Hacking RSS and Atom Leslie Michael Orchard,2005 Now you can satisfy your appetite for information This book is not about the minutia of RSS and Atom programming. It's about doing cool stuff with syndication feeds-making the technology give you exactly what you want the way you want. It's about building a feed aggregator and routing feeds to your e-mail or iPod, producing and hosting feeds, filtering, sifting, and blending them, and much more. Tan-talizing loose ends beg you to create more hacks the author hasn't thought up yet. Because if you can't have fun with the technology, what's the point? A sampler platter of things you'll learn to do Build a simple feed aggregator Add feeds to your buddy list Tune into rich media feeds with BitTorrent Monitor system logs and events with feeds Scrape feeds from old-fashioned Web sites Reroute mailing lists into your aggregator Distill popular links from blogs Republish feed headlines on your Web site Extend feeds using calendar events and microformats

Transmedial Narratology and Contemporary Media Culture Jan-Noël Thon,2016-08-01 It has become something of a cliché within the field of narratology to assert the commercial, aesthetic, and sociocultural relevance of narrative representations, but the fact remains that narratives are everywhere. Whenever we read a novel or a comic, watch a film or an episode of our favorite television series, or play the latest video game, we are likely to engage with narrative media. Similarly, the intermedial adaptations and transmedial entertainment franchises that have become increasingly visible during the past few decades are, at their core, narrative forms. Since a significant part of contemporary media culture is defined by the narratives we tell each other via various media, the media studies discipline needs a genuinely transmedial narratology. Transmedial Narratology and Contemporary Media Culture focuses on the intersubjective construction of storyworlds as well as on prototypical forms of narratorial and subjective representation. It provides not only a method for the analysis of salient transmedial strategies of narrative representation in contemporary films, comics, and video games but also a theoretical frame within which medium-specific approaches from literary and film narratology, from comics studies and game studies, and from various other strands of media and cultural studies may be employed to further our understanding of narratives across media. Jan-Noël Thon is a research associate in the Department of Media Studies at the University of Tübingen, Germany. He is the coeditor of a number of books on narrative and media studies, including *From Comic Strips to Graphic Novels: Contributions to the Theory and History of Graphic Narrative and Storyworlds across Media: Toward a Media-Conscious Narratology* (Nebraska, 2014).

Programming for Adults Raymond Ranier,2005 This book addresses all aspects of the programming process, from idea to execution, from crafts and entertainment to film, arts and science. Included are sources of funding, contracts and agreements, programming to meet the library's mission, and program evaluation.

Mourning in America David W. Mclvor,2016-10-20 Recent years have brought public mourning to the heart of American politics, as exemplified by the spread and power of the Black Lives Matter movement, which has gained force through its identification of pervasive social injustices with individual losses. The deaths of Sandra Bland, Michael Brown, Freddie Gray, Trayvon Martin, Tamir Rice, Walter Scott, and so many others have brought private grief into the public sphere. The rhetoric and iconography of mourning has been noteworthy in Black Lives Matter protests, but David W. Mclvor believes that we have paid too little attention to the nature of social mourning—its relationship to private grief, its practices, and its pathologies and democratic possibilities.In *Mourning in America*, Mclvor addresses significant and urgent questions about how citizens can mourn traumatic events and enduring injustices in their communities. Mclvor offers a framework for analyzing the politics of mourning, drawing from psychoanalysis, Greek tragedy, and scholarly discourses on truth and reconciliation. *Mourning in America* connects these literatures to ongoing activism surrounding racial injustice, and it contextualizes Black Lives Matter in the broader politics of grief and recognition. Mclvor also examines recent, grassroots-organized truth and reconciliation processes such as the Greensboro Truth and Reconciliation Commission (2004–2006), which provided a public examination of the Greensboro Massacre of 1979—a deadly incident involving local members of the Communist Workers Party and the Ku Klux Klan.

Academic Freedom in the Age of the College Richard Hofstadter,2017-11-30 When this classic volume first appeared, academic freedom was a crucially important issue. It is equally so today. Hofstadter approaches the topic historically, showing how events from various historical epochs expose the degree of freedom in academic institutions. The volume exemplifies Richard Hofstadter's qualities as a historian as well as his characteristic narrative ability. Hofstadter first describes the medieval university and how its political independence evolved from its status as a corporate body, establishing a precedent for intellectual freedom that has been a measuring rod ever since. He shows how all intellectual discourse became polarized with the onset of the Reformation. The gradual spread of the Moderate Enlightenment in the colonies led to a major advance for intellectual freedom. But with the beginning of the nineteenth century the rise of denominationalism in both new and established colleges reversed the progress, and the secularization of learning became engulfed by a tidal wave of intensifying piety. Roger L. Geiger's extensive new introduction evaluates Hofstadter's career as a historian and political theorist, his interest in academic freedom, and the continuing significance of *Academic Freedom in the Age of the College*. While most works about higher education treat the subject only as an agent of social economic mobility, *Academic Freedom in the Age of the College* is an enduring counterweight to such histories as it examines a more pressing issue: the fact that colleges and universities, at their best, should foster ideas at the frontiers of knowledge and understanding. This classic text will be invaluable to educators, university administrators, sociologist, and historians.

The New York Supplement ,1910 Cases argued and determined in the Court of Appeals, Supreme and lower courts of record of New York State, with key number annotations. (varies)

Blizzards Cari Meister,2010-09-01 Discusses the nature, causes, and dangers of blizzards, blizzards of the past, and ways to survive them.
