systems Amit Kumar Singh,Amlan Ganguly,2021-05-10 The increasing demand of processing a higher number of applications and related data on computing platforms has resulted in reliance on multi-/many-core chips as they facilitate parallel processing. However, there is a desire for these platforms to be energy-efficient and reliable, and they need to perform secure computations for the interest of the whole community. This book provides perspectives on the aforementioned aspects from leading researchers in terms of state-of-the-art contributions and upcoming trends.

Tensegrity René Motro,2003-06-01 The word tensegrity results from the contraction of ‘tensional’ and ‘integrity’, a word created by Richard Buckminster Fuller. He went on to describe tensegrity structures as ‘islands of compression in an ocean of tension’, and René Motro has developed a comprehensive definition which is ‘systems in a stable self equilibrated system comprising a discontinuous set of compressed components inside a continuum of tensioned components’. This publication represents the life work of a leading exponent of a revolutionary and exciting method of structural design. * Represents the life work of a leading exponent of a revolutionary and exciting method of structural design * Applicable to architecture as an established structural system, can also be applied to other fields * Design professionals will be able to design better structures. Interested non-professionals will experience the great pleasure of being able to say I understand why the Hisshorn tower stands up
