E-mail In An Instant Karen Leland,Keith Bailey,2009-02-01 The In An Instant series is a new brand of user-friendly, engaging, and practical reference guides on core business topics, which capitalizes on the authors' extensive experience and knowledge, as well as interviews they have conducted with leading business experts. Written in an upbeat and engaging style, the series presents 60 tips and techniques with anecdotes, examples, and exercises that the reader can immediately apply to make their work life more efficient, effective, and satisfying. Surveys show that people in corporations receive an average of 175 messages per day. Topping the list is e-mail, surpassing voice mail, faxes, and telephone messages as the most frequent type of message received. While e-mail is the biggest communication tool for business use, its remote nature—which eliminates tone of voice and body language—presents a huge potential for misunderstanding and misinterpretation. Many people find themselves dealing with dozens of e-mails every day whose impact has been lost in cyberspace and, as a result, frequently miss the mark. E-mail In An Instant helps readers to gain mastery over their electronic mail box and be more effective at getting their messages across with style and impact as well as managing and responding to the messages they receive. The book shows everyone from corporate executives to stay-at-home moms how to improve their e-mail efficiency by: Accelerating your workday by knowing what to send and what not to Assessing your e-mail writing style Adopting time management for your mailbox Learning to separate the trivial from the important Learning how to say no, e-mail style Writing business e-mails for other cultures

The Science of Marketing Dan Zarrella, 2013-04-22 Scientific marketing research delivers proven marketing tactics and tips The Science of Marketing applies a scientific approach to the way businesses and brands approach marketing. It uses a combination of marketing, statistical, and psychological research to explain why and, more importantly, how, companies should adapt marketing strategies such as blogging, social media, email marketing, and webinars to achieve maximum results. The book contradicts what the author calls the unicorns and rainbows strategy that simply encourages companies to love their customers and hug their followers. Instead, the book offers more substantial, proven tactics and tips gathered through scientific research and techniques. Lists what time of day and what day of the week the most retweets occur Explains why weekends are best for Facebook sharing, which blog posts lead to comments, why early mornings are best for emails, and how to blog to acquire links Describes how to avoid crowding your content The Science of Marketing provides the research and tools to help you make a stronger impact in the digital marketing space.
