In Pursuit of Ancient Pasts Stephen L. Dyson,2008-10-01 divThe stories behind the acquisition of ancient antiquities are often as important as those that tell of their creation. This fascinating book provides a comprehensive account of the history and development of classical archaeology, explaining how and why artifacts have moved from foreign soil to collections around the world. As archaeologist Stephen Dyson shows, Greek and Roman archaeological study was closely intertwined with ideas about class and social structure; the rise of nationalism and later political ideologies such as fascism; and the physical and cultural development of most of the important art museums in Europe and the United States, whose prestige depended on their creation of collections of classical art. Accompanied by a discussion of the history of each of the major national traditions and their significant figures, this lively book shows how classical archaeology has influenced attitudes about areas as wide-ranging as tourism, nationalism, the role of the museum, and historicism in nineteenth- and twentieth-century art./DIV

Disability in American Life [2 volumes] Tamar Heller,Sarah Parker Harris,Carol J. Gill,Robert Gould,2018-12-07 Disability—as with other marginalized topics in social policy—is at risk for exclusion from social debate. This multivolume reference work provides an overview of challenges and opportunities for people with disabilities and their families at all stages of life. Once primarily thought of as a medical issue, disability is now more widely recognized as a critical issue of identity, personhood, and social justice. By discussing challenges confronting people with disabilities and their families and by collecting numerous accounts of disability experiences, this volume firmly situates disability within broader social movements, policy, and areas of marginalization, providing a critical examination into the lived experiences of people with disabilities and how disability can affect identity. A foundational introduction to disability for a wide audience—from those intimately connected with a person with a disability to those interested in the science behind disability—this collection covers all aspects of disability critical to understanding disability in the United States. Topics covered include characteristics of disability; disability concepts, models, and theories; important historical developments and milestones for people with disabilities; prominent individuals, organizations, and agencies; notable policies and services; and intersections of disability policy with other policy.

The Religion of the Etruscans Nancy Thomson de Grummond,Erika Simon,2009-04-20 Devotion to religion was the distinguishing characteristic of the Etruscan people, the most powerful civilization of Italy in the Archaic period. From a very early date, Etruscan religion spread its influence into Roman society, especially with the practice of divination. The Etruscan priest Spurinna, to give a well-known example, warned Caesar to beware the Ides of March. Yet despite the importance of religion in Etruscan life, there are relatively few modern comprehensive studies of Etruscan religion, and none in English. This volume seeks to fill that deficiency by bringing together essays by leading scholars that collectively provide a state-of-the-art overview of religion in ancient Etruria. The eight essays in this book cover all of the most important topics in Etruscan religion, including the Etruscan pantheon and the roles of the gods, the roles of priests and divinatory practices, votive rituals, liturgical literature, sacred spaces and temples, and burial and the afterlife. In addition to the essays, the book contains valuable supporting materials, including the first English translation of an Etruscan Brontoscopic Calendar (which guided priests in making divinations), Greek and Latin sources about Etruscan religion (in the original language and English translation), and a glossary. Nearly 150 black and white photographs and drawings illustrate surviving Etruscan artifacts and inscriptions, as well as temple floor plans and reconstructions.

Ancient Marbles to American Shores Stephen L. Dyson,2016-11-11 In *Ancient Marbles to American Shores*, Stephen L. Dyson uncovers the history of classical archaeology in the United States by exploring the people and programs that gave birth to archaeology as a discipline in this country. He puts aside the common formula of chronicling great digs, great discoveries, and great men in favor of a cultural, ideological, and institutional history of the subject. The book explores the ways American contact with the monuments of Greece and Rome affected the national consciousness. It discusses how the spread of classical style laid the groundwork for the development of the discipline after the Civil War and examines the period before World War I, when most of the institutions that led to the establishment of the discipline, as well as the first generation of American classical archaeologists, were created. It looks at the role classical

archaeology played in the development of the American art museum since the later nineteenth century and considers changes in American classical archaeology from World War II to the mid-1970s. Filling the void of information on the history of classical archaeology in the United States, this lively book is a valuable contribution to literature on a subject which is enjoying ever-increasing interest and attention.

Practical Handbook of Multi-Tiered Systems of Support Rachel Brown-Chidsey, Rebekah Bickford, 2015-12-15 Accessible and comprehensive, this book shows how to build a schoolwide multi-tiered system of support (MTSS) from the ground up. The MTSS framework encompasses tiered systems such as response to intervention (RTI) and positive behavioral interventions and supports (PBIS), and is designed to help all K-12 students succeed. Every component of an MTSS is discussed: effective instruction, the role of school teams, implementation in action, assessment, problem solving, and data-based decision making. Practitioner-friendly features include reflections from experienced implementers and an extended case study. Reproducible checklists and forms can be downloaded and printed in a convenient 8 1/2 x 11 size.

Partners for Special Needs Douglas J. Fiore, Julie Anne Fiore, 2017-11-28 Learn how to collaborate with parents and special education advocates to ensure student success. This practical book shows you how to navigate the tricky path to meeting special education goals and outcomes. It also provides strategies to help you communicate and partner more effectively with families and specialists. Part I of the book offers key information on how special education has evolved over recent decades and what the Individualized Education Plan process entails. Part II features techniques for strengthening communication so you can avoid conflict and create as strong a partnership as possible. You'll learn the specific roles of advocates and parents, and you'll gain practical strategies for communicating proactively and managing communication breakdowns. You'll also uncover how to overcome the challenges of working with people during difficult times. The book is filled with tips, examples, and reflection questions to help you implement the ideas immediately. With the essential strategies in this book, you can become the best support system for the child or children you serve!

Caere Nancy Thompson de Grummond, Lisa Pieraccini, 2016-08-09 The Etruscan city of Caere and eleven other Etruscan city-states were among the first urban centers in ancient Italy. Roman descriptions of Etruscan cities highlight their wealth, beauty, and formidable defenses. Although Caere left little written historical record outside of funerary inscriptions, its complex story can be deciphered by analyzing surviving material culture, including architecture, tomb paintings, temples, sanctuaries, and materials such as terracotta, bronze, gold, and amber found in Etruscan crafts. Studying Caere provides valuable insight not only into Etruscan history and culture but more broadly into urbanism and the development of urban centers across ancient Italy. Comprehensive in scope, Caere is the first English-

language book dedicated to the study of its eponymous city. Collecting the work of an international team of scholars, it features chapters on a wide range of topics, such as Caere's formation and history, economy, foreign relations, trade networks, art, funerary traditions, built environment, religion, daily life, and rediscovery. Extensively illustrated throughout, Caere presents new perspectives on and analysis of not just Etruscan civilization but also the city's role in the wider pan-Mediterranean basin.

Multi-Tiered Systems of Support Gary E. Schaffer, 2022-08-11 Multi-Tiered Systems of Support: A Practical Guide to Preventative Practice, by Gary Schaffer, makes it easy to decipher this important framework for delivering evidence-based interventions to improve students' learning, behavior, and social-emotional outcomes. This text focuses on the common elements of the intervention service delivery models comprising Multi-Tiered Systems of Support (MTSS) to offer step-by-step guidance for each stage of the process. Covering MTSS from a whole child perspective, Multi-Tiered Systems of Support empowers current and future educators to set up learners for the greatest success in school and beyond. This book simplifies the MTSS model using an overall analogy of the four basic steps to building a house. We start with the foundation as the history of MTSS, the walls as the four main intervention service delivery models, the framework as common components that link all delivery models, and then the roof that represents MTSS as a whole. Diagrams, checklists and flowcharts accompany each step of the MTSS model to organize and summarize the information on each model. Case studies offer practical, in-depth examples of implementation strategies across models within MTSS. Unique sections on data-based decision making and infusing culturally responsive practices into RTI, SWPBS, Social-Emotional RTI, and Suicide Prevention and Intervention offer readers ways to better adapt and refine their implementation of MTSS. Through this text, readers will have a convenient resource that will save them time locating information on interventions, measures of universal screening, and progress monitoring unique to each intervention service delivery model within MTSS.

A Better Future Jacqueline Bhabha, Wenona Giles, Faraaz Mahomed, 2020-09-17 Policy makers, advocates and scholars have long concentrated on the importance of equal access to primary and secondary education as a foundation for a democratic and just society. Despite the growing importance of higher and specialist education in an increasingly technological and skill-focused global market, tertiary education has attracted much less attention. And yet, universities and colleges are epicentres of egregious disparities in access, which impinge on traditionally marginalized communities, such as racial minorities, migrants, indigenous populations, and people with disabilities. By drawing attention to this issue and assembling first-rate material from scholars and policy makers across the globe, this book performs an invaluable service for those interested in understanding and fighting a highly significant violation of educational opportunity and social justice.
