The Structure and Function of Aquatic Microbial Communities Christon J. Hurst, 2019-05-13 This book discusses how aquatic microbial communities develop interactive metabolic coordination both within and between species to optimize their energetics. It explains that microbial community structuration often includes functional stratification among a multitude of organisms that variously exist either suspended in the water, lodged in sediments, or bound to one another as biofilms on solid surfaces. The authors describe techniques that can be used for preparing and distributing microbiologically safe drinking water, which presents the challenge of successfully removing the pathogenic members of the aquatic microbial community and then safely delivering that water to consumers. Drinking water distribution systems have their own microbial ecology, which we must both understand and control in order to maintain the safety of the water supply. Since studying aquatic microorganisms often entails identifying them, the book also discusses techniques for successfully isolating and cultivating bacteria. As such, it appeals to microbiologists, microbial ecologists and water quality scientists.

With the ever increasing human population and growing demand for wood, this book offers valuable insights for better understanding and efficient utilization of this wonderful gift of nature. This book will be useful to researchers, professionals, and policy makers involved in forestry and wood related areas.

Potassium Solubilizing Microorganisms for Sustainable Agriculture Vijay Singh Meena, Bihari Ram Maurya, Jay Prakash Verma, Ram Swaroop Meena, 2016-06-27 The potassium solubilizing microorganisms (KSMs) are a rhizospheric microorganism which solubilizes the insoluble potassium (K) to soluble forms of K for plant growth and yield. K-solubilization is carried out by a large number of saprophytic bacteria (*Bacillus mucilaginosus*, *B. edaphicus*, *B. circulans*, *Acidithiobacillus ferrooxidans*, *Paenibacillus* spp.) and fungal strains (*Aspergillus* spp. and *Aspergillus terreus*). Major amounts of K containing minerals (muscovite, orthoclase, biotite, feldspar, illite, mica) are present in the soil as a fixed form which is not directly taken up by the plant. Nowadays most of the farmers use injudicious application of chemical fertilizers for achieving maximum productivity. However, the KSMs are most important microorganisms for solubilizing fixed form of K in soil system. The KSMs are an indigenous rhizospheric microorganism which show effective interaction between soil-plant systems. The main mechanism of KSMs is acidolysis, chelation, exchange reactions, complexolysis and production of organic acid. According to the literature, currently negligible use of potassium fertilizer as chemical form has been recorded in agriculture for enhancing crop yield. Most of the farmers use only nitrogen and phosphorus and not the K fertilizer due to unawareness that the problem of K deficiency occurs in rhizospheric soils. The K fertilizer is also costly as compared to other chemical fertilizers.

Brain Edema XIV Zbigniew Czernicki, Alexander Baethmann, Umeo Ito, Yoichi Katayama, Toshihiko Kuroiwa, Alexander David Mendelow, 2009-10-08 The XIV International Symposium on Brain Edema and Brain Tissue Injury took place in Warsaw, Poland, on 11–14 June 2008. Two prominent members of the International Society for Brain Edema: Dr. Igor Klatzo and Dr. Julien Hoff have passed away after the last 2005 Symposium in Ann Arbor, USA. Dr. Igor Klatzo was actually the founder of the Society, and the Advisory Board decided to commemorate Dr. Igor Klatzo by introducing a lecture named after him to be given at the Symposium. Prof. Dr. Hans-Jürgen Reulen has been honored to give the first Igor Klatzo lecture entitled “Bulk Flow and Diffusion revisited, and Clinical Applications”. This volume contains 65 out of the 104 papers presented at the Symposium as lectures or posters. The topics of the Symposium were similar to those discussed at the previous ones. Many discussions focused on clinical work especially diagnosis, subarachnoid hemorrhage, hydrocephalus, and traumatic brain injury. Diagnosis and therapy, including surgical methods, have also been verified. Much attention was drawn to the application of decompressive craniectomy in the treatment of posttraumatic intracranial hypertension. The pathomechanisms of brain edema and tissue injury studied in experimental models have been also presented.

Encyclopedia of Global Bioethics Henk ten Have, 2016-11-29 This work presents the first comprehensive and systematic treatment of all relevant issues and topics in contemporary global bioethics. Now that bioethics has entered into a novel global phase, a wider set of issues, problems and principles is emerging against the backdrop of globalization and in the context of global relations. This new stage in bioethics is furthermore promoted through the ethical framework presented in the UNESCO Universal Declaration on Bioethics and Human Rights adopted in 2005. This Declaration is the first political statement in the field of bioethics that has been adopted unanimously by all Member States of UNESCO. In contrast to other international documents, it formulates a commitment of governments and is part of international law (though not binding as a Convention). It presents a universal framework of ethical principles for the further development of bioethics at a global level. The Encyclopedia of Global Bioethics caters to the need for a comprehensive overview and systematic treatment of all pertinent new topics and issues in the emerging global bioethics debate. It provides descriptions and analysis of a vast range of important new issues from a truly global perspective and with a cross-cultural approach. New issues covered by the Encyclopedia and neglected in more traditional works on bioethics include, but are not limited to, sponsorship of research and education, scientific misconduct and research integrity, exploitation of research participants in resource-poor settings, brain drain and migration of healthcare workers, organ trafficking and transplant tourism, indigenous medicine, biodiversity, commodification of human tissue, benefit sharing, bio industry and food, malnutrition and hunger, human rights and climate change.

The Weather Factor David Ludlum, 2015-03-30 In this book, David Ludlum, America's acknowledged dean of weather history, describes historical weather events and their consequences to society. From the colonists' first encounter with the American climate to the launch of the first weather satellite in space, weather has influenced battles, wars, elections, sports events, balloon launches, airship flights, and many other history-making events. Want to know what part the weather played in ending the Siege in Yorktown? Why President Harrison caught his fatal cold on Inauguration Day? Which was the worst-ever Saturday for football all across the country? This book attempts to answer these questions and many more.

Advances in Vision Research, Volume II Gyan Prakash, Takeshi Iwata, 2018-11-03 This second volume continues with a focus on the state of the art in genetic eye research in Asia and the Pacific. Though there has been an explosion of information on genetic eye research in western countries, more than sixty percent of the human genes involved in eye diseases in the Asian and Pacific population remain unknown. However, new efforts and a new awareness have sparked important discussions on the subject, and new plans are being implemented to discover the genes responsible for many eye diseases in the population. The book reviews the latest findings; its content ranges from genetic aspects of human migration to DNA sequence analysis, genome-wide association analysis, and disease phenotypes. The efforts of the Asian Eye Genetic Consortium (AEGC) are also discussed. The book's editors have been instrumental in developing strategies for discovering the new Asian genes involved in many eye diseases. All chapters were written by leading researchers working on Asian eye genetics from the fields of Human Genetics, Ophthalmology, Molecular Biology, Biochemistry, Sensory Sciences, and Clinical Research. *Advances in Vision Research, Volume II* will prove to be a major resource for all researchers, clinicians, clinical researchers, and allied eye health professionals with an interest in eye diseases among the Asian population.
