Elektronik Belgelerin İmhası: Teori ve Uygulama Ceyhan GÜLER,2020-06-01 Günümüzde bilgi teknolojilerinin sunduğu imkânlar, belgelerin üretilmesi, tanımlanması, düzenlenmesi, kullanılması, korunması ve imha edilmesi gibi işlemlerin elektronik ortamda gerçekleştirilmesini sağlamaktadır. Bu işlemlerin gerçekleştirilmesi, geleneksel uygulamalar gibi elektronik ortamdaki uygulamaların da tam işlevli olarak çalışmasıyla mümkün kılınır. Arşiv imha teorisi, geleneksel anlamdaki ihtiyaçları karşılayabilecek ilke ve uygulamalara sahiptir. Ancak Türkiye'de arşiv uygulamalarının önemli aşamalarından biri olan imhanın elektronik ortamda nasıl yapılacağı ve bunun istenilen şekilde olup olmadığı belirsiz bir konudur. Yine belgelerin ve bu belgelere ait işlem izlerinin elektronik ortamda hangi yöntem ve tekniklerle imha edilebileceği ve bunun geri dönüşü olmayacak şekilde yapılmasına ilişkin herhangi bir çalışmanın olmayışı Türk arşivcilik literatüründe eksikliği hissedilen bir konudur. Bu çalışmanın söz konusu eksikliği doldurması beklenmektedir. Çalışmada konuya yardımcı kaynakların Türkiye'de henüz olmayışı, başta İngilizce olmak üzere yabancı dillerde hazırlanmış kaynakların ağırlığı ve çevirisi karşılaşılan birinci güçlük olarak ifade edilebilir. İkinci bir güçlük de, Türkiye'de elektronik belge yönetim sistemlerinin (EBYS) yakın geçmişte uygulanmaya başlanması nedeniyle henüz imha süresi gelmiş belgelerin olmayışı ya da bu konu bağlamında henüz zorlayıcı bir durum ile karşılaşılmaması, uygulama noktasında örneklerin eksikliğini hissettirmektedir. Yine Türkiye'de açık kodlu EBYS yazılımlarının olmayışı sistem içinde imha süreçlerinin nasıl olduğunu görmeye imkân vermemektedir. EBYS yazılımlarının, TS 132981'e göre geliştirilmesi, bu standart kriterlerinde elektronik belgelerin imhası ve bu belgelerin işlem izlerine ilişkin açıklayıcı herhangi bir maddenin olmayışı, hazırlanmış olan EBYS'lerde elektronik belgelere ve işlem izlerine dair imha prosedürlerinin nasıl yerine getirilmesi gerektiği sorusunu düşündürmektedir. Türkiye'deki yazılım şirketleriyle görüşülmesine rağmen elektronik belgelerin imhasına ve işlem izlerinin yok edilmesine yönelik net yanıtlar alınamamıştır. Araştırma, tüm bu güçlüklere rağmen, uluslararası imha standartları ve yazılımları ve bu konuyla ilgili ve ilişkili birçok kaynağın sentezlenmesiyle, hem geleneksel arşivcilik hem de modern arşivcilik uygulamalarına yönelik kaynaklardan alınan bilgilerle tamamlanmaya çalışılmıştır.

High Efficiency Video Coding (HEVC) Vivienne Sze,Madhukar Budagavi,Gary J. Sullivan,2014-08-23 This book provides developers, engineers, researchers and students with detailed knowledge about the High Efficiency Video Coding (HEVC) standard. HEVC is the successor to the widely successful H.264/AVC video compression standard, and it provides around twice as much compression as H.264/AVC for the same level of quality. The applications for HEVC will not only cover the space of the well-known current uses and capabilities of digital video — they will also include the deployment of new services and the delivery of enhanced video quality, such as ultra-high-definition television (UHDTV) and video with higher dynamic range, wider range of representable color, and greater representation precision than what is typically found today. HEVC is the next major generation of video coding design — a flexible, reliable and robust solution that will support the next decade of video applications and ease the burden of video on world-wide network traffic. This book provides a detailed explanation of the various parts of the standard, insight into how it was developed, and in-depth discussion of algorithms and architectures for its implementation.

Adobe GoLive 5.0 ,2000 A guide to GoLive 5.0. This book helps readers learn the features of GoLive 5.0. It covers toolbars, palettes, site management tools, layout design, and more. It is useful to beginning to intermediate level course in Computer Graphics, Web Graphics, Graphic Design, Digital Imaging, or Visual Communications that uses Adobe software applications.

Video Compression Handbook Andy Beach,Aaron Owen,2018-06-27 Video compression is not a new process; however, it is forever evolving. New standards, codecs, and ways

of getting the job done are continually being created. Newcomers to video compression and seasoned veterans alike need to know how to harness the tools and use them for specific workflows for broadcast, the Web, Blu-rays, set-top boxes, digital cinema, and mobile devices. Here to guide you through the multitude of formats and confusing array of specifications, Andy Beach and Aaron Owen use a practical, straightforward approach to explaining video compression. After covering the fundamentals of audio and video compression, they explore the current applications for encoding, discuss the common workflows associated with each, and then look at the most common delivery platforms. The book includes examples from the authors' projects as well as recipes that offer a way to define some of the best practices of video compression today. This invaluable resource gives you: proven techniques for delivering video online, or via disc or other devices. clear, straightforward explanations that cut through the jargon. step-by-step instructions for using a wide variety of encoding tools. workflow tips for performing either stand-alone or batch compressions. insight and advice from top compression professionals sprinkled throughout.

The MPEG Handbook John Watkinson,2012-09-10 A complete, professional 'bible' on all aspects of audio and video compression using MPEG technology, including the MPEG-4 standard and, in this second edition, H-264. The clarity of explanation and depth of technical detail combine to make this book an essential and definitive reference work. THE MPEG HANDBOOK is both a theoretical and practical treatment of the subject. Fundamental knowledge is provided alongside practical guidance on how to avoid pitfalls and poor quality. The often-neglected issues of reconstructing the signal timebase at the decoder and of synchronizing the signals in a multiplex are treated fully here. Previously titled MPEG-2, the book is frequently revised to cover the latest applications of the technology.

Video Encoding by the Numbers Jan Lee Ozer,2016-12-28 Video Encoding by the Numbers helps readers optimize the quality and efficiency of their streaming video by objectively detailing the impact of critical configuration options with industry-standard quality metrics like PSNR and SSIMplus. This takes the guesswork out of most encoding decisions and allows readers to achieve the optimal quality/data rate tradeoff. In addition, readers learn how to use tools like the Moscow University Video Quality Measurement tool, SSIMWave Quality of Experience Monitor, and FFmpeg to perform similar quality tests on their own videos. Because all videos encode differently, the tests detailed in the book involve eight different videos, including movie footage, animations, talking head footage, a music video, and Powerpoint and Camtasia-based videos. Readers first learn how to determine the ideal data rate for their videos at different resolutions. Then the book covers configuration options like bitrate control (CBR, VBR) that impacts quality and deliverability, and I-Frame, B-Frame, and reference frame decisions that impact quality and encoding time. The next three chapters focus on codec-specific configurations like Profile and preset for H.264 and HEVC, and the various configuration options available for Google's VP9. Next the book details how to choose an adaptive bitrate (ABR) technology, how to create an encoding ladder, and the most efficient ways to encode and package video into different ABR formats. Working off the groundbreaking work by Netflix and YouTube, the final chapter teaches the reader how a use per-title encoding with their own videos to create the ideal encoding ladder for each video in their library. Each chapter concludes with a section detailing how to configure the options discussed with FFmpeg, a preferred tool for high-volume video producers, including packaging into HLS and DASH formats (the latter with MP4Box). Overall readers learn how to optimally configure their encoding ladders and how to produce their videos with FFmpeg.

High Efficiency Video Coding Mathias Wien,2014-09-29 The video coding standard High Efficiency Video Coding (HEVC) targets at improved compression performance for video resolutions of HD and beyond, providing Ultra HD video at similar compressed bit rates as for HD video encoded with the well-established video coding standard H.264/AVC. Based on known concepts, new coding structures and improved coding tools have been developed and specified in HEVC. The standard is expected to be taken up easily by established industry as well as new endeavors, answering the needs of todays connected and ever-evolving online world. This book presents the High Efficiency Video Coding standard and explains it in a clear and coherent language. It provides a comprehensive and consistently written description, all of a piece. The book targets at both, newbies to video coding as well as experts in the field. While providing sections with introductory text for the beginner, it suits as a well-arranged reference book for the expert. The book provides a comprehensive reference for the technical details of the employed coding tools; it further outlines the algorithmic advances compared to H.264/AVC. In addition to the technical aspects, the book provides insight to the general concepts of standardization, how specification text is written, and how these concepts apply to the HEVC specification.

Mathematik multimodal Stefan Jörissen,2013 Die Vermittlung mathematischer Inhalte und Zusammenhänge im Unterricht ist komplex. Neben verbalen Erläuterungen und Notationen an der Wandtafel kommen weitere kommunikative Mittel zum Tragen, die in der Forschung bisher wenig Beachtung fanden. Dazu zählen etwa die Gestik und die Blickrichtung einer Lehrperson, aber auch die Schriftgröße und -stärke, mit der sie Gleichungen an der Tafel notiert. Diese Multimodalität des Mathematikunterrichts ist Gegenstand der vorliegenden Arbeit. Im Zentrum der videobasierten Untersuchung steht eine konversationsanalytische Auswertung von Unterrichtspassagen an einer Fachhochschule. Die Analysen machen deutlich, dass mathematische Sachverhalte im Unterricht oft erst durch das Zusammenwirken verschiedener kommunikativer Mittel manifest werden. Die Resultate der Arbeit ermöglichen ein neues Verständnis des Mathematikunterrichts an Hochschulen und Gymnasien. Zugleich zeigen sie die Notwendigkeit einer mathematischen Mikrodidaktik, die sich gezielt Phänomenen im kommunikativen Kleinbereich widmet. Stefan Jörissen studierte in Zürich deutsche Sprachwissenschaft und Mathematik. Er war mehrere Jahre als Journalist tätig, bevor er eine Anstellung als Assistent am Institut für Erziehungswissenschaft der Universität Bern übernahm. Seit 2006 ist er Dozent für Deutsch und Kommunikation an der Zürcher Hochschule für Angewandte Wissenschaften. Daneben arbeitet er für die Hochschuldidaktik der Universität Zürich.

The MPEG-4 Book Fernando C. N. Pereira,Touradj Ebrahimi,2002 In this book, two leaders of the MPEG-4 standards community offer an in-depth, targeted guide to the MPEG-4 standard and its use in real, cutting-edge applications. The authors demonstrate how MPEG-4 addresses the rapidly evolving needs of telecommunications, broadcast, interactive, and converged applications more successfully than any previous standard.

Data Broadcasting: Understanding the ATSC Data Broadcast Standard Richard S. Chernock,Regis J. Crinon,Michael A. Dolan,John R. Mick,2001-05-07 A ROADMAP FOR IMPLEMENTING THE ATSC DATA BROADCAST STANDARD The ATSC Data Broadcast Standard provides the means to transform digital TV signals from plain vanilla audio/video to 57-flavor broadband digital data delivery, opening a universe of device and service possibilities. Authored by four of the standard's lead writers -- Richard

Chernock, Regis Crinon, Michael Dolan, and John R. Mick, Jr. -- Data Broadcasting is the first guide to the new ATSC standard. These experts help you: *Understand the concepts behind standard provisions for carrying any type of data over MPEG-2 data transport mechanisms *Implement the standard in real-world service creation and rollouts *Enable a new generation of set-top boxes, hand-held devices, and PC add-in cards for handling both data and streaming video *Configure stand-alone data injection and data injection associated with video and audio programs *Define the optimal transmittal method for any type of data *Resolve system architecture, receiver-reference design, data categorization, and encapsulation questions *Solve announcement, and discovery and binding mechanisms problems *Avoid implementation pitfalls with encapsulation examples, illustrated layering, and buffer models

Digital Television Hervé Benoit,2002 Writing for readers with a background in electronics, some knowledge of analog television, and a basic digital background, Benoit (Philips Semiconductors, France) intends this book as a summary and starting point rather than a handbook for experts. He describes the complex problems that had to be solved in order to define reliable standards for broadcasting digital pictures, and he explains the solutions chosen for the European digital video broadcasting (DVB) system based on the international MPEG-2 compression standard. The book ends with a description of a digital integrated receiver decoder, or set-top box, and a discussion of future prospects. Adapted and translated by the author from a 1996 work published in French (Paris: Dunod). The second edition adds a chapter on software interoperability. Annotation copyrighted by Book News, Inc., Portland, OR.

Multimedia '96 Bodo Urban,2012-12-06 In the last few years multimedia hardware and applications have become widely available on PC and workstations. Moreover, through the tremendous development and the wide usage of the World Wide Web multimedia applications have been brought over the network to many people. This book presents the results of the fourth in a well established series of international workshops on Multimedia organized by the EUROGRAPHICS Association, and held from May 28 to 30, 1996, in Rostock, Germany. The workshop had the special topic Multimedia on the Net and was the follow up of the EUROGRAPHICS Symposium and Workshop on Multimedia held in Graz in June 1994. The workshop program consisted of an invited keynote speech and five technical sessions. The fifteen contributions selected for this volume treat topics of particular interest in current research and address actual problems of the use of multimedia in distributed applications over the network. According to the technical sessions they can be roughly structured in the parts concepts for handling multimedia data, still and motion pictures on the net, WWW and multimedia, collaborative multimedia, and multimedia and education. Concepts for handling multimedia data are addressed in two contributions. The first treats a frame based presentation model for distributed information systems (Kirste), the other one presents a temporal logic formalism for specifying navigational transformation in hypermedia applications (Mere et al.).

Communicating Pictures David Bull,2014-07-19 Communicating Pictures starts with a unique historical perspective of the role of images in communications and then builds on this to explain the applications and requirements of a modern video coding system. It draws on the author's extensive academic and professional experience of signal processing and video coding to deliver a text that is algorithmically rigorous, yet accessible, relevant to modern standards, and practical. It offers a thorough grounding in visual perception, and demonstrates how modern image and video compression methods can be designed in order to meet the rate-quality performance levels demanded by today's applications, networks and users.With this book you will learn: Practical issues when implementing a codec, such as picture boundary extension and complexity reduction, with particular emphasis on efficient algorithms for transforms, motion estimators and error resilience Conflicts between conventional video compression, based on variable length coding and spatiotemporal prediction, and the requirements for error resilient transmission How to assess the quality of coded images and video content, both through subjective trials and by using perceptually optimised objective metrics Features, operation and performance of the state-of-the-art High Efficiency Video Coding (HEVC) standard Covers the basics of video communications and includes a strong grounding in how we perceive images and video, and how we can exploit redundancy to reduce bitrate and improve rate distortion performance Gives deep insight into the pitfalls associated with the transmission of real-time video over networks (wireless and fixed) Uses the state-of- the-art video coding standard (H.264/AVC) as a basis for algorithm development in the context of block based compression Insight into future video coding standards such as the new ISO/ITU High Efficiency Video Coding (HEVC) initiative, which extends and generalizes the H.264/AVC approach

Introduction to Digital Audio Coding and Standards Marina Bosi,Richard E. Goldberg,2012-12-06 Introduction to Digital Audio Coding and Standards provides a detailed introduction to the methods, implementations, and official standards of state-of-the-art audio coding technology. In the book, the theory and implementation of each of the basic coder building blocks is addressed. The building blocks are then fit together into a full coder and the reader is shown how to judge the performance of such a coder. Finally, the authors discuss the features, choices, and performance of the main state-of-the-art coders defined in the ISO/IEC MPEG and HDTV standards and in commercial use today. The ultimate goal of this book is to present the reader with a solid enough understanding of the major issues in the theory and implementation of perceptual audio coders that they are able to build their own simple audio codec. There is no other source available where a non-professional has access to the true secrets of audio coding.
