Feminist Readings of Antigone Fanny Söderbäck, 2012-02-01 Feminist Readings of Antigone collects the most interesting and provocative feminist work on the figure of Antigone, in particular looking at how she can figure into contemporary debates on the role of women in society. Contributors focus on female subjectivity and sexuality, feminist ethics and politics, questions of race and gender, psychoanalytic theory, kinship, embodiment, and tensions between the private and the public. This collection seeks to explore and spark debate about why Antigone has become such an important figure for feminist thinkers of our time, what we can learn from her, whether a feminist politics turning to this ancient heroine can be progressive or is bound to idealize the past, and why Antigone keeps entering the stage in times of political crisis and struggle in all corners of the world. Fanny Söderbäck has gathered classic work in this field alongside newly written pieces by some of the most important voices in contemporary feminist philosophy. The volume includes essays by Judith Butler, Adriana Cavarero, Tina Chanter, Luce Irigaray, and Julia Kristeva.

Nationalism and African Intellectuals Toyin Falola, 2004 An examination of the attempt by Western-educated African intellectuals to create a 'better Africa' through connecting nationalism to knowledge, from the anti-colonial movement to the present-day. This book is about how African intellectuals, influenced primarily by nationalism, have addressed the inter-related issues of power, identity politics, self-assertion and autonomy for themselves and their continent, from the mid-nineteenth century onward. Their major goal was to create a 'better Africa' by connecting nationalism to knowledge. The results have been mixed, from the glorious euphoria of the success of anti-colonial movements to the depressing circumstances of the African condition as we enter a new millennium. As the intellectual elite is a creation of the Western formal school system, the ideas it generated are also connected to the larger world of scholarship. This world is, in turn, shaped by European contacts with Africa from the fifteenth century onward, the politics of the Cold War, and the subsequent collapse of the Soviet Union. In essence, Africa and its elite cannot be fully understood without also considering the West and changing global politics. Neither can the academic and media contributions by non-Africans be ignored, as these also affect the ways that Africans think about themselves and their continent. *Nationalism and African Intellectuals* examines intellectuals' ambivalent relationships with the colonial apparatus and subsequent nation-state

formations; the contradictions manifested within pan-Africanism and nationalism; and the relation of academic institutions and intellectual production to the state during the nationalism period and beyond. Toyin Falola is the Jacob and Frances Sanger Mossiker Chair in the Humanities and University Distinguished Teaching Professor at the University of Texas at Austin.

A History of Postcolonial Lusophone Africa Patrick Chabal, David Birmingham, 2002-06-13 . . . useful, timely, and important . . . a good and informative book on the Lusophone countries, Portuguese colonialism, and postcolonial influences. —Phyllis Martin, Indiana University This book, produced by the obvious—and distinguished—corps of country specialists . . . fills a real gap in both state-level and 'regional' (broadly defined) studies of contemporary Africa. —Norrie MacQueen, University of Dundee Although the five Portuguese-speaking countries in Africa that gained independence in 1974/75—Angola, Mozambique, Guinea-Bissau, Cape Verde, and São Tomé e Príncipe—differ from each other in many ways, they share a history of Portuguese rule going back to the 15th century, which has left a mark to this day. Patrick Chabal and his co-authors assess the nature of the Portuguese legacy, using a twofold approach. In Part I, three analytical, thematic chapters by Chabal examine what the five countries have in common and how they differ from the rest of Africa. In Part II, individual chapters by leading specialists, each devoted to a specific country, survey the histories of those countries since independence. The book places the postcolonial experience of the Lusophone countries within the context of their precolonial and colonial past and compares and contrasts their experience with that of non-Lusophone African states. The result is a comprehensive, readable, and up-to-date text and reference work on the evolution of postcolonial Portuguese-speaking Africa.

Greek Philosophers as Theologians Dr Adam Drozdek, 2013-05-28 Concepts of God presented by Greek philosophers were significantly different from the image of the divine of popular religion and indicate a fairly sophisticated theological reflection from the very inception of Greek philosophy. This book presents a comprehensive history of theological thought of Greek philosophers from the Presocratics to the early Hellenistic period. Concentrating on views concerning the attributes of God and their impact on eschatological and ethical thought, Drozdek explains that theology was of paramount importance for all Greek philosophers even in the absence of purely theological or religious language.

Angola Patrick Chabal, Nuno Vidal, 2007 It is hoped that the multiparty elections of 2007 will bring about a political system in Angola that will ensure the country's sustained economic and social

development. Angola is just emerging from almost three decades of civil war, and its abundant natural resources and booming oil sector could lay the groundwork for long-term economic prosperity and cement the transition towards political stability. But are these hopes realistic? Angola provides a thorough introduction to the history of Angola and analyzes its economic, political, and social evolution since independence. Its contributors offer incisive, original, and contemporary interpretations of one of the most complex countries in Africa.

Encyclopedia of Classical Philosophy Donald J. Zeyl, 2013-10-23 The Encyclopedia of Classical Philosophy is a reference work on the philosophy of Greek and Roman antiquity. It includes subjects and figures from the dawn of philosophy in Ionia in the 6th century BC to the demise of the Academy in Athens in the 6th century AD. Scholarly study of the texts and philosophical thought of this period has been, during the last half of the 20th century, amazingly productive and has become increasingly sophisticated. The 269 articles in the encyclopedia reflect this development. While the majority of the articles are devoted to individual figures, many of the articles are thematic surveys of broad areas such as epistemology, ethics, and political thought. Some articles focus on particular concepts that evoked significant philosophical treatment by the ancients, and have proved central to later thought. Other articles treat fields that are no longer considered part of philosophy proper, such as mathematics and science. There are articles examining areas of intellectual or cultural endeavour, such as poetry or rhetoric, or genres of philosophical expression, such as dialogue and diatribe. Still others describe the historical developments of philosophical schools and traditions. The encyclopedia includes a chronology and guide to further reading. Best Reference Source
