**Empire Building Mark Crinson, 2013-10-11** The colonial architecture of the nineteenth century has much to tell us of the history of colonialism and cultural exchange. Yet, these buildings can be read in many ways. Do they stand as witnesses to the rapacity and self-delusion of empire? Are they monuments to a world of lost glory and forgotten convictions? Do they reveal battles won by indigenous cultures and styles? Or do they simply represent an architectural style made absurdly incongruous in relocation? Empire Building is a study of how and why Western architecture was exported to the Middle East and how Islamic and Byzantine architectural ideas and styles impacted on the West. The book explores how far racial theory and political

and religious agendas guided British architects (and how such ideas were resisted when applied), and how Eastern ideas came to influence the West, through writers such as Ruskin and buildings such as the Crystal Palace. Beautifully written and lavishly illustrated, *Empire Building* takes the reader on an extraordinary postcolonial journey, backwards and forwards, into the heart and to the edge of empire.

*African Navies* Timothy Stapleton,2022-11-11 This edited volume focuses on aspects of the understudied theme of African sea-power, including African navies and the engagement of non-African navies with the continent. Africa possesses 48,000 kilometers of coastline, comprising 38 out of 54 of the continent's states and several strategic choke points for international shipping, such as the Suez Canal, the Gulf of Aden and the Cape of Good Hope. Nevertheless, post-colonial Africa's small navies and their relations with the navies of external powers have not received much scholarly attention. Focusing on Sub-Saharan Africa, this collection attempts to address this neglect and stimulate further research by offering original chapters related to historical and contemporary themes around Africa's navies. The historical chapters cover the origin of the Tanzanian, Ethiopian, Nigerian and Ghana navies during the era of decolonization and the Cold War, the asymmetrical naval campaign fought during the Nigerian Civil War (1967-70), and the activities of the Soviet Navy in supporting African states and movements fighting lingering colonialism and white supremacy during the 1970s and 1980s. Focusing on the contemporary situation, other chapters discuss the engagement of the Indian Navy with Africa, the potential role of the Angolan and Mozambican navies in the Southern African Development Community (SADC), the transformation and development of the post-apartheid South African Navy, and the challenges and capabilities of African navies in the early twenty-first century. The book concludes by discussing the question of whether African coastal countries need navies. This book will be of much interest to students of naval power, strategic studies, African politics and International Relations. Chapters 1, 2, 6 and 8 of this book are available for free in Open Access at [www.taylorfrancis.com](http://www.taylorfrancis.com). **Imhotep Today** Jean-Marcel Humbert,Clifford Price,2016-06-16 This book presents and analyses the results of the use and adaptation of ancient Egyptian architecture in modern times. It traces the use of ancient Egyptian motifs and constructions across the world, from Australia, the Americas and Southern Africa to Western Europe. It also inquires into the cultural, economic and social contexts of this practice. Imhotep Today is exceptional not only in its global coverage, but in its analyses of thorny questions such as: what was it about Ancient Egypt that inspired such Egyptianizing monuments, and was it just one idea, or several different ones which formed the basis of such activities? The book also asks why only certain images, such as obelisks and sphinxes, were incorporated within the movement. The contributors explore how these 'monuments' fitted into the local architecture of the time and, in this context, they investigate whether 'Egyptianizing architecture' is an ongoing movement and, if so, how it differs from earlier, similar activities.

*Problems of Canonicity and Identity Formation in Ancient Egypt and Mesopotamia* Gojko Barjamovic,Kim Ryholt,2016-04-24 The term 'canonicity' implies the recognition that the domain of literature and of the library is also a cultural and political one, related to various forms of identity formation, maintenance, and change. Scribes and benefactors 'create' canon in as much as they teach, analyze, preserve, promulgate and change 'canonical' texts according to prevailing norms. From early on, texts from the written traditions of ancient Mesopotamia and Egypt were accumulated, codified, and to some extent canonized, as various collections developed mainly in the environment of the temple and the palace. These written traditions represent sets of formal and informal cultures that all speak in their own ways of canonicity, normativity, and other forms of cultural expertise. Some forms of literature were used not only in scholarly contexts, but also in political ones, and they served purposes of identity formation. This volume addresses the interrelations between various forms of 'canon' and identity formation in different time periods, genres, regions, and contexts, as well as the application of contemporary conceptions of 'canon' to ancient texts.

**Ancient Egyptian Warfare** Ian Shaw,2019-12-17 A concise introduction to the military history of Ancient Egypt, from battle tactics to weaponry and more. The excellent preservation of Egyptian artifacts—including bows, axes, and chariots—means that it is possible to track the changing nature of Egyptian military technology from the Neolithic period up to the Iron Age, and identify equipment and ideas adopted from other civilizations of the Eastern Mediterranean and Near East. From the editor of The Oxford History of Ancient Egypt, this informative volume, which includes an index, covers crucial issues such as military strategy, martial ideology, the construction of fortresses, and the waging of siege warfare; as well as the practical questions of life, death, and survival that confront individual soldiers on the battlefield.

**Imperialism** Hannah Arendt,1968-03-20 In the second volume of The Origins of Totalitarianism, the political theorist traces the decline of European colonialism and the outbreak of WWI. Since it was first published in 1951, The Origins of Totalitarianism has been recognized as the definitive philosophical account of the totalitarian mindset. A probing analysis of Nazism, Stalinism, and the "banality of evil", it remains one of the most referenced works in studies and discussions of totalitarian movements around the world. In this second volume, Imperialism, Dr. Hannah Arendt examines the cruel epoch of declining European colonial imperialism from 1884 to the outbreak of the First World War. Through portraits of Disraeli, Cecil Rhodes, Gobineau, Proust, and T.E. Lawrence, Arendt illustrates how this era ended with the decline of the nation-state and the disintegration of Europe's class society. These two events, Arendt argues, generated totalitarianism, which in turn produced the Holocaust. "The most original and profound—therefore the most valuable—political theorist of our times."—Dwight MacDonald, The New Leader
