### **Foundations of Quantum Mechanics**

Travis Norsen,2017-08-17 Authored by an acclaimed teacher of quantum physics and philosophy, this textbook pays special attention to the aspects that many courses sweep under the carpet. Traditional courses in quantum mechanics teach students how to use the quantum formalism to make calculations. But even the best students - indeed, especially the best students - emerge rather confused about what, exactly, the theory says is going on, physically, in microscopic systems. This supplementary textbook is designed to help such students understand that they are not alone in their confusions (luminaries such as Albert Einstein, Erwin Schroedinger, and John Stewart Bell having shared them), to sharpen their understanding of the most important difficulties associated with interpreting quantum theory in a realistic manner, and to introduce them to the most

promising attempts to formulate the theory in a way that is physically clear and coherent. The text is accessible to students with at least one semester of prior exposure to quantum (or modern) physics and includes over a hundred engaging end-of-chapter Projects that make the book suitable for either a traditional classroom or for self-study.

**Energy-Efficient Wireless Sensor Networks** Vidushi Sharma, Anuradha Pughat, 2017-07-28 The advances in low-power electronic devices integrated with wireless communication capabilities are one of recent areas of research in the field of Wireless Sensor Networks (WSNs). One of the major challenges in WSNs is uniform and least energy dissipation while increasing the lifetime of the network. This is the first book that introduces the energy efficient wireless sensor network techniques and protocols. The text covers the theoretical as well as the practical requirements to conduct and trigger new experiments and project ideas. The advanced techniques will help in industrial problem solving for energy-hungry wireless sensor network applications.

**Drug Policies and Development** ,2020-08-31 The 12th volume of International Development Policy explores the relationship between international drug policy and development goals, both current and within a historical perspective. Contributions address the drugs and development nexus from a range of critical viewpoints, highlighting gaps and contradictions, as well as exploring strategies and opportunities for enhanced linkages between drug control and development programming. Criminalisation and coercive law enforcement-based responses in international and national level drug control are shown to undermine peace, security and development objectives. Contributors include: Kenza Afsahi, Damon Barrett, David Bewley-Taylor,

Daniel Brombacher, Julia Buxton, Mary Chinery-Hesse, John Collins, Joanne Csete, Sarah David, Ann Fordham, Corina Giacomello, Martin Jelsma, Sylvia Kay, Diederik Lohman, David Mansfield, José Ramos-Horta, Tuesday Reitano, Andrew Scheibe, Shaun Shelly, Khalid Tinasti, and Anna Versfeld.

*Information Technology in Languages for Specific Purposes* Elisabet Arnó Macià, Antonia Soler Cervera, Carmen Rueda Ramos, 2006-10-13 I first used the Internet in fall 1993, as a Fulbright Scholar at Charles University in Prague. I immediately recognized that the Internet would radically transform second language teaching and learning, and within a year had written my first book on the topic, *E-Mail for English Teaching*. The book galvanized a wave of growing interest in the relationship of the Internet to language learning, and was soon followed by many more books on the topic by applied linguists or educators. This volume, though, represents one of the first that specifically analyzes the relationship of new technologies to the teaching of languages for specific purposes (LSP), and, in doing so, makes an important contribution. The overall impact of information and communication technology (ICT) on second language learning can be summarized in two ways, both of which have special significance for teaching LSP. First, ICT has transformed the context of language learning. The stunning growth of the Internet—resulting in 24 trillion email messages sent in 2005, and more than 600 billion Web pages and 50 million blogs online in the same year—has helped make possible the development of English as the world's first global

language.

**The Sugarless Plum** Zippora Karz, 2011-02-01 It started as the perfect story. Zippora Karz was a member of the famed New York City Ballet by the age of eighteen. By twenty she was starring as the Sugar Plum Fairy in *The Nutcracker*, dancing roles created by Jerome Robbins, and traveling the world. It was the stuff dreams are made of until, at age twenty-one, Karz was diagnosed with diabetes. Balancing ballet and her blood sugar would be a long

and difficult struggle for Karz. In *The Sugarless Plum*, Karz shares her journey from denial, shame and miseducation about her illness to how she led an active, balanced and satisfying life as an insulin-dependent diabetic and soloist with one of the world's most famous ballet companies. *The Sugarless Plum* takes readers deep into the heart and soul of a young dancer, and is a remarkable testament to determination and perseverance.

**Long-term Effects of Law Enforcement's Post-9/11 Focus on Counterterrorism and Homeland Security** Lois M. Davis,2010 In the aftermath of 9/11, many law enforcement agencies (LEAs) shifted more resources toward developing counterterrorism (CT) and homeland security (HS) capabilities. This volume examines the effects the focus on CT and HS has had on law enforcement since 9/11, including organizational changes, funding mechanisms, how the shift has affected traditional crime-prevention efforts, and an assessment of benefits, costs, and future challenges.

Climate-Resilient Horticulture: Adaptation and Mitigation Strategies Harish Chandra Prasad Singh,Nadipynayakanahally Krishnamurthy Sriniv Rao,Kodthalu

Seetharamaiah Shivashankar, 2016-08-23 Climate change, a global phenomenon, has attracted scientists to contribute in anticipatory research to mitigate adverse impacts, which are more important for horticulture, considering that the scenario is in the midst of revolution, reaching the production level of 250 million tonnes in India. Impacts of climate variability have, invariably, profound influence on production and quality. An understanding of the impacts and relevant adaptation strategies are of foremost importance to sustain the productivity and profitability of horticulture crops in the climate change scenario, which necessitates synthesis of current knowledge to develop strategies for adaptation and mitigation to achieve climate-resilient horticulture. The book Climate-resilient horticulture: adaptation and mitigation strategies addresses the effects of climate change on different horticultural crops and focuses on the adaptation strategies based on the scientific knowledge generated by the experts in different agro-climatic regions in India. Issues have been covered in various chapters to make this book a treasure of knowledge in horticulture vis-a-vis climate change. Some of the crops included in the book are apple, grapes, cashew, banana, litchi, mango, coconut, oil palm, potato, tomato, cucurbits and flowers. In addition to strategies to be adapted in these crops, various other important aspects like carbon sequestration, pests and diseases, and urban landscaping are also covered in the book. Information on climatic risks and adaptation options for resilience in horticultural crops and future strategies and information on

pest and disease dynamics on horticultural crops in relation to climate change and available mitigation strategies have also been documented. The book is edited by Dr H P Singh, a visionary leader, and his colleagues, which will be highly valuable to research workers, students, policy planners and farmers to understand and checkmate the adverse effect of climate change, so as to convert weakness into opportunity.

*Runaway Electrons Preionized Diffuse Discharges* Viktor Fedotovitch Tarasenko, 2014 This collective book provides a review and summary of recent ten-year research in runaway electron preionised diffuse discharges (REP DD) formed in an inhomogeneous electric field in different gases at increased pressure. Attention is also given to volume (diffuse) discharges in a homogeneous electric field, barrier discharges, and so-called open low-pressure discharges. The book has contributions by research groups from different countries and institutes, which added much to the scope of data presented. New experimental techniques and equipment, including those with picosecond time resolutions, were required for diagnostics of electrical and optical signals. The book consists of 20 chapters, some of which were written jointly by researchers of different teams. We hope that this book will provide the reader with the unique opportunity to gain an insight into various aspects of runaway electron preionised diffuse discharges.
