English – One Tongue, Many Voices Jan Svartvik, Geoffrey Leech, 2016-01-19 This is the fully revised and expanded second edition of *English - One Tongue, Many Voices*, a book by three internationally distinguished English language scholars who tell the fascinating, improbable saga of English in time and space. Chapters trace the history of the language from its obscure beginnings over 1500 years ago as a collection of dialects spoken by marauding, illiterate tribes. They show how the geographical spread of the language in its increasing diversity has made English into an international language of unprecedented range and variety. The authors examine the present state of English as a global language and the problems, pressures and uncertainties of its future, online and offline. They argue that, in spite of the amazing variety and plurality of English, it remains a single language.

How to Pass OSCP Series: Windows Privilege Escalation Step-By-Step Guide Alan Wang, 2020-11-13 This book is the first of a series of How To Pass OSCP books and focus on techniques used in Windows Privilege Escalation. This is a step-by-step guide that walks you through the whole process of how to escalate privilege in Windows environment using many common techniques. We start by gathering as much information about the target as possible either manually or using automated scripts. Next, we search for misconfigured services or scheduled tasks, insufficient file permission on binaries or services, vulnerable kernel, vulnerable software running with high privileges, sensitive information stored on local files, credential saved in the memory, registry settings that always elevate privileges before executing a binary, hard-coded credential contained in the application configuration files, and many more. The Magic of Numbers Benedict H. Gross, Joe Harris, 2004 The Magic of Numbers was written with two goals in mind: first, to introduce the reader to some of the beauty of numbers—the patterns in their behavior that have fascinated mathematicians for millennia, and some surprising applications of those patterns; second, and equally important, to teach the reader something of the mathematical mode of thought: the feeling of exploration, excitement, and discovery that are part of how mathematics is developed. The book, written originally for the course Quantitative Reasoning 28 that the authors developed and taught at Harvard, draws the reader into the content through an engaging and informal writing style. Example-driven, it reduces to a minimum the abstract notation and formal argument that often creates a barrier between mathematicians and students, focusing more instead on the experimental aspect of the subject. Above all, the authors communicate to the reader a sense of the joy and fascination of learning mathematics. Additional exercises, problems, and sample exams are available at: www.prenhall.com/gross Principal topics include: Counting and basic combinatorics, with applications to probability and games The arithmetic of natural numbers: the Euclidean Algorithm and the unique factorization theorem Modular arithmetic, including Fermat's Theorem, Euler's Theorem, and how to take powers and roots Codes: how the special properties of ordinary and modular arithmetic in combination allow us to construct the public-key codes that help make data transmission secure.

First Nights Thomas Forrest Kelly,2000-01-01 This lively book takes us back to the first performances of five famous musical compositions: Monteverdi's Orfeo in 1607, Handel's Messiah in 1742, Beethoven's Ninth Symphony in 1824, Berlioz's Symphonie fantastique in 1830, and Stravinsky's Sacre du printemps in 1913. Thomas Forrest Kelly sets the scene for each of these premieres, describing the cities in which they took place, the concert halls, audiences, conductors, and musicians, the sound of the music when it was first performed (often with instruments now extinct), and the popular and critical responses. He explores how performance styles and conditions have changed over the centuries and what music can reveal about the societies that produce it. Kelly tells us, for example, that Handel recruited musicians he didn't know to perform Messiah in a newly built hall in Dublin; that Beethoven's Ninth Symphony was performed with a mixture of professional and amateur musicians after only three rehearsals; and that Berlioz was still buying strings for the violas and mutes for the violins on the day his symphony was first played. Kelly's narrative, which is enhanced by extracts from contemporary letters, press reports, account books, and other sources, as well as by a rich selection of illustrations, gives us a fresh appreciation of these five masterworks, encouraging us to sort out our own late twentieth-century expectations from what is inherent in the music.

Lost Tomorrows Matt Coyle,2019-12-03 Winner of the Shamus Award and Lefty Award Would you risk your own soul to avenge the death of a loved one? A phone call thrusts Rick Cahill's past and all its tragic consequences into his present. Krista Landingham, his former partner on the Santa Barbara Police Department, is dead. When Rick goes to the funeral in the city where his wife was murdered and where he is seen as guilty for her death in the eyes of the police, he discovers that Krista's death may not have been a tragic accident, but murder. Hired by Krista's sister, Leah, to investigate, Rick follows clues that lead him to the truth, not only about Krista's death, but about the tragedy that ruined his life. Along the way, Leah shows him that his life can be salvaged, and he can feel love again if he can just move beyond his past. But the past is Rick's present and will always be until he rights his one great wrong. In the end, Rick is left with a decision that forces him to confront the horrific actions he'll need to take to exact revenge and achieve redemption. A hard-boiled PI thriller perfect for fans of Robert Crais and T. Jefferson Parker While all of the novels in the Rick Cahill PI Crime Series stand on their own and can be read in any order, the publication sequence is: Yesterday's Echo Night Tremors Dark Fissures Blood Truth Wrong Light Lost Tomorrows Blind Vigil Last Redemption Doomed Legacy

History of American Capitalism Sven Beckert,2012 For better or for worse, capitalism is the philosophy that has come to define the United States. In this intriguing essay, Beckert takes a look at the historiography of American capitalism, which has been, according to Beckert, ironically neglected by historians until recently.

The Vanishing Stepwells of India Victoria Lautman,2020-10-06 Some of the finest architectural structures in India are to be found below ground: these are its ancient stepwells. Stepwells are unique to India; the earliest rudimentary wells date from about the 4th century CE, and eventually they were built throughout the country, particularly in the arid western regions. Stepwell construction evolved so that, by the 11th century, they were amazingly complex feats of architecture and engineering, not only providing water all year round but also serving as gathering places, refuges and retreats. The journalist Victoria Lautman first encountered stepwells three decades ago, and this book - now available in paperback for the first time - is a testament to her determined efforts over several years to document these fascinating but largely unknown structures before they disappear. Of the thousands of stepwells that proliferated across India, most were abandoned as a result of modernization and the depletion of water tables. Frequently commissioned by royal or wealthy patrons, the wells vary greatly in scale and design. Some also functioned as subterranean Hindu temples, featuring columned pavilions and elaborate stone carvings. Islamic wells were generally less flamboyant, but often incorporated shady loggias and small chambers in which to relax and escape the stifling heat. Today, few stepwells are in use. The majority have been left to silt up, fill with rubbish and crumble into disrepair. Gradually, however, the Indian government and heritage organizations are recognizing the need to preserve these architectural wonders. In 2014 India's grandest and best-known stepwell, the Rani ki Vav in Patan, Gujarat, became a UNESCO World Heritage site. In her introduction, Lautman discusses why and where the stepwells were built. She reflects on the reasons they became derelict and considers how the appreciation of stepwells is changing with the work of organizations and individuals who aim to protect and restore them. The main part of the book is arranged in a broadly chronological order, with up to four pages devoted to each of c. 70 stepwells, every one unique in design and engineering. The name, location (including GPS coordinates) and approximate date of each well accompany colour photographs and a concise commentary by Lautman on the history and architecture of the well and her experience of

visiting it. While many of the stepwells are rather decrepit, their magnificent engineering and great beauty never fail to impress.
