Game Feel Steve Swink, 2008-10-13 Game Feel exposes feel as a hidden language in game design that no one has fully articulated yet. The language could be compared to the building blocks of music (time signatures, chord progressions, verse) - no matter the instruments, style or time period - these building blocks come into play. Feel and sensation are similar building blocks when

Pitch Perfect: a Theory and Practice of Choral Intonation Donald Brinegar, 2019-10-13 Here is what the experts are saying: Donald Brinegar's deeply scholarly, highly original Pitch Perfect is the result of his life-long study and practice of choral tuning. His decades of workshops on this topic have become legendary and his book details numerous areas of theoretical and practical means that form the basis of his approach, including various tuning systems, scales and modes, tetrachords and the medieval hexachordal system, acoustics, text study, rehearsal techniques and many others, all carefully organized through a system of nested hierarchies grouping related topics. Brinegar then applies his theories to a number of specific compositions from the Renaissance to the present day. Pitch Perfect is an essential book for the library of all choral conductors, written by an esteemed choral master. -- Dr. Morten Lauridsen, Composer, University Professor, USC, National Medal of Arts Recipient, 2007. Pitch Perfect brilliantly combines two of Don Brinegar's lifelong loves - teaching and the

art of comprehensive score preparation. He connects a wide variety of important technical data, puts it in his teacher centrifuge, and the result is a unique and fresh new perspective on musical nature, with practical application to conducting, score analysis, and performance. Serious emerging and seasoned conductors need a copy of this book! Dr. Z. Randall Stroope, Composer and University Professor

My musical life changed when I discovered that the major third my tenors were singing at the final cadence of a Renaissance motet WERE in tune, but it was in tune to a different tuning system than the tempered piano. THANK YOU maestro Brinegar for sharing your tuning system with me more than twenty years ago and codifying it in Pitch Perfect. The tuning system outlined in this new book (with historical musical examples from major composers) is cellular, functional, historical, lunar, mathematical, musical, natural, over-tonal, partial, philosophical, practical, scientific, solar, spiritual, tetra-chordal, under-tonal, hexa-chordal, and visual. Vocal colors emerge from a natural system of balancing and tuning chords. Functional and helpful conducting gestures suggest themselves from an understanding of the tuning hierarchy. Sharing this tuning system with my singers enabled them to sing more beautifully, more balanced, more resonant, and more expressive than ever before, and has influenced all of my compositions. Pitch Perfect WORKS! Dr. Ronald Kean, Composer and Professor Emeritus.

Don is a master teacher. Over the years many of us have been greatly influenced by his work through his choirs, his choral

adjudications, and in his classroom. In this book, Don eloquently and systematically explains his principles and foundations for improved intonation through his words and numerous musical examples. This book is a compilation of his lifetime journey of listening, learning, reflecting, and teaching--as if you were sitting in his classroom or speaking to you personally. Dr. J. Edmund Hughes, University Professor of Choral Studies. I have been singing out of tune with nature. This one idea made me want to dig deeper into this book and not put it down. As a choral singer and a conductor, this book is changing how I hear, how I rehearse, and how I sing. What a journey! Thank you, Don, for sharing your knowledge and your life-long love of choral beauty. Jenny Tisi, Choral Director and Vocalist. A big thank you to Donald Brinegar for this magnificent gift to the music community. The intellectual rigor of addressing this comprehensive subject is astounding. Professor Sigrid Johnson, Renowned Choral Conductor. Coming Soon!!! The Teacher's Companion to Pitch Perfect A Theory and Practice of Choral Intonation gives step by step lesson plans for the implementation of Pitch Perfect. Lesson plans include material for: Theory classes, Choral Seminars, Choral Rehearsals, Master Classes, and Conference Presentations

The Selected Poems of Li Po Bai Li, 1996 There is a set-phrase in Chinese referring to the phenomenon of Li Po: Winds of the immortals, bones of the Tao. He moved through this world with an unearthly freedom from attachment, and at the same time belonged profoundly to the earth and its process of change. However ethereal in spirit, his poems remain grounded in the everyday experience we all share. He wrote 1200 years ago, half a world away, but in his poems we see our world transformed. Legendary friends in eighth-century T'ang China, Li Po and Tu Fu are traditionally celebrated as the two greatest poets in the Chinese canon. David Hinton's translation of Li Po's poems is no less an achievement than his critically acclaimed The Selected Poems of Tu Fu, also published by New Directions. By reflecting the ambiguity and density of the original, Hinton continues to create compelling English poems that alter our conception of Chinese poetry.

Picasso and the War Years, 1937-1945 Steven A. Nash, 2003-03 This absorbing book draws upon new research and works that, in some cases were held out of public view in Picasso's own collection, to explore the critically important-but still under-studied--period of his life from the Spanish Civil War through World War II and the Nazi occupation of France. This span of years is marked by some of the most intensely personal and expressive work of his career. The subjects he painted changed dramatically in direct response first to the horrors of war and then the dangers and privations of life in occupied Paris, where, though branded a degenerate artist by the Nazis, he chose to remain until the Liberation.

Game Usability Katherine Isbister, Noah Schaffer, 2008-08-12 Computers used to be for geeks. And geeks were fine with dealing with a difficult and finicky interface--they liked this--it was even a sort of badge of honor (e.g. the Unix geeks). But making the interface really intuitive and useful--think about the first Macintosh computers--took computers far far beyond the geek crowd. The Mac made HCI (human c

As the most comprehensive compilation of American homophones (words that sound alike) and homographs (look-alikes), this latest edition serves well where even the most modern spell-checkers and word processors fail--although rain, reign, and rein may be spelled correctly, the context in which these words may appropriately be used is not obvious to a computer.
