*Representations of Finnishness in Sweden* Lotta Weckström, 2011-12-26 More than half a million Swedes – one in twenty – is of Finnish descent. This book explores Finnishness, multilingualism and identities of young people with Finnish background in Sweden. What does it mean to grow up in a Finnish family in Sweden? Who are 'real Finns' and what does it take to be(come) one? Is a shared minority language essential for the survival of the minority, or can a minority culture stay viable without it? What is Finnishness and who, in the end, can define ethnicity? How to make sense of, and how to present interviews that are rich with imitations of accents, jokes and laughter? *Representations of Finnishness in Sweden* is an ethnographic interview study in the domain of applied language studies. This book is aimed at readers interested in sociolinguistics, linguistic ethnography, and the study of identities. Interviewees' voices take a central position in this book and interview excerpts are used not only as illustrations, but also serve as starting points for discussing broader theoretical concepts.

**The European Union** Kristin Archick, 2019-09-15 The European Union (EU) is a political and economic partnership that represents a unique form of cooperation among sovereign countries. The EU is the latest stage in a process of integration begun after World War II, initially by six Western European countries, to foster interdependence and make another war in Europe unthinkable. The EU currently consists of 28 member states, including most of the countries of Central and Eastern Europe, and has helped to promote peace, stability, and economic prosperity throughout the European continent. The EU has been built through a series of binding treaties. Over the years, EU member states have sought to harmonize laws and adopt common policies on an increasing number of economic, social, and political issues. EU member states share a customs union; a single market in which capital, goods, services, and people move freely; a common trade policy; and a common agricultural policy. Nineteen EU member states use a common currency (the euro), and 22 member states participate in the Schengen area of free movement in which internal border controls have been eliminated. In addition, the EU has been developing a Common Foreign and Security Policy (CFSP), which includes a Common Security and Defense Policy (CSDP), and pursuing cooperation in the area of Justice and Home Affairs (JHA) to forge common internal security measures. Member states work together through several EU institutions to set policy and to promote their collective interests. In recent years, however, the EU has faced a number of internal and external crises. Most notably, in a June 2016 public referendum, voters in the United Kingdom (UK) backed leaving the EU. The pending British exit from the EU (dubbed Brexit) comes amid multiple other challenges, including the rise of populist and to some extent anti-EU political parties, concerns about democratic backsliding in some member states (including Poland and Hungary), ongoing pressures related to migration, a heightened terrorism threat, and a resurgent Russia. The United States has supported the European integration project since its inception in the 1950s as a means to prevent another catastrophic conflict on the European continent and foster democratic allies and strong trading partners. Today, the United States and the EU have a dynamic political partnership and share a huge trade and investment relationship. Despite periodic tensions in U.S.-EU relations over the years, U.S. and EU policymakers alike have viewed the partnership as serving both sides' overall strategic and economic interests.

EU leaders are anxious about the Trump Administration's commitment to the EU project, the transatlantic partnership, and an open international trading system-especially amid the Administration's imposition of tariffs on EU steel and aluminum products since 2018 and the prospects of future auto tariffs. In July 2018, President Trump reportedly called the EU a foe on trade but the Administration subsequently sought to de-escalate U.S.-EU tensions and signaled its intention to launch new U.S.-EU trade negotiations. Concerns also linger in Brussels about the implications of the Trump Administration's America First foreign policy and its positions on a range of international issues, including Russia, Iran, the Israeli-Palestinian conflict, climate change, and the role of multilateral institutions. This report serves as a primer on the EU. Despite the UK's vote to leave the EU, the UK remains a full member of the bloc until it officially exits the EU (which is scheduled to occur by October 31, 2019, but may be further delayed). As such, this report largely addresses the EU and its institutions as they currently exist. It also briefly describes U.S.-EU political and economic relations that may be of interest.

*The Economics of Ecosystems and Biodiversity: Ecological and Economic Foundations* Pushpam Kumar, 2012-12-20 Human well-being relies critically on ecosystem services provided by nature. Examples include water and air quality regulation, nutrient cycling and decomposition, plant pollination and flood control, all of which are dependent on biodiversity. They are predominantly public goods with limited or no markets and do not command any price in the conventional economic system, so their loss is often not detected and continues unaddressed and unabated. This in turn not only impacts human well-being, but also seriously undermines the sustainability of the economic system. It is against this background that TEEB: The Economics of Ecosystems and Biodiversity project was set up in 2007 and led by the United Nations Environment Programme to provide a comprehensive global assessment of economic aspects of these issues. This book, written by a team of international experts, represents the scientific state of the art, providing a comprehensive assessment of the fundamental ecological and economic principles of measuring and valuing ecosystem services and biodiversity, and showing how these can be mainstreamed into public policies. This volume and subsequent TEEB outputs will provide the authoritative knowledge and guidance to drive forward the biodiversity conservation agenda for the next decade.

*The Politics of Contemporary Art Biennials* Panos Kompatsiaris, 2017-03-31 Contemporary art biennials are sites of prestige, innovation and experimentation, where the category of art is meant to be in perpetual motion, rearranged and redefined, opening itself to the world and its contradictions. They are sites of a seemingly peaceful cohabitation between the elitist and the popular, where the likes of Jeff Koons encounter the likes of Guy Debord, where Angela Davis and Frantz Fanon share the same ground with neoliberal cultural policy makers and creative entrepreneurs. Building on the legacy of events that conjoin art, critical theory and counterculture, from Nova Convention to documenta X, the new biennial blends the modalities of protest with a neoliberal politics of creativity. This book examines a strained period for these high art institutions, a period when their politics are brought into question and often boycotted in the context of austerity, crisis and the rise of Occupy cultures. Using the 3rd Athens Biennale and the 7th Berlin Biennale as its main case studies, it looks at

how the in-built tensions between the domains of art and politics take shape when spectacular displays attempt to operate as immediate activist sites. Drawing on ethnographic research and contemporary cultural theory, this book argues that biennials both denunciate the aesthetic as bourgeois category and simultaneously replicate and diffuse an exclusive sociability across social landscapes.

The Difficult Task of Peace Francisco Rojas Aravena, 2019-09-05 This book provides a holistic view on the topics of peace and conflict, peace education, international relations and regional studies during the end of the second decade of the twenty-first century. It collects the studies, experience and analysis of faculty members of the University for Peace presented in three sections: regional and institutional outlook, and common challenges and interventions. Some of the topics in this book include the complex concept of peace; governance and security in Africa; peace and conflict in the Middle East; maritime security conflicts in South China Sea, the European Union in a multipolar world, religious fundamentalism and violent extremism; food security, climate change; and participatory action research in the culture of peace. Scholars, capacity building trainers, policy makers, politicians, lawyers, and individuals interested in international affairs among others might find in this book a diverse academic source for further analysis in their respective fields.

*Building Fortress Europe* Karolina S. Follis, 2012-07-24 What happens when a region accustomed to violent shifts in borders is subjected to a new, peaceful partitioning? Has the European Union spent the last decade creating a new Iron Curtain at its fringes? *Building Fortress Europe: The Polish-Ukrainian Frontier* examines these questions from the perspective of the EU's new eastern external boundary. Since the Schengen Agreement in 1985, European states have worked together to create a territory free of internal borders and with heavily policed external boundaries. In 2004 those boundaries shifted east as the EU expanded to include eight postsocialist countries—including Poland but excluding neighboring Ukraine. Through an analysis of their shared frontier, *Building Fortress Europe* provides an ethnographic examination of the human, social, and political consequences of developing a specialized, targeted, and legally advanced border regime in the enlarged EU. Based on fieldwork conducted with border guards, officials, and migrants shuttling between Poland and Ukraine as well as extensive archival research, *Building Fortress Europe* shows how people in the two countries are adjusting to living on opposite sides of a new divide. Anthropologist Karolina S. Follis argues that the policing of economic migrants and asylum seekers is caught between the contradictory imperatives of the European Union's border security, economic needs of member states, and their declared commitment to human rights. The ethnography explores the lives of migrants, and their patterns of mobility, as framed by these contradictions. It suggests that only a political effort to address these tensions will lead to the creation of fairer and more humane border policies.

Mobile Marketing Management Hongbing Hua, 2019-03-18 With the development of mobile internet technology, people's lifestyle and consumer behavior are changing rapidly. Nowadays, the products on the market are updating more and more frequently, and the traditional marketing theory and brand theory fail to get with the mobile internet. So, what's the innovative marketing to take in the new era? Since 2012, China has entered into the mobile era, and became a major country of mobile internet application. The book summarizes the experience of the author accumulated from many trials and errors in management and marketing innovation, so as to form the pattern of management and marketing for the next 30 years. Mobile Marketing Management lays the foundation for the new era with four pillars: service, substance, superuser, space, known as 4S theory for short. In view of the concept of customer-first, it is all about service, and products become productized service concepts. In view of the failure of mass communication, the competition among all services becomes the competition of substance differentiation. Regarding the popularity of self-organization, it becomes a trend to cooperate with people rather than the company to develop the market. In view of the principle of fuzzy market boundary, the enterprises shall optimize their

living space and evolve their development space. This book contains numerous case studies along with analysis and creates the discipline of mobile marketing management, providing innovative theories, methods and tools for the marketing of enterprises. Through this book, readers can master the marketing methods of the mobile internet era. They can apply the marketing theory in this book to guide the marketing practice, thus improving marketing efficiency and reducing marketing costs.

Triggering of Acute Coronary Syndromes S.N. Willich,J.E. Muller,2012-12-06 Cardiovascular diseases account for about half of total mortality in industrialised societies. This figure has declined only slightly and in few countries over the past few decades, which is disturbing in view of our increasing insight into long-term risk factors of coronary heart disease and the dramatic improvement in the acute therapy of its manifestations. One important reason for this is the high fatality during the initial hours of a coronary event, i.e. before medical treatment can be provided. Approximately one quarter of all patients suffering an acute cardiac event die prior to admission to hospital. As a result, the focus of current research has shifted from after-the-fact therapy to the triggering phase of acute coronary disease. Epidemiological observations of recent trends and newly identified determinants of coronary disease and the results of substantial pathophysiological studies of the conversion from chronic coronary disease to an acute event provide the basis for new hypotheses about the triggering mechanisms. The ultimate goal is to design more effective preventive strategies for these deadly diseases. The present extensive summary of important scientific and clinical developments in the study of the triggering and prevention of coronary syndromes that have been seen over the last ten years contains the contributions of leading experts in the field. It presents a cooperative, balanced view derived from physicians and researchers in the U.S. and Europe.

*Continuous Fuzzy Evaluation Methods: A Novel Tool for the Analysis and Decision Making in Football (or Soccer) Matches* Ranjit Biswas,2017-11-27 This book presents a proposal for a new soft computing innovative method called by "CFE" forevaluation of the football matches of FIFA(IFAB) and UEFA to compute the true 'Winner'. It is a research work in the area of 'Football Science', being proposed to FIFA (IFAB) and UEFA, Zurich, Switzerland for consideration to replace the existing obsolete and weak rules of football matches of 90 minutes to declare the final 'Winner'. In CFE, the final decision about any football match of 90 minutes is obtained "by computation", by execution of a software called by 'CFE-software' with the real time input values directly from the field on a number of highly significant parameters, some of them being continuous variables. The result of m-n goals at the end of 90 minutes play in a football match is just one of the many parameters for the computation of the 'Winner' in our proposed CFE method. The evaluation is mainly based upon the application of Fuzzy Logic, 'Fuzzy Pocket Machine', fast Computer Server, good Communication system from playing-field to the server (as used in Cricket matches) and the CFE-software at the server. The

Referees need not be experts in fuzzy set theory; they can be easily trained within just 30 minutes of demonstration on : how to use the 'fuzzy pocket machine' for giving real time inputs to the database at the server.
