Performer Training and Technology Maria Kapsali, 2020-10-05 Performer Training and Technology employs philosophical approaches to technology, including postphenomenology and Heidegger's thinking, to examine the way technology manifests, influences and becomes used in performer training discourse and practice. The book offers in-depth discussions of present and past performer training practices through a lens that has never been applied before; considers the employment of key digital artefacts; and develops a series of analytical tools that can be useful in scholarly and practical explorations. An array of intriguing subjects are covered including the role of electric lights in Stanislavsky's work on concentration; the use of handheld tools, such as sticks in Zarrilli's psychophysical training and Meyerhold's Biomechanics; the emergence of new forms of training in relation to motion capture technology; and the way the mobile phone complicates notions and

practices of attention in learning and training contexts. This book is of vital relevance to performer training scholars and practitioners; theatre, performance, and dance scholars and students; and especially those interested in philosophies of technology.

**Theatre Pedagogy in the Era of Climate Crisis Conrad Alexandrowicz,David Fancy,2021-05-03** This

volume explores whether theatre pedagogy can and should be transformed in response to the global climate crisis. Conrad Alexandrowicz and David Fancy present an innovative re-imagining of the ways in which the art of theatre, and the pedagogical apparatus that feeds and supports it, might contribute

to global efforts in climate protest and action. Comprised of contributions from a broad range of scholars and practitioners, the volume explores whether an adherence to aesthetic values can be preserved when art is instrumentalized as protest and considers theatre as a tool to be employed by the School Strike for Climate movement. Considering perspectives from areas including performance, directing, production, design, theory and history, this book will prompt vital discussions which could transform curricular design and implementation in the light of the climate crisis. Theatre Pedagogy in the Era of Climate Crisis will be of great interest to students, scholars and practitioners of climate change and theatre and performance studies.

**Performer Training Reconfigured** Frank Camilleri, 2019-01-24 Offering a radical re-evaluation of current approaches to performer training, this is a text that equips readers with a set of new ways of thinking about and ultimately 'doing' training. Stemming from his extensive practice and incorporating a review of prevailing methods and theories, Frank Camilleri focuses on how material circumstances shape and affect processes of training, devising, rehearsing and performing. Frank Camilleri puts forward the 'post-psychophysical' as a more extended form of psychophysical discussion and practice

that emerged and dominated in the 20th century. The 'post-psychophysical' updates the concept of an integrated bodymind in various ways, such as the notion of a performer's bodyworld that incorporates technology and the material world. Offering invaluable introductions to a wide range of theories around which the book is structured – including postphenomenological, sociomaterial, affect and situated cognition – this volume provides readers with an enticing array of critical approaches to training and creative processes.

**Contemporary Practice in Studio Art Therapy** Christopher Brown, Helen Omand, 2022-03-30

Contemporary Practice in Studio Art Therapy discovers where studio practice stands in the profession today and reflects on how changing social, political, and economic contexts have influenced its ethos and development. This is the first UK volume devoted to studio art therapy, and the writers explore what is meant by a studio approach and how they are adapting art-based practices in radical new ways and settings. It comprises three parts – Part I: Frames of reference explores how particular social, cultural, and political contexts have led to the discourses within practice; Part II: Models of

practice gives accounts of current studio art therapy practice, describing rationale for working methods and providing a resource for practitioners; Part III: Curating, exhibiting and archiving considers how the display and disposal of artworks, particularly relevant to studio approaches, may be thought about and implemented. The book includes chapters from North American authors who illustrate a trajectory of practice that has the potential to point to future developments. The book will be essential reading for practitioners and students who are interested in taking a fresh perspective on art therapy and will be encouraged by new ways of thinking about the studio approach in today's changing world.

**Theatre Studios** Tom Cornford, 2020-12-30 Theatre Studios explores the history of the studio model in England, first established by Konstantin Stanislavsky, Jacques Copeau and others in the early twentieth century, and later developed in the UK primarily by Michel Saint-Denis, George Devine, Michael Chekhov and Joan Littlewood, whose studios are the focus of this study. Cornford offers in-depth accounts of the radical, collective work of these leading theatre companies of the mid-twentieth century, considering the models of ensemble theatre-making that they developed and their remnants in

the newly publicly-funded UK theatre establishment of the 1960s. In the process, this book develops an approach to understanding the politics of artistic practices rooted in the work of John Dewey, Antonio Gramsci and the standpoint feminists. It concludes by considering the legacy of the studio movement for twenty-first-century theatre, partly by tracking its echoes in the work of Secret Theatre at the Lyric, Hammersmith (2013–2015). Students and makers of theatre alike will find in this book a provocative and illuminating analysis of the politics of performance-making and a history of the theatre as a site for developing counterhegemonic, radically democratic, anti-individualist forms of cultural production.

*The Routledge Companion to African American Theatre and Performance* Kathy A.

Perkins, Sandra L. Richards, Renée Alexander Craft, Thomas F. DeFrantz, 2018-12-07 The Routledge Companion to African American Theatre and Performance is an outstanding collection of specially written essays that charts the emergence, development, and diversity of African American Theatre and Performance—from the nineteenth-century African Grove Theatre to Afrofuturism. Alongside chapters from scholars are contributions from theatre makers, including producers, theatre managers, choreographers, directors, designers, and critics. This ambitious Companion includes: A Timeline of African American theatre and performance. Part I Seeing ourselves onstage explores the important experience of Black theatrical self-representation. Analyses of diverse topics including historical dramas, Broadway musicals, and experimental theatre allow readers to discover expansive articulations of Blackness. Part II Institution building highlights institutions that have nurtured Black people both on stage and behind the scenes. Topics include Historically Black Colleges and Universities (HBCUs), festivals, and black actor training. Part III Theatre and social change surveys key moments when Black people harnessed the power of theatre to affirm community realities and

posit new representations for themselves and the nation as a whole. Topics include Du Bois and African Muslims, women of the Black Arts Movement, Afro-Latinx theatre, youth theatre, and operatic sustenance for an Afro future. Part IV Expanding the traditional stage examines Black performance traditions that privilege Black worldviews, sense-making, rituals, and innovation in everyday life. This section explores performances that prefer the space of the kitchen, classroom, club, or field. This book engages a wide audience of scholars, students, and theatre practitioners with its unprecedented breadth. More than anything, these invaluable insights not only offer a window onto the processes of producing work, but also the labour and economic issues that have shaped and enabled African American theatre. Chapter 20 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution-Non Commercial-No Derivatives (CC-BY-NC-ND) 4.0 license.

**Amateur and Proletarian Theatre in Post-Revolutionary Russia** Stefan Aquilina, 2021-04-08 This is the first collection of primary sources that addresses the amateur theatre produced by the workers in the first decade after the Russian Revolution. Newly translated from the Russian, the essays capture both theoretical articulations on the scene – by luminaries such as Alexander Bogdanov, Platon Kerzhentsev, Valerian Pletnev, Alexander Mgebrov and Valentin Smyshliaev – and the more fleeting descriptions and first-hand accounts of the productions staged, accounts and voices which are typically harder to capture. The essays tell a story of unabashed optimism in the creativity of the working

classes. They speak of the use of theatre to carve a public and political role in the construction of a new world. The sources, however, also exhibit the flipside of the scene, or the sombre difficulties faced by the amateur actors and the incessant calls to raise standards through professional help. The narrative developed is that of an amateur theatre which began as an autonomous and heterogeneous activity but which by the mid-to-late 1920s was transformed into a regulated practice and a space for cultural programming. The collection makes an important contribution to our understanding of modern theatre: scholarship conventionally tackles the canonical names from the professional world but gives little attention to the more down-to-earth forms of performance taking place in factories, clubs and amateur circles. An introductory essay also highlights the range and significance of the collection and draws links between the essays.

**Bakhtin and Theatre** Dick Mccaw, 2015-07-30 What did Bakhtin think about the theatre? That it was outdated? That is 'stopped being a serious genre' after Shakespeare? Could a thinker to whose work ideas of theatricality, visuality, and embodied activity were so central really have nothing to say

about theatrical practice? Bakhtin and Theatre is the first book to explore the relation between Bakhtin's ideas and the theatre practice of his time. In that time, Stanislavsky co-founded the Moscow Art Theatre in 1898 and continued to develop his ideas about theatre until his death in 1938. Stanislavsky's pupil Meyerhold embraced the Russian Revolution and created some stunningly revolutionary productions in the 1920s, breaking with the realism of his former teacher. Less than twenty years after Stanislavsky's death and Meyerhold's assassination, a young student called Grotowski was studying in Moscow, soon to break the mould with his Poor Theatre. All three directors challenged the prevailing notion of theatre, drawing on, disagreeing with and challenging each other's ideas. Bakhtin's early writings about action, character and authorship provide a revealing framework for understanding this dialogue between these three masters of Twentieth Century theatre.
