The Great Turning David C. Korten,2009-02-20 Although the issues addressed in The Great Turning are global and universal, I have chosen to focus my analysis on the United States. It is the nation among all others that is most challenged by the imperatives of the Great Turning. Few other nations are so accustomed to living beyond their own means, so imbued with a sense of special virtue and entitlement, or so burdened by a political leadership as out of touch with global reality and as incapable of accepting responsibility for the consequences of its actions. Because of its global presence, whether the United States responds to the imperatives with the logic of Empire or the logic of Earth Community is likely to have far-reaching consequences for all nations. Furthermore, the United States is the nation of my birth, the nation I know best and love most, and the nation for whose role in the world I feel most responsible.

Japan's Empire of Birds Annika A. Culver,2022-03-24 As a transnational history of science, Japan's Empire of Birds: Aristocrats, Anglo-Americans, and Transwar Ornithology focuses on the political aspects of highly mobile Japanese explorer-scientists, or cosmopolitan gentlemen of science, circulating between Japanese and British/American spaces in the transwar period from the 1920s to 1950s. Annika A. Culver examines a network of zoologists united by their practice of ornithology and aristocratic status. She goes on to explore issues of masculinity and race related to this amidst the backdrop of imperial Japan's interwar period of peaceful internationalism, the rise of fascism, the Japanese takeover of Manchuria, and war in China and the Pacific. Culver concludes by investigating how these scientists repurposed their aims during Japan's Allied Occupation and the Cold War. Inspired by geographer Doreen Massey, themes covered in the volume include social space and place in these specific locations and how identities transform to garner social capital and scientific credibility in transnational associations and travel for non-white scientists.
