Regional Economic Outlook, October 2015 International Monetary

Fund,2015-10-27 Growth in sub-Saharan Africa has weakened after more than a decade of solid growth, although this overall outlook masks considerable variation across the region. Some countries have been negatively affected by falling prices of their main commodity exports. Oil-exporting countries, including Nigeria and Angola, have been hit hard by falling revenues and the resulting fiscal adjustments, while middle-income countries such as Ghana, South Africa, and Zambia are also facing unfavorable conditions. This October 2015 report discusses the fiscal and monetary policy adjustments necessary for these countries to adapt to the new environment. Chapter 2 looks at competitiveness in the region, analyzing the substantial trade integration that accompanied the recent period of high growth, and policy actions to nurture new sources of growth. Chapter 3 looks at the implications for the region of persistently high income and gender inequality and ways to reduce them.

Back to the future of Socialism Hain, Peter, 2015-01-26 What's gone wrong with capitalism and how should governments respond? Did Big Government or Big Banking cause the global financial crisis? Is the answer austerity or investment in growth; untrammelled market forces or regulating for the common good? Anthony Crosland's *The Future of Socialism* (1956) provided a creed for governments of the centre left until the global banking crisis. Now Peter Hain, with over 50 years' experience in politics, revisits this classic text and presents a stimulating political prospectus for today. Hain argues that capitalism is now more financially unstable and unfair, productive but prone to paralysis, dynamic but discriminatory. A rousing alternative to the neoliberal, right-wing orthodoxy of our era, Hain's new book should be read by everyone interested in the future of the left.

Exploring New Roles for Librarians Lisa Federer, 2014-03-01 Librarians have been providing support to researchers for many years, typically with a focus

on responding to researchers' needs for access to the existing literature. However, librarians' skills and expertise make them uniquely suited to provide a wide range of assistance to researchers across the entire research process, from conception of the research question to archiving of collected data at the project's conclusion. In response to increasingly stringent demands on researchers to share their data, and as computationally intensive and primarily data-driven scientific methods begin to take the place of traditional lab-based research, the "research informationist" has emerged as a new information profession. With a background in library and information sciences, as well as expertise in best practices for data management, grant funder policies, and informatics tools, the research informationist is capable of implementing a full suite of research support services. This book will discuss how the research informationist role has developed out of the previously established clinical informationist model and how it expands on the model of embedded librarianship. The book will also examine core competencies for the successful research informationist and the training and preparation necessary for students in library and information sciences programs, as well as currently practicing librarians. Finally, this book will consider how research informationists can form collaborative partnerships with research teams and build their services outside the walls of the library, citing practical examples of the types of support research informationists can offer.

Tourism and Resilience Susan L Slocum,Carol Kline,2017-06-09 This is the first book to address the concept of resilience and its specific application and relevance to tourism, in particular tourism destinations. Resilience relates to the ability of organisms, communities, ecosystems and populations to withstand the impacts of external forces while retaining their integrity and ability to continue functioning. It is particularly applicable to tourism destinations and attractions which are exposed to the potentially harmful and sometimes severe effects of tourism development and visitation, but which also can experience increased resilience from the economic benefits of tourism. Tourism and Resilience is relevant for researchers, students and practitioners in tourism and related fields such as development studies, geography, sociology, anthropology, economics and business/management. Phenomena such as destination communities, wildlife populations and ecosystems are discussed, as well as the ability of places and communities to use tourism and its infrastructure to recover from disasters such as tsunamis, earthquakes, unrest and disease.

Divided We Fall Sheri Rivlin,Alice M. Rivlin,Allan Rivlin,2022-10-04 Partisan warfare and gridlock in Washington threaten to squander America's opportunity to show the world that democracy can solve serious economic problems and ensure widely shared prosperity. Instead of working together to meet the challenges ahead—an aging work force, exploding inequality, climate change, rising debt—our elected leaders are sabotaging our economic future by

blaming and demonizing each other in hopes of winning big in the next election. They are weakening America's capacity for world leadership and the case for democracy here and abroad. Alice M. Rivlin, with decades of experience in economic policy making, argues that proven economic policies could lead to sustainable American prosperity and opportunity for all, but crafting them requires the tough, time-consuming work of consensus building and bipartisan negotiation. In a divided country with shifting majorities, major policies must have bipartisan buy-in and broad public support. Otherwise we will have either destabilizing swings in policy or total gridlock in the face of challenges looming at us. Rivlin believes that Americans can and must save our hyper-partisan politicians from themselves. She makes the case that on many practical economic issues the public is far less divided than partisan politicians and sensationalist media would have us believe. She draws attention to numerous hopeful efforts to bridge partisan and ideological divides in Washington, in state capitols and city governments, and communities around the country, and advocates a major national effort to enable citizens and future leaders to learn and practice the art of listening to each other and working together to find common ground. This book is a practical guide for Americans across the political spectrum who are agonizing over partisan warfare, incivility, and policy gridlock and looking for ways they can help to get our democratic policy process back on a constructive track before it is too late.

Rethinking Capitalism Michael Jacobs, Mariana Mazzucato, 2016-07-21 Thought provoking and fresh - this book challenges how we think about economics." Gillian Tett, Financial Times For further information about recent publicity events and media coverage for Rethinking Capitalism please visit <http://marianamazzucato.com/rethinking-capitalism/> Western capitalism is in crisis. For decades investment has been falling, living standards have stagnated or declined, and inequality has risen dramatically. Economic policy has neither reformed the financial system nor restored stable growth. Climate change meanwhile poses increasing risks to future prosperity. In this book some of the world's leading economists propose new ways of thinking about capitalism. In clear and compelling prose, each chapter shows how today's deep economic problems reflect the inadequacies of orthodox economic theory and the failure of policies informed by it. The chapters examine a range of contemporary economic issues, including fiscal and monetary policy, financial markets and business behaviour, inequality and privatisation, and innovation and environmental change. The authors set out alternative economic approaches which better explain how capitalism works, why it often doesn't, and how it can be made more innovative, inclusive and sustainable. Outlining a series of far-reaching policy reforms, Rethinking Capitalism offers a powerful challenge to mainstream economic debate, and new ideas to transform it.

OECD Employment Outlook 2021 Navigating the COVID-19 Crisis and Recovery OECD, 2021-07-07 The 2021 edition of the OECD Employment Outlook focusses on

the labour market implications of the COVID-19 crisis. Chapters 1-3 concentrate on the main labour market and social challenges brought about by the crisis and the policies to address them.

SME Competitiveness Outlook 2021 International Trade Centre, 2021-06-21 The SME Competitiveness Outlook 2021 analyses how small businesses can rebuild from the COVID-19 (coronavirus) pandemic so they are better prepared to face the looming crisis of climate change. It provides a 20-point Green Recovery Plan to foster competitive, resilient and environmentally sustainable small and medium-sized enterprises (SMEs). The report finds that firms owned by women and young people were hurt more by the pandemic and are more vulnerable to future shocks, such those brought by a changing climate. It shows how business support organizations, governments, lead firms in value chains and international organizations can enable SMEs to strengthen competitiveness, build resilience to climate hazards, and contribute to safeguarding the planet.

Economic Development in Africa Report 2016 United Nations Conference on Trade and Development (UNCTAD), 2016-07-21 Africa has major development aspirations in the broader context of a global and continental economic development agenda. This calls for substantial financial resources at a time when the global development finance landscape is changing, from a model centred on official development assistance and the coverage of remaining financing needs through external debt, to a framework with greater emphasis

on the mobilization of domestic resources. The Economic Development in Africa Report 2016 examines some of the key policy issues that underlie Africa's domestic and external debt, and provides policy guidance on the delicate balance required between financing development alternatives and overall debt sustainability. This report analyses Africa's international debt exposure and how domestic debt is increasingly playing a role in some African countries as a development finance option, and also examines complementary financing options and how they relate to debt.
