Ohio's Trojan Horse Alan N. Grover,1977 Christian

schools in Ohio were the first to face major lawsuits to determine whether they have the right to exist. But Christian schools in many other states -- Vermont, New York, New Hampshire, Alabama, to name a few -- face similar attacks. It is a life-and-death struggle: make no mistake about it! Ohio's Trojan Horse details an early skirmish that was fought and won in one state. But it does more than that: it prepares the reader to fight his own battles with tyrannical government educationists on his own home ground. In this book, Alan N. Grover -- dynamic young executive director of Christian Schools of Ohio -- deals with the threat of statist control of Christian education. He views the problem from legal, theological, educational, philosophical, constitutional, and doctrinal perspectives. - Back cover.

Love Circles Charles Lee Robinson, Jr.,2015-06-10 Love Circles is a riveting account of sexual revenge and betrayal played out over twenty-five years in the lives of three men,

friends who have managed to stay friends, and are now happily married. They meet at a newly built jazz club to reminisce on all the bad relationships they have had over the years, times when they were living in a vicious love circle of life. Yet they still remained loyal to each other, despite all the other friends who betrayed them over the decades. The three have triumphed over all obstacles by learning that God is the only one who really gets revenge. The story follows Lenny, Richard, and Nathan as they learn things the hard way when their lives were put in danger. Will they prevail?

The Cambridge Companion to Stravinsky Jonathan Cross,2003-07-24 Stravinsky's work spanned the major part of the twentieth century and engaged with nearly all its principal compositional developments. This Companion reflects the breadth of Stravinsky's achievement and influence in essays by leading international scholars on a wide range of topics. It is divided into three parts dealing with the contexts within which Stravinsky worked (Russian, modernist and compositional), with his key compositions (Russian, neoclassical and serial), and with the reception of his ideas (through performance, analysis and criticism). The volume concludes with an interview with the leading Dutch composer Louis Andriessen and a major re-evaluation of 'Stravinsky and Us' by Richard Taruskin.

Report to the President President's Council of Advisors on Scie,Executive Office of the President,2016-03-06 Cities are beginning a new era of

change. From 1920 to 2010 many U.S. cities hollowed out as suburbs grew faster than their urban cores. The trend started reversing in 2011 as Millennials and Baby Boomers looking for social connections and convenience settled in urban neighborhoods. Accompanying the resurgence of residential cities are complex and persistent urban challenges, including resilience against climate change and natural disasters. This report focuses on the technologies that shape some key infrastructures and economic activities, as opposed to those involved in delivering education, health care, or social services. As described in Chapter 2 of the report, technological advances promise to improve the environments in which people live and the services that city governments and companies offer.Cleaner energy technologies, new models of transportation, new kinds of water systems, building-construction innovation, low-water and soil-less agriculture, and clean and small-scale manufacturing are or will be available in the near future. These options, which are summarized in the Table of City Infrastructure Technologies, are evolving through private-sector commercialization and implementation plus university and National Laboratory research and development (R&D) in concert with city governments.
