Forensic Evidence Terrence F. Kiely, 2000-08-23

Forensic Evidence: Science and the Criminal Law is a comprehensive analysis of the most recent state and federal court decisions addressing the use of forensic science in the investigation and trial of criminal cases. Each case provides a complete overview and analysis of the relevant scientific issues debated by the court in that particular case.

The Road to Unfreedom Timothy Snyder, 2019-04-09
NEW YORK TIMES BESTSELLER • From the author of *On Tyranny* comes a stunning new chronicle of the rise of authoritarianism from Russia to Europe and America. “A brilliant analysis of our time.”—Karl Ove Knausgaard, *The New Yorker* With the end of the Cold War, the victory of liberal democracy seemed final. Observers declared the end of history, confident in a peaceful, globalized future. This faith was misplaced. Authoritarianism returned to Russia, as Vladimir Putin found fascist ideas that could be used to justify rule by the wealthy. In the 2010s, it has spread from east to west, aided by Russian warfare in Ukraine and cyberwar in Europe and the United States. Russia found allies among nationalists, oligarchs, and radicals everywhere, and its drive to dissolve Western institutions, states, and values found resonance within the West itself. The rise of populism, the British vote against the EU, and the election of Donald Trump were all Russian goals, but their achievement reveals the vulnerability of Western societies. In this forceful and unsparing work of contemporary history, based on vast research as well as personal reporting, Snyder goes beyond the headlines to expose the true nature of the threat to democracy and law. To understand the challenge is to see, and perhaps renew, the fundamental political virtues offered by tradition and demanded by the future. By revealing the stark

choices before us--between equality or oligarchy, individuality or totality, truth and falsehood--Snyder restores our understanding of the basis of our way of life, offering a way forward in a time of terrible uncertainty.

Adaptive Data Compression Ross N.

Williams, 2012-12-06 Following an exchange of correspondence, I met Ross in Adelaide in June 1988. I was approached by the University of Adelaide about being an external examiner for this dissertation and willingly agreed. Upon receiving a copy of this work, what struck me most was the scholarship with which Ross approaches and advances this relatively new field of adaptive data compression. This scholarship, coupled with the ability to express himself clearly using figures, tables, and incisive prose, demanded that Ross's dissertation be given a wider audience. And so this thesis was brought to the attention of Kluwer. The modern data compression paradigm furthered by this work is based upon the separation of adaptive context modelling, adaptive statistics, and arithmetic coding. This work offers the most complete bibliography on this subject I am aware of. It provides an excellent and lucid review of the field, and should be equally as beneficial to newcomers as to those of us already in the field.

Hacker Techniques, Tools, and Incident Handling
Sean-Philip Oriyano, Michael G. Solomon, 2018-09-04
Hacker Techniques, Tools, and Incident Handling, Third Edition begins with an examination of the landscape, key terms, and concepts that a security professional needs to know about hackers and computer criminals who break into networks, steal information, and corrupt data. It goes on to review the technical overview of hacking: how attacks target networks and the methodology they follow. The final section studies those methods that are most effective when dealing with hacking

attacks, especially in an age of increased reliance on the Web. Written by subject matter experts, with numerous real-world examples, *Hacker Techniques, Tools, and Incident Handling*, Third Edition provides readers with a clear, comprehensive introduction to the many threats on our Internet environment and security and what can be done to combat them.

Tribe-British Relations in India Maguni Charan Behera, 2021-09-11 This book discusses the colonial history of Tribe-British relations in India. It analyses colonial literature, as well as cultural and relational issues of pre-literate communities. It interrogates disciplinary epistemology through multidisciplinary engagement. It presents the temporal and spatial dimensions of tribal studies. The chapters critically examine colonial ideology and administration and civilization of tribes of India. Each paper introduces a unique context of Tribe-British interactions and provides an innovative approach, theoretical foundation, analytical tool and methodological insights in the emerging discipline of tribal studies. The book is of interest to researchers and scholars engaged in topics related to tribes.

Personalised Medicine, Individual Choice and the Common Good Britta Chongkol van Beers, Britta van Beers, Sigrid Sterckx, Donna Dickenson, 2018-11-22 Asks whether personalised medicine is superior to 'one-size-fits-all' treatment. Does it elevate individual choice above the common good?

21st Century Prometheus Maurizio Martellini, Ralf Trapp, 2020-03-11 This book describes the evolving CBRN risk landscape and highlights advances in the "core" CBRN technologies, including when combined with (improvised) explosive devices (CBRNe threats). It analyses how associated technologies create new safety and security risks, challenging certain assumptions that underlie current control regimes. The book also shows how technologies can

be enablers for more effective strategies to mitigate these risks. 21st-century safety and security risks emanating from chemical, biological, radiological and nuclear materials – whether resulting from natural events, accidents or malevolent use – are increasingly shaped by technologies that enable their development, production or use in ways that differ from the past. Artificial intelligence, the use of cyberspace, the revolution in the life sciences, new manufacturing methods, new platforms and equipment for agent delivery, hypersonic weapons systems, information tools utilised in hybrid warfare – these and other technologies are reshaping the global security environment and CBRN landscape. They are leading to a growing potential for highly targeted violence, and they can lead to greater instability and vulnerability worldwide. At the same time, technology offers solutions to manage CBRN risks. Examples are faster detection, more accurate characterisation of the nature and origin of CBRN agents, new forensic investigation methods, or new medical treatments for victims of CBRN incidents. New educational concepts help to foster a culture of responsibility in science and technology and strengthen governance. New training methods help develop practical skills to manage CBRN risks more effectively. The book concludes that there is a growing need for a holistic framework towards CBRN risk mitigation. Traditional arms control mechanisms such as global, regional or bilateral treaties and export controls are still needed, as they provide a necessary legal and institutional framework. But laws and technology denial alone will not suffice, and institutional mechanisms can at times be weak. Given the pace of technological progress and the diffusion of critical knowledge, tools and materials, policymakers must accept that CBRN risks cannot be eliminated altogether. Instead,

society has to learn to manage these risks and develop resilience against them. This requires a “softer”, broadly based multi-stakeholder approach involving governments, industry, the research and development communities, educators, and civil society. Furthermore, educating policymakers that cutting-edge technologies may seriously affect global strategic stability could create incentives for developing a more creative and contemporary arms control strategy that fosters cooperation rather than incremental polarisation.

The Crusades, Christianity, and Islam Jonathan Riley-Smith, 2011 Claiming that many in the West lack a thorough understanding of crusading, Jonathan Riley-Smith explains why and where the Crusades were fought, identifies their architects, and shows how deeply their language and imagery were embedded in popular Catholic thought and devotional life.

Critical Resistance David Couzens Hoy, 2005-08-12 This book serves as both an introduction to the concept of resistance in poststructuralist thought and an original contribution to the continuing philosophical discussion of this topic. How can a body of thought that mistrusts universal principles explain the possibility of critical resistance? Without appeals to abstract norms, how can emancipatory resistance be distinguished from domination? Can there be a poststructuralist ethics? David Hoy explores these crucial questions through lucid readings of Nietzsche, Foucault, Bourdieu, Derrida, and others. He traces the

genealogy of resistance from Nietzsche's break with the Cartesian concept of consciousness to Foucault's and Bourdieu's theories of how subjects are formed through embodied social practices. He also considers Levinas, Heidegger, and Derrida on the sources of ethical resistance. Finally, in light of current social theory from Judith Butler to Slavoj Žižek, he challenges poststructuralism as a category and suggests the term post-critique as a more accurate description of contemporary Continental philosophy. Hoy is a leading American scholar of poststructuralism. *Critical Resistance* is the only book in English that deals substantively with the topical concept of resistance in relation to poststructuralist thought, discussions of which have dominated Continental social thought for many years.

Le Songe Du Vieil Pelerin Philippe de Mezieres, G. W. Coopland, 2009-06-18 This French medieval text is now published in its entirety, accompanied by an introduction and extensive synopses in English. Philippe de Mezieres (1327-1405) was a French soldier, publicist and statesman who travelled widely through much of the Christian world and served a number of rulers, particularly the King of Cyprus and Charles V and VI of France. Throughout his life Philippe de

Mezieres was obsessed by the ideal that the West must reform itself in the light of the Christian view of the good life and he urged all Christian rulers to join together in a final crusade to liberate the Holy Land and the eastern Christian empires. This is the underlying theme of *Le Songe du Vieil Pelerin*, Philippe de Mezieres' major work. It is divided into three parts: the first is a wide-ranging survey of the Christian world, the second an examination of the state of France and the third a study of the duties and requirements of authority. The style is highly allegorical but contains much personal observation and historical fact.
