Software Architecture Knowledge Management

Muhammad Ali Babar, Torgeir Dingsøyr, Patricia Lago, Hans van der Vliet, 2010-05-03 A software architecture manifests the major early design decisions, which determine the system's development, deployment and evolution. Thus, making better architectural decisions is one of the large challenges in software engineering. Software architecture knowledge management is about capturing practical experience and translating it into generalized architectural knowledge, and using this knowledge in the communication with stakeholders during all phases of the software lifecycle. This book presents a concise description of knowledge management in the software architecture discipline. It explains the importance of sound knowledge management practices for improving software architecture processes and products, and makes clear the role of knowledge management in software architecture and software development processes. It presents many approaches that are in use in software companies today, approaches that have been used in other domains, and approaches under development in academia. After an initial introduction by the editors, the contributions are grouped in three parts on Architecture Knowledge Management, Strategies and Approaches for Managing Architectural Knowledge, and Tools and Techniques for Managing Architectural Knowledge. The presentation aims at information technology and software engineering professionals, in particular software architects and software architecture researchers. For the

industrial audience, the book gives a broad and concise understanding of the importance of knowledge management for improving software architecture process and building capabilities in designing and evaluating better architectures for their mission- and business-critical systems. For researchers, the book will help to understand the applications of various knowledge management approaches in an industrial setting and to identify research challenges and opportunities.

Wage bargaining under the new European Economic Governance Guy Van Gyes ,Thorsten

Schulten,2015-09-28 Within the framework of the new European economic governance, neoliberal views on wages have further increased in prominence and have steered various reforms of collective bargaining rules and practices. As the crisis in Europe came to be largely interpreted as a crisis of competitiveness, wages were seen as the core adjustment variable for 'internal devaluation', the claim being that competitiveness could be restored through a reduction of labour costs. This book proposes an alternative view according to which wage developments need to be strengthened through a Europe-wide coordinated reconstruction of collective bargaining as a precondition for more sustainable and more inclusive growth in

Europe. It contains major research findings from the CAWIE2 – Collectively Agreed Wages in Europe – project, conducted in 2014–2015 for the purpose of discussing and debating the currently dominant policy perspectives on collectively-bargained wage systems under the new European economic governance.

Legions of Rome Stephen Dando-Collins, 2013-09-03
No book on Roman history has attempted to do what Stephen Dando-Collins does in *Legions of Rome*: to provide a complete history of every Imperial Roman legion and what it achieved as a fighting force. The author has spent the last thirty years collecting every scrap of available evidence from numerous sources: stone and bronze inscriptions, coins, papyrus and literary accounts in a remarkable feat of historical detective work. The book is divided into three parts: Part 1 provides a detailed account of what the legionaries wore and ate, what camp life was like, what they were paid and how they were motivated and punished. The section also contains numerous personal histories of individual soldiers. Part 2 offers brief unit histories of all the legions that served Rome for 300 years from 30BC. Part 3 is a sweeping chronological survey of the campaigns in which the armies were involved, told from the point of view of particular legions. Lavish, authoritative and

beautifully produced, Legions of Rome will appeal to ancient history enthusiasts and military history buffs alike.

Management of River Basins and Dams M.J.

Tumbare,2021-04-30 The Zambezi river basin is the fourth largest river basin in Africa and drains a total of some 1350.000 square km. The basin drains eight countries: Angola, Botswana, Malawi, Mozambique, Namibia, Tanzania, Zambia and Zimbabwe. The river flows over the famous Victoria Falls into the third largest artificial lake in the world: Lake Kariba. The Zambezi Basin is rich in natural resources and has a large hydro-power potential. This volume contains 37 papers which have been published in international journals, or presented at international conferences by the Zambezi River Authority staff. The topics covered include: Dam Safety, Rehabilitation and Maintenance, Environment and Health, Hydrology, Limnology, Information Systems, Water Resource Management, Hydropower Development and Socio-Economic Issues.
