Euro-Par 2001 Parallel Processing Rizos Sakellariou, John Keane, John Gurd, Len Freeman, 2003-06-30 Euro-Par – the European Conference on Parallel Computing – is an international conference series dedicated to the promotion and advancement of all aspects of parallel computing. The major themes can be divided into the broad categories of hardware, software, algorithms, and applications for parallel computing. The objective of Euro-Par is to provide a forum within which to promote the development of parallel computing both as an industrial technique and an academic discipline, extending the frontiers of both the state of the art and the state of the practice. This is particularly important at a time when parallel computing is undergoing strong and sustained development and experiencing real industrial take up. The main audience for and participants in Euro-Par are seen as researchers in academic departments, government laboratories, and industrial organisations. Euro-Par aims to become the primary choice of such professionals for the presentation of new results in their specific areas. Euro-Par is also interested in applications that demonstrate the effectiveness of the main Euro-Par themes. Euro-Par has its own Internet domain with a permanent web site where the history of the conference series is described: <http://www.euro-par.org>. The Euro-Par conference series is sponsored by the Association of Computer Machinery and the International Federation of Information Processing. Euro-Par 2001 Euro-Par 2001 was organised by the University of Manchester and UMIST.

Euro-Par'97 Parallel Processing Christian Lengauer, Martin Griebel, Sergei Gorlatch, 2005-11-23 This book constitutes the refereed proceedings of the Third International Euro-Par Conference, held in Passau, Germany, in August 1997. The 178 revised papers presented were selected from more than 300 submissions on the basis of 1101 reviews. The papers are organized in

accordance with the conference workshop structure in tracks on support tools and environments, routing and communication, automatic parallelization, parallel and distributed algorithms, programming languages, programming models and methods, numerical algorithms, parallel architectures, HPC applications, scheduling and load balancing, performance evaluation, instruction-level parallelism, database systems, symbolic computation, real-time systems, and an ESPRIT workshop.

Euro Summits Jonathan O'Brian, 2021-05-03 Panenka's pearl of a penalty in Belgrade, van Basten's volley of a lifetime in Munich, Gazza's agonising near-miss at Wembley: over its six decades, the UEFA European Championship has thrown up many of the most memorable stories in football lore. Now it gets the history it deserves. Euro Summits is the first full retelling of the tournament, from its tentative beginnings in the late 1950s to its elephantine expansion in the mid-2010s. Taking in the USSR's early success, the grim violence of 1968, France's cavalier feats on home soil in 1984, the sensational triumphs of no-hopers Denmark and Greece, Spain's modern-day dominance, all the way up to Portugal's shock victory in 2016, it's a panoramic portrait of an event that captures a whole continent's imagination every four years. Dramatic, detailed and teeming with compelling personalities like Michel Platini, Guenter Netzer, Hristo Stoichkov, Zinedine Zidane, Wayne Rooney and Cristiano Ronaldo, this is the complete story of a footballing event second only to the World Cup.

Euro-Par 2003 Parallel Processing Harald Kosch, László Böszörményi, Hermann Hellwagner, 2004-06-01 Euro-Par Conference Series The European Conference on Parallel Computing (Euro-Par) is an international conference series dedicated to the promotion and advancement of all aspects of parallel and distributed computing. The major themes fall into the categories of hardware, software, algorithms, and applications. This year, new and interesting

topics were introduced, like Peer-to-Peer Computing, Distributed Multimedia Systems, and Mobile and Ubiquitous Computing. For the first time, we organized a Demo Session showing many challenging applications. The general objective of Euro-Par is to provide a forum promoting the development of parallel and distributed computing both as an industrial technique and an academic discipline, extending the frontiers of both the state of the art and the state of the practice. The industrial importance of parallel and distributed computing is supported this year by a special Industrial Session as well as a vendors' exhibition. This is particularly important as currently parallel and distributed computing is evolving into a globally important technology; the buzzword Grid Computing clearly expresses this move. In addition, the trend to a mobile world is clearly visible in this year's Euro-Par. The main audience for and participants at Euro-Par are researchers in academic departments, industrial organizations, and government laboratories. Euro-Par aims to become the primary choice of such professionals for the presentation of new results in their specific areas. Euro-Par has its own Internet domain with a permanent Web site where the history of the conference series is described: <http://www.euro-par.org>. The Euro-Par conference series is sponsored by the Association for Computer Machinery (ACM) and the International Federation for Information Processing (IFIP).

Euro-Par 2007 Workshops: Parallel Processing Luc Bougé, Martti Forsell, Jesper Larsson Träff, Achim Streit, Wolfgang Ziegler, Michael Alexander, Stephen Childs, 2008-03-08

Parallel and distributed processing, although within the focus of computer science research for a long time, is gaining more and more importance in a wide spectrum of applications. These proceedings aim to demonstrate the use of parallel and distributed processing concepts in different application fields, and attempt to spark interest in novel research directions to advance the embracing model of high-performance computing research in general. The objective of these

workshops is to specifically address researchers coming from university, industry and governmental research organizations and application-oriented companies, in order to close the gap between purely scientific research and the applicability of the research ideas to real-life problems. Euro-Par is an annual series of international conferences dedicated to the promotion and advancement of all aspects of parallel and distributed computing. The 2007 event was the 13th issue of the conference. Euro-Par has for a long time been eager to attract colocated events sharing the same goal of promoting the development of parallel and distributed computing, both as an industrial technique and an academic discipline, extending the frontier of both the state of the art and the state of the practice. Since 2006, Euro-Par offers researchers the chance to colocate advanced technical workshops back-to-back with the main conference. This is for a mutual benefit: the workshops can take advantage of all technical and social facilities which are set up for the conference, so that the organizational tasks are kept to a minimal level; the conference can rely on workshops to experiment with specific areas of research which are not yet mature enough, or too specific, to lead to an official, full-fledged topic at the conference.

Interface Design Stephan Thesmann, 2016-10-05 Da Sie dieses Buch in der Hand halten, wissen Sie bereits, wie wichtig gute Benutzungsoberflächen für den Erfolg einer Software sind – sei es für eine Webseite, eine App oder jedes andere Programm. Aber was genau macht ein gutes User Interface aus? Es gestattet möglichst vielen Benutzern, eine Software intuitiv zu benutzen! Dabei geht es auf die unterschiedlichen Fähigkeiten, Vorlieben und auch Emotionen der User ein. Design

und Umsetzung sorgen für ein hohes Maß an Zugänglichkeit nicht nur für Menschen, sondern auch für (Such-) Maschinen. Dieses Lehrbuch führt Sie in die physiologischen und psychologischen Grundlagen der menschlichen Wahrnehmung und Informationsverarbeitung ein. So dann erfahren Sie, wie Sie Interfaces barrierefrei gestalten und für Suchmaschinen optimieren können, um einen großen Benutzerkreis anzusprechen. Anschließend lernen Sie, die Anforderungen an Usability, User Experience und Accessibility in den einzelnen Phasen des Entwurfsprozesses umzusetzen. Die projektorientierte Vorgehensweise führt Sie mit vielen Beispielen und ausführlichen Erläuterungen schrittweise von der ersten Idee bis hin zur Fähigkeit, qualitativ hochwertige Interfaces zu entwerfen und Entwicklungsprozesse zu managen.

Dividing United Europe Aline Sierp, Christian Karner, 2020-06-29 Pictures of Angela Merkel in a Nazi uniform, the burning of German flags, newspaper articles portraying Southern Europe as workshy and Northern Europe as tight-fisted: The Eurozone crisis has thrown up old stereotypes; often digging into well-established historical images of 'the other'. The conscious or tacit (ab)use of national prejudices by politicians and parts of the media, and the strong emotional reactions among European citizens have caused a lot of public concern about the likely negative implications of such reawakening of national clichés and the newly hardening boundaries they construct for the process of European integration. It is evident that current and recent crises confront European citizens with profound dilemmas which they seek to make sense of, and in response to which much new political mobilisation takes place. At the same time, some of the interpretative and political reactions thus generated also have the potential to become very destructive processes, putting into question years of integration efforts. This book brings together scholars who examine the nexus between (economic) crisis, national identities and the use of historical images, and prejudices and

stereotypes, by focusing particularly on media and political discourses in different European countries. In addition to detailed empirical discussions covering diverse national settings across Europe, the different contributions discuss and offer a variety of conceptual and methodological approaches within the inter-disciplinary study of national identities, prejudice and stereotyping in the context of socio-economic and political crises. This book was originally published as a Special Issue of National Identities.

Europe and the Euro Alberto Alesina, Francesco Giavazzi, 2010-04-15 It is rare for countries to give up their currencies and thus their ability to influence such critical aspects of their economies as interest and exchange rates. Yet ten years ago a number of European countries did exactly that when they adopted the euro. Despite some dissent, there were a number of arguments in favor of this policy change: it would facilitate exchange of goods, money, and people by decreasing costs; it would increase trade; and it would enhance efficiency and competitiveness at the international level. A decade is an ideal time frame over which to evaluate the success of the euro and whether it has lived up to expectations. To that aim, *Europe and the Euro* looks at a number of important issues, including the effects of the euro on reform of goods and labor markets; its influence on business cycles and trade among members; and whether the single currency has induced convergence or divergence in the economic performance of member countries. While adoption of the euro may not have met the expectations of its most optimistic proponents, the benefits have been many, and there is reason to believe that the euro is robust enough to survive recent economic shocks. This volume is an essential reference on the first ten years of the euro and the workings of a monetary union.

The Impact of the Euro on Latin America Dorte Verner, 2000-01-01 Trade between the European Union (EU) and developing countries is important—around 22 percent of the EU's exports go to developing countries, while 20 percent of the EU's imports originate in those countries. More specifically, trade between Latin America and the EU has ballooned in recent times...What are the risks and opportunities facing the Latin American and Caribbean (LAC) region from the introduction of the euro? Will the replacement of the European currency basket by the euro have real economic effects, or will it be little more than an accounting phenomenon? This slim volume attempts to answer those questions. In doing so it covers the current economic situation, presents financial flow, discusses the value and volatility of the euro, and the financial implications of the euro, including the banking system and foreign debt and reserve management. Overall, the report gives a broad picture of the possible impact of the euro on the LAC region.

The Euro Chris Mulhearn, 2009-01-01 This title provides a comprehensive overview of the development and design of the European Monetary Union, as well as an intriguing discussion of its prospects for future enlargement.

The Concrete Euro Paul Mercier, Francesco Papadia, 2014-10-02 The euro area's framework for monetary policy implementation was introduced in 1999. Eleven years on, this volume examines the theoretical and historical underpinnings of the framework, how it has fared in practice, and what challenges it is likely to face in the future. The technology serving the implementation of monetary policy has historically been the exclusive preserve of a narrow group of specialists but the recent global financial crisis brought the issue into the public eye, as the supply of base money exploded while inflation risked turning into deflation. This book addresses all the aspects of monetary policy

implementation, with particular emphasis on the European Central Bank and the euro, allowing a more informed assessment of a neglected, but important, aspect of economic life, and a better understanding of the exceptional developments brought about by the financial crisis. Written by the leading money market operators at the European Central Bank who were involved in creating and implementing the framework, and who are still managing monetary policy implementation at the Bank today, this book provides a rare insider account of how the framework has evolved, how it works in practice, and the challenges of monetary policy implementation going forward.
