**Child and Youth Participation in Policy, Practice and Research** Deirdre Horgan, Danielle Kennan, 2021-12-23 This book showcases rights based participatory approaches to policy-making, practice and research with children and youth. Throughout its three parts, the book conceptualises a rights-based participatory approach; showcases constructive and innovative rights based participatory approaches across the domains of research, policy and practice; and interrogates the challenges and complexities in the implementation of such an approach. In recent times, Ireland has been at the forefront of promoting and implementing participatory approaches to policy-making, practice and research focused on children and youth. This edited volume is a timely opportunity to capture previously undocumented learning generated from a wide range of innovative participatory initiatives implemented in Ireland. In capturing this learning, real world guidance will be provided to international policy-makers, practitioners and researchers working with children and youth. This book is essential reading for those interested in a rights based participatory approach, for those who want to appropriately and meaningfully engage children and youth in research, and for those wishing to maximise the contribution of children and youth in policy-making.

Origin and Significance of the Frankfurt School Phil Slater, 2015-12-17 The term 'Frankfurt School' is used widely, but sometimes loosely, to describe both a group of intellectuals and a specific social theory. Focusing on the formative and most radical years of the Frankfurt School, during the 1930s, this study concentrates on the Frankfurt School's most original contributions made to the work on a 'critical theory of society' by the philosophers Max Horkheimer and Herbert Marcuse, the psychologist Erich Fromm, and the aesthetician Theodor W. Adorno. Phil Slater traces the extent, and ultimate limits, of the Frankfurt School's professed relation to the Marxian critique of political economy. In considering the extent of the relation to revolutionary praxis, he discusses the socio-economic and political history of Weimar Germany in its descent into fascism, and considers the work of such people as Karl Korsch, Wilhelm Reich, Walter Benjamin and Bertolt Brecht, which directs a great deal of critical light on the Frankfurt School. While pinpointing the ultimate limitations of the Frankfurt School's frame of reference, Phil Slater also looks at the role their work played (largely against their wishes) in the emergence of the student anti-authoritarian movement in the 1960s. He shows that, in particular, the analysis of psychic and cultural manipulation was central to the young rebels' theoretical armour, but that even here, the lack of economic class analysis seriously restricts the critical edge of the Frankfurt School's theory. His conclusion is that the only way forward is to rescue the most radical roots of the Frankfurt School's work, and to recast these in the context of a practical theory of economic and political emancipation.

**Aviation and Human Factors** JOSE. SANCHEZ-ALARCOS, 2023-05 This book tries to identify what is wrong, why there are things to fix and some Human Factors principles to keep in aircraft design and operations.

**The Legacy of the Great War** Jay Winter, 2009-10-26 In late 2007 and early 2008, world-renowned historians gathered in Kansas City for a series of public forums on World War I. Each of the five events focused on a particular topic and featured spirited dialogue between its prominent participants. In spontaneous exchanges, the eminent scholars probed each other's arguments, learned from each other, and provided insights not just into history but also into the way scholars think about their subject alongside and at times in conflict with their colleagues. Representing a fourth generation of writers on the Great War and a transnational rather than an international approach, prominent historians Niall Ferguson and Paul Kennedy, Holger Afflerbach and Gary Sheffield, John Horne and Len Smith, John Milton Cooper and Margaret MacMillan, and Jay Winter and Robert Wohl brought to the proceedings an exciting clash of ideas. The forums addressed topics about the Great War that have long fascinated both scholars and the educated public: the origins of the war and the question of who was responsible for the escalation of the July Crisis; the nature of generalship and military command, seen here from the perspectives of a German and a British scholar; the private soldiers' experiences of combat, revealing their strategies of survival and negotiation; the peace-making process and the overwhelming pressures under which statesmen worked; and the long-term cultural consequences of the war—showing that the Great War was “great” not merely because of its magnitude but also because of its revolutionary effects. These topics continue to reverberate, and in addition to shedding new light on the subjects, these forums constitute a glimpse at how historical writing happens. American society did not suffer the consequences of the Great War that virtually all European countries knew—a lack of perspective that the National World War I Museum seeks to correct. This book celebrates that effort, helping readers feel the excitement and the moral seriousness of historical scholarship in this field and drawing more Americans into considering how their own history is part of this story.
