Thinking Chinese Translation Valerie Pellatt, Eric T. Liu, 2010-06-10 Thinking Chinese Translation is a practical and comprehensive course for advanced undergraduates and postgraduate students of Chinese. Thinking Chinese Translation explores the ways in which memory, general knowledge, and creativity (summed up as ‘schema’) contribute to the linguistic ability necessary to create a good translation. The course develops the reader’s ability to think deeply about the texts and to produce natural and accurate translations from Chinese into English. A wealth of relevant illustrative material is presented, taking the reader through a number of different genres and text types of increasing complexity including: technical, scientific and legal texts journalistic and informative texts literary and dramatic texts. Each chapter provides a discussion of the issues of a particular text type based on up-to-date scholarship, followed by practical translation exercises. The chapters can be read independently as research material, or in combination with the exercises. The issues discussed range from the fine detail of the text, such as punctuation, to the broader context of editing, packaging and publishing translations. Major aspects of teaching and learning translation, such as collaboration, are also covered. Thinking Chinese Translation is essential reading for advanced undergraduate and postgraduate students of Chinese and translation studies. The book will also appeal to a wide range of language students and tutors through the general discussion of the principles and purpose of translation.

English-Chinese Translation as Conquest and Resistance in the Late Qing 1811-1911 Xiaojia Huang, 2019-05-11 This book examines how translation facilitated the Western conquest of China and how it was in turn employed by the Chinese as a weapon to resist the invasion in the late Qing 1811-1911. It brings out the question on the role of translation as part of the Western conquest of Late Qing China, with special attention drawn to the deceptions and manipulations in the translation of the Sino-foreign unequal treaties signed during 1840-1911. The readers will benefit from the assertion that translation did not remain innocent, but rather became intermingled with power abuses in the Chinese milieu as well.

A Century of Chinese Literature in Translation (1919-2019) Leah Gerber, Lintao Qi, 2020-09-23 This book delves into the Chinese literary translation landscape over the last century, spanning critical historical periods such as the Cultural Revolution in the greater China region. Contributors from all around the world approach this theme from various angles, providing an overview of translation phenomena at key historical moments, identifying the trends of translation and publication, uncovering the translation history of important works, elucidating the relationship between translators and other agents, articulating the interaction between texts and readers and disclosing the nature of literary migration from Chinese into English. This volume aims at benefiting both academics of translation studies from a dominantly Anglophone culture and researchers in the greater China region. Chinese scholars of translation studies will not only be able to cite this as a reference book, but will be able to discover contrasts, confluence and communication between academics across the globe, which will stimulate, inspire and transform discussions in this field.

Flipping the Translation in Popular Science Dr. Pei-Shu Tsai, 2016-10-29 Summary Flipping the Translation in Popular Science is a collection of Dr. Tsai’s research and teaching experiences over the years as an instructor of courses on popular science and translation, and on translation practice in both directions between Chinese and English. The research material covers the latest science articles published through 2014-2016, providing translation examples with updates of technological development and new information on scientific matters. The book looks into common errors made by translation students, categorizes the reasons for such analysis error, and offers practical solutions and principles for translators to practice translation on scientific subjects. Key Features The author of the book has both a linguistics and a neuroscience background, providing a cross-disciplinary perspective to the discipline of translation. The participants in the study are graduate students of a translation and interpreting program, thus the discussion in the book avoids basic grammar and spelling errors that beginning learners of English would make. Data provided in this study are specific to translation as an academic research subject, not translation as a medium in English teaching. The book provides real-life translation examples from two directions, from English to Chinese, and from Chinese to English. Information about the Author Dr. Pei-Shu Tsai is an Assistant Professor in the Graduate Institute of Translation and Interpretation, National Changhua University of Education, Taiwan. She received a MA in linguistics at National Taiwan University and obtained training in cognitive neuroscience for her PhD study at National Yang-Ming University. Her research interests cover linguistics, cognitive neuroscience, psycholinguistics, and first/second-language acquisition, with a focus on semantics and ambiguity at lexical, sentential, pragmatic, and cultural levels. Lost in Translation Yang Wen,2016-08-17 Steer away from awkward, embarrassing Chinese-English translation, word by word, expression by expression, and situation by situation, with this handy guidebook. Whether you're making a presentation, trying to write a resume that will stand out, preparing for an interview or simply trying to make small talk, you'll learn how Chinese and English are similar and different and how to smoothly move from one language to the other. For instance, automatically translates: I want noodles. Subject-verb-object — everything is in the matching order, a dream situation for a linguist. Some rules, however, are so Chinese that no English equivalents can be found, such as those ever present four-word phrases, figurative expressions, and many more. In most cases, mirror imaging these styles in English translation will only confuse people. This guidebook also explores how to choose between following Chinese rules, which will convey every element but sound awkward, and following English rules, which may flow smoothly but not translate everything. Find the right words for the right time — and put them in the right place — and prevent your message from being lost in translation.

Lao She's Teahouse and Its Two English Translations Bo Wang,Yuanyi Ma,2020-04-17 Lao She's Teahouse and Its Two English Translations: Exploring Chinese Drama Translation with Systemic Functional Linguistics provides an in-depth application of Systemic Functional Linguistics (SFL) to the study of Chinese drama translation, and theoretically explores the interface between SFL and drama translation. Investigating two English translations of the Chinese drama, Teahouse (茶馆 Cha Guan in Chinese) by Lao She, and translated by John Howard-Gibbon and Ying Ruocheng respectively, Bo Wang and Yuanyi Ma apply Systemic Functional Linguistics to point out the choices that translators have to make in translation. This book is of interest to graduates and researchers of Chinese translation and discourse studies.

Hacking Chinese Olle Linge,2016-03-26 Learning Chinese can be frustrating and difficult, partly because it's very different from European languages. Following a teacher, textbook or language course is not enough. They show you the characters, words and grammar you need to become proficient in Chinese, but they don't teach you how to learn them! Regardless of what program you're in (if any), you need to take responsibility for your own learning. If you don't, you will miss many important things that aren't included in the course you're taking. If you study on your own, you need to be even more aware of what you need to do, what you're doing at the moment and the difference between them. Here are some of the questions I have asked and have since been asked many times by students: How do I learn characters efficiently? How do I get the most out of my course or teacher? Which are the best learning tools and resources? How can I become fluent in Mandarin? How can I improve my pronunciation? How do I learn successfully on my own? How can I motivate myself to study more? How can I fit learning Chinese into a busy schedule? The answers I've found to these questions and many others form the core of this book. It took eight years of learning, researching, teaching and writing to figure these things out. Not everybody has the time to do that! I can't go back in time and help myself learn in a better way, but I can help you! This book is meant for normal students and independent language learners alike. While it covers all major areas of learning, you won't learn Chinese just by reading this book. It's like when someone on TV teaches you how to cook: you won't get to eat the delicious dish just by watching the program; you have to do the cooking yourself. That's true for this book as well. When you apply what you learn, it will boost your learning, making every hour you spend count for more, but you still have to do the learning yourself. This is what a few readers have said about the book: The book had me nodding at a heap of things I'd learnt the hard way, wishing I knew them when I started, as well as highlighting areas that I'm currently missing in my study. - Geoff van der Meer, VP engineering This publication is like a bible for anyone serious about Chinese proficiency. It's easy for anyone to read and written with scientific precision. - Zachary Danz, foreign teacher, children's theatre artist About me I started learning Chinese when I was 23 (that's more than eight years ago now) and have since studied in many different situations, including serious immersion programs abroad, high-intensity programs in Sweden, online courses, as well as on the side while working or studying other things. I have also successfully used my Chinese in a graduate program for teaching Chinese as a second language, taught entirely in Chinese mostly for native speakers (the Graduate Institute for Teaching Chinese as a Second Language at National Taiwan Normal University). All these parts have contributed to my website, Hacking Chinese, where I write regularly about how to learn Mandarin.

The Role of Henri Borel in Chinese Translation History Audrey Heijns,2020-12-29 Against the historical background of Chinese translation in the West and the emergence of several prominent European translators of China, this book examines the role of a translator in terms of cross-cultural communication, the image of the foreign culture in the minds of the target audience, and the influence of their translations on the target culture. With the focus on the career and output of the Dutch translator Henri Borel (1869-1933), this study investigates different aspects of the role of translator. The investigation is carried out by analysing texts and probing the achievements and contributions of the translator, underpinned by documents from the National Archives and the Literature Museum in the Hague, the Netherlands. Based on the findings derived from this study, advice is offered to those now involved in the promotion and translation of Chinese culture and literature. It will make an important contribution to the burgeoning history of Chinese translation. This book will be of interest to anyone with an interest or background in the translation history of China, the history of sinology in the West, and the role of translators.

Translating Chinese Culture Valerie Pellatt,Eric T. Liu,Yalta Ya-Yun Chen,2014-04-16 Translating Chinese Culture is an innovative and comprehensive coursebook which addresses the issue of translating concepts of culture. Based on the framework of schema building, the course offers helpful guidance on how to get inside the mind of the Chinese author, how to understand what he or she is telling the Chinese-speaking audience, and how to convey this to an English speaking audience. A wide range of authentic texts relating to different aspects of Chinese culture and aesthetics are presented throughout, followed by close reading discussions of how these practices are executed and how the aesthetics are perceived among Chinese artists, writers and readers. Also taken into consideration are the mode, audience and destination of the texts. Ideas are applied from linguistics and translation studies and each discussion is reinforced with a wide variety of practical and engaging exercises. Thought-provoking yet highly accessible, Translating Chinese Culture will be essential reading for advanced undergraduates and postgraduate students of Translation and Chinese Studies. It will also appeal to a wide range of language studies and tutors through its stimulating discussion of the principles and purposes of translation.

Chinese Translation Studies in the 21st Century Roberto A. Valdeon,2018-11-09 Chinese Translation Studies in the 21st Century, which presents a selection of some of the best articles published in the journal Perspectives in a five-year period (2012-2017), highlights the vitality of Translation Studies as a profession and as a field of enquiry in China. As the country has gradually opened up to the West, translation academic programmes have burgeoned to cater for the needs of Chinese corporations and political institutions. The book is divided into four sections, in which authors explore theoretical and conceptual issues (such as the connection between translation and adaptation, multimodality, and the nature of norms), audiovisual translation (including studies on news translation and the translation of children's movies), bibliographies and bibliometrics (to assess, for example, the international visibility of Chinese scholars), and interpreting (analyzing pauses in simultaneous interpreting and sign language among other aspects). The book brings together well-established authors and younger scholars from universities in mainland China, Hong Kong, Macao and Taiwan. The chapters in this book were originally published in various issues of Perspectives: Studies in

Terminology Translation in Chinese Contexts Saihong Li,William Hope,2021-02-22 Terminology Translation in Chinese Contexts: Theory and Practice investigates the theory and practice of terminology translation, terminology management, and scholarship within the distinctive milieu of Chinese and explores the complex relationship between terminology translation (micro level) and terminology management (macro level). This book outlines the contemporary challenges of terminology translation and terminology management within Chinese contexts in specialized fields including law, the arts, religion, Chinese medicine, and food products. The volume also examines how the development and application of new technologies such as big data, cloud computing, and artificial intelligence have brought about major changes in the language service industry. Technology such as machine translation and computer-assisted translation has spawned new challenges in terminology management practices and has facilitated their evolution in contexts of ever greater internationalization and globalization. This book recontextualizes terminology translation and terminology management with a special focus on English–Chinese translation. It is hoped that the volume will enable and enhance dialogue between Chinese and Western scholars and professionals in the field. All chapters have been written by specialists in the different subfields and have been peer-reviewed by the editors.

On Translation Di JIN,Eugene Albert NIDA,2006-03-01 Following the theoretical framework Nida had developed over decades of work on translation and semiotics, the two authors offer an easily comprehensible analysis of the complex problems involved in translation. After a critical review of the historical development of translation theory in the light of modern information theory, they elucidate the most fundamental principles of translation in accordance with the concept of dynamic equivalence. The treatment is closely related to actual translation practice, and the principles elucidated are applicable to all types of translation, though most of the examples analyzed are taken from translations between Chinese and English. This new and expanded edition has two main parts. Part I is the complete text of the original work as published in the early 1980s. Part II consists of six of Professor Jin’s more recent essays, which provide further insights into the principle of equivalent effect and its applications in literary translation. Particular attention is paid to practical procedures and the extremely complex relationship between creative translation and real fidelity. Published by City University of Hong Kong Press. 香港城市大学出版社
