Cash Flow and Corporate Finance in Victorian Britain
T. J. Baldwin,2000 This monograph presents a methodology based on the concept of cash flow and produces, in tabular form, annual cash flow statements for a sample population of twenty companies in coal, iron and steel from their respective formation dates to 1914. For the benefit of the non-accountant, a detailed example showing the means by which these figures are derived is included, together with an analysis of the development of the financial reporting process through the second half of the nineteenth century. The book adds a new dimension to the analysis of corporate performance over a long period and offers a valuable database which will facilitate further research. It is an unusual and useful collaboration between accounting historians and economic historians.

Proceedings of the Fourteenth International
Conference on Management Science and Engineering
Management Jiuping Xu,Gheorghe Duca,Syed Ejaz
Ahmed,Fausto Pedro García Márquez,Asaf

Hajiyev,2020-06-22 This book gathers the proceedings of the 14th International Conference on Management Science and Engineering Management (ICMSEM 2020). Held at the Academy of Studies of Moldova from July 30 to August 2, 2020, the conference provided a platform for researchers and practitioners in the field to share their ideas and experiences. Covering a wide range of topics, including hot management issues in engineering science, the book presents novel ideas and the latest research advances in the area of management science and engineering management. It includes both theoretical and practical studies of management science applied in computing methodology, highlighting advanced management concepts, and computing technologies for decision-making problems involving large, uncertain and unstructured data. The book also describes the changes and challenges relating to decision-making procedures at the dawn of the big data era, and discusses new technologies for analysis, capture, search, sharing, storage, transfer and visualization, and in the context of privacy violations, as well as advances in the integration of optimization, statistics and data mining. Given its scope, it will appeal to a wide readership, particularly those looking for new ideas and research directions.
