**The Dabare Snake Launcher** Joelle Presby, 2022-11-01 A RACE TO BUILD THE FIRST SPACE ELEVATOR IN AFRICA New money, old tribes, and international megacorps race to build the first space elevator. With a little Dabare magic, it just might work! The Sadous, an oil-rich West African family, are handed a plum contract as repayment for a decades-old favor that could make the next generation even richer if the family doesn't tear itself apart first. Two engineer daughters of the Sadou family, Pascaline and Maurie, upon whom the burden of success rests, have troubles of their own. One wants nothing more than to leave and make her own name as an engineering prodigy, while the other is troubled by fever dreams and snakes. Ethan Schmidt-Li is an ambitious megacorp executive with eyes on a big promotion—only to get more than he bargained for when put in charge of the company's make-or-break project. These are some of the people that Tchami "Chummy" Fabrice has brought together to an ambitious end—constructing the world's first space elevator in Africa and ensuring the space industry that it catapults will enrich the continent and all involved. They have the carbon nanofiber, prime land around Kilimanjaro, and a captured rock in orbit for the tether. The hard part will be getting all these different people working together long enough to see it built. At the publisher's request, this title is sold without DRM (Digital Rights Management). Praise for *The Dabare Snake Launcher* "Joelle Presby's novel is a fascinating fictional look behind the scenes of the construction of the world's first space elevator in a near-future version of Africa that has enough grounded elements to be thoroughly believable . . . The story maintains a keen eye on the largely larger-than-life characters and respect for the business processes, customs, and beliefs of the people on the ground making things happen." —Wole Talabi, Locus Award–nominated author and editor of *Africanfuturism: An Anthology* You guys should all be on the lookout for Joelle Presby's solo Baen novel *THE DABARE SNAKE LAUNCHER*. It is... remarkable. Just truly, truly remarkable." —David Weber, NYT Bestselling author of the Honorverse series *The Dabare Snake Launcher* is a very believable depiction of when this species decides to do something amazing: backstabbing, plotting, and inflamed passions galore. Presby has created a future that I could easily imagine reading on the news in a few decades, and the novel is all the better for it. —Warped Factor "The Dabare Snake Launcher takes you on a journey of possibilities, an Africa foremost in groundbreaking technology and not focused on deprivation and poverty. Joelle's writing is nuanced . . . There's family drama . . . romance . . . and laugh-out-loud humour. Writing is vivid and the characters fascinating." —Hannah Onoguwe, author and poet Set in Cameroon, where the author lived for many years, and full of lovely detail about the local cultures, clashes between traditional and modern, and differing expectations. —Jane Lindskold, author of the *Star Kingdom* series and *Over Where* series.

*The Great Bear at War* Chris McNab, 2019-11-28 A History of the Red Army, Soviet Army and Russian Army in 100 Years of Conflict From the chaos of the civil war to the political manoeuvring of the Cold War, Russia's armed forces have shaped the future not only of Russia but of countless other countries around the globe. *The Great Bear at War: The Russian and Soviet Army, 1917–Present* explores the development and struggles of Soviet and Russian armed forces across the numerous conflicts which mark its history. It charts the great historical events that have defined the Red/Russian Army, especially World War II and the Cold War, but also the post-communist insurgencies and wars in which the Russian military has redeveloped its outlook and mission. The post-Soviet development of the Russian military into a modern force is explored in detail, including its controversial campaigns in Chechnya (1999–2009), Georgia (2008), and Ukraine (from 2014). Sewn into the narrative are details about the equipment,

uniforms, training, service conditions and weaponry of the Soviet/Russian soldiers, bringing personal experience and technological context to the broader history. At a time when the world is closely focused upon Russian military behaviour, *The Great Bear at War* is both timely and fascinating.

The Best Caliber Wars James M Volo,2019-05 Guns can be very effective tools, but they are each of limited utility. There is no one weapon that is perfect for every purpose. Private persons may own a number of guns that fulfill a variety of functions. Ballistics is important for soldiers, law enforcement, sportsmen, and anyone who seeks to protect their life, their home, their family, or their workplace. If you are among these, this book is for you.Not surprisingly, gun owners and firearms enthusiasts are often part of a social gun culture in which certain facts, trends, and fads circulate and evolve with time, some stirring intense loyalty among shooters even when the realities suggest otherwise. For the average gun user some very popular myths, misconceptions, and miscalculations concerning ballistics and the terminal effects of bullets are strongly held, and it is not the purpose of this discussion to demonstrate why they are or are not true, only to lay out the parameters of the debate so that the readers can make their own judgments with increased confidence. The origin of ballistics is in the study of the flight path of projectiles, but its domain has been expanded in modern times. Among the modern ballistic sciences are areas of interest concerning how ammunition and weapons operate.

US Marine Corps Recon and Special Operations Uniforms & Equipment 2000–15 J. Kenneth Eward,2016-01-20 In the age of modern warfare the changing landscape of the 21st century battlefield has demanded a transformation within the US Marine Corps Special Operations. Adapting to a huge range of

combat environments, an enormous array of specialist uniforms, protective armour and battlefield electronic devices have been developed to facilitate missions in the most extreme conditions. A special forces operator may now have available to him a dozen distinct types of body armour and two dozen different weapons; never before in American military history has so much been given to so few. Authored by J. Kenneth Eward, professor at the American Military University, and illustrated throughout with photographs and meticulous colour plates, this volume offers the first detailed, authoritative study of the characteristics, and performance in the field, of the most modern combat gear and weapons provided for USMC specialist operators to date.
