Innovation on Education and Social Sciences Irena Yolanita Maureen,Elly Matul Imah,Siti Ina Savira,Syafi'ul Anam,Masilva Reynox Mael,Lina Hartanti,2022-03-06 After a year of a global Covid-19 pandemic, still, we have more questions than answers to the future of education and our social life. It is more important than ever to follow the developments closely in the coming period, pay attention to critical concerns such as inequality, as well as positive signs of transformation and innovation in all aspects of the world of teaching and learning. Expectations on what the future brings will have to be based on solid research rather than short-term perceptions. The proceedings of IJCAH 2021 are an interdisciplinary platform for teachers, researchers, practitioners, and academicians to discuss the latest research findings, concerns, and practical challenges encountered and solutions adopted in the fields of Arts and Humanities. The subject areas within the proceeding are education, language learning, arts, culture, social sciences.

**Introductory Grammar of Amharic** Wolf Leslau,2000 This book closes the gap for beginners who want to study the Amharic language and had difficulties in finding the right grammar for this purpose: The first grammar of Amharic, the national language of Ethiopia, was published by Hiob Ludolf in 1698. The Amharic grammar published by Praetorius in 1879 is based on Amharic religious texts and on scattered material, usually composed by missionaries. A milestone in the study of Amharic is Marcel Cohen's Traite de langue amharique (1936), but this grammar, too is not completely suited for beginners since the author's generalizations are at times aimed at linguists. The grammar that comes closest to the concept of a beginner's grammar is that of C.H. Dawkin (1960), yet this grammar is extremely short, does not give examples and does not introduce the student to the intricacies of the language.The new book gives all the grammatical forms and the sentences of the present grammar in Amharic script and in phonetic transcription. The illustrative examples have a free and a literal translation. This procedure should likewise prove to be useful for the Semitist as well as for the general linguist.

Conservation and Painting Techniques of Wall Paintings on the Ancient Silk Road Shigeo Aoki,Yoko Taniguchi,Stephen Rickerby,Michiyo Mori,Takayasu Kijima,Su Bomin,Fumiyoshi Kirino,2021-03-13 This book presents recent research on ancient Silk Road wall paintings, providing an up-to-date analysis of their coloring materials and techniques, and of developments in efforts to preserve them. The destruction of the Bamiyan Buddhas in 2001 encouraged international collaboration between conservation research institutes to study and protect the Silk Road's painted heritage. The collaborations led to exciting new discoveries of the rich materials used in wall painting, including diverse pigments and colorants, and various types of organic binding media. In addition, comparative research across the region revealed shared painting practices that indicate the sophisticated exchange of technologies and ideas. In parallel with these advances in technical understanding, greater awareness and sensitivity has been fostered in endeavors to preserve this fragile heritage. The book offers insights obtained from conservation projects and ongoing research, that encompass the geographical regions and periods related to the Silk Road, including from Japan, China, Korea, India and Afghanistan, and countries of the Eastern Mediterranean region. It also discusses the current issues and future challenges in the field. Featuring concise chapters, the book is a valuable resource for students and professionals in the field of cultural heritage preservation, as well as those who are not familiar with the fascinating topic of Silk Road wall painting research.

Hydrodynamics of Ocean Wave-Energy Utilization David V. Evans,Antonio F. de O. Falcao,2012-12-06 The papers which follow were presented at an International Symposium held in Lisbon from 8-11 July 1985 on the Hydrodynamics of Ocean Wave-Energy Utilization and sponsored by the Interna tional Union of Theoretical and Applied

Mechanics. The subject of the Symposium embraced wave statistics, numerical methods, theoretical, experimental and field studies of wave energy devices. The idea of extracting useful energy from ocean waves continues to attract the curiosity of scientists and engineers in many parts of the world as the following papers indicate. Increasingly the trend is towards smaller devices suitable for use near remote island communities where wave power, as an alternative to costly diesel fuel for electric generators, is already very competitive in economic terms. The decision to build two different prototype wave-power devices into the cliffs off Bergen in Norway has provided a welcome impetus to the field, stimulating a large amount of theoretical work on oscillating water column-type devices. In particular phase control methods - in which force and velocity of a rigid body, or pressure and volume flux across a turbine are matched in phase to achieve maximum power output - rightfully occupy a central place in the papers that follow. In addition to the established workers in the field, a new generation of wave-energy enthusiasts is emerging, learning from the mistakes of others and contributing exciting ideas of both a conceptual and practical nature.

**Brain and Art** Bruno Colombo,2019-08-29 This book analyzes and discusses in detail art therapy, a specific tool used to sustain health in affective developments, rehabilitation, motor skills and cognitive functions. Art therapy is based on the assumption that the process of making art (music, dance, painting) sparks emotions and enhances brain activity. Art therapy is used to encourage personal growth, facilitate particular brain areas or activity patterns, and improve neural connectivity. Treating neurological diseases using artistic strategies offers us a unique option for engaging brain structural networks that enhance the brain's ability to form new connections. Based on brain plasticity, art therapy has the potential to increase our repertoire for treating neurological diseases. Neural substrates are the basis of complex emotions relative to art experiences, and involve a widespread activation of cognitive and motor systems. Accordingly, art therapy has the capacity to modulate behavior, cognition, attention and movement. In this context, art therapy can offer effective tools for improving general well-being, quality of life and motivation in connection with neurological diseases. The book discusses art therapy as a potential group of techniques for the treatment of neurological disturbances and approaches the relationship between humanistic disciplines and neurology from a holistic perspective, reflecting the growing interest in this interconnection.

**Atom and Archetype** C. G. Jung,Wolfgang Pauli,2014-07-21 In 1932, world-renowned physicist Wolfgang Pauli had already done the work that would win him the 1945 Nobel Prize. He was also suffering after a series of troubling personal events. He was drinking heavily, quarrelling frequently, and experiencing powerful, disturbing dreams. Pauli turned to C. G. Jung for help, forging an extraordinary intellectual conjunction not just between a physicist and a psychologist but between physics and psychology. As their acquaintance developed, Jung and Pauli discussed the nature of dreams and their relation to reality, finding surprising common ground between depth psychology and quantum physics and profoundly influencing each other's work. This portrait of an incredible friendship will fascinate readers interested in psychology, science, creativity, and genius.

**Long-Term Forensic Psychiatric Care** Birgit Völlm,Peter Braun,2019-05-16 This book provides an overview of forensic psychiatry, focusing on the provision of care in Europe as well as the legal and ethical challenges posed by long-term stays in forensic settings. Forensic psychiatric services provide care and treatment for mentally disordered offenders (MDOs) in secure in-patient facilities as well as in the community. These services are high-cost/low-volume services; they pose significant restrictions on patients and hence raise considerable ethical challenges. There is no agreed-upon standard for length of stay (LoS) in secure settings and patients' detainment periods vary considerably across countries and even within the same jurisdiction. Thus far, little research has been conducted to identify factors associated with length of stay; consequently, it remains unclear how services should be configured to meet the needs of this patient group. This volume fills some of those gaps. Furthermore, it presents new research on factors associated with length of stay, both patient-related and organisational. Various approaches to the provision of care for long-term patients in different countries are explored, including a few best practise examples in this specific area of psychiatry. The book also addresses the perspective of those working in forensic care by reviewing quality-of-life research and interviews with patients. The authors of this volume come from a range of professional backgrounds, ensuring a certain breadth and depth in the topic discussion, and even includes patients themselves as (co-)authors.

**Culinary Linguistics** Cornelia Gerhardt,Maximiliane Frobenius,Susanne Ley,2013-07-04 Language and food are universal to humankind. Language accomplishes more than a pure exchange of information, and food caters for more than mere subsistence. Both represent crucial sites for socialization, identity construction, and the everyday fabrication and perception of the world as a meaningful, orderly place. This volume on Culinary Linguistics contains an introduction to the study of food and an extensive overview of the literature focusing on its role in interplay with language. It is the only publication fathoming the field of food and food-related studies from a linguistic perspective. The research articles assembled here encompass a number of linguistic fields, ranging from historical and ethnographic approaches to literary studies, the teaching of English as a foreign language, psycholinguistics, and the study of computer-mediated communication, making this volume compulsory reading for anyone interested in genres of food discourse and the linguistic connection between food and culture. **Retinal Degenerations** Matthew M. LaVail,Joe G. Hollyfield,Robert E. Anderson,2012-12-06 The topics in this volume explore the etiology, cellular mechanisms, epidemiology, genetics, models and potential therapeutic measures for the blinding diseases of retinitis pigmentosa and age-related macular degeneration. Special focus is highlighted in the areas of Mechanisms of Photoreceptor Degeneration and Cell Death(extremely important because very little is known how or why

photoreceptors die in these diseases, despite an abundance of genetic information), Age-Related Macular Degeneration (with several novel approaches to its analysis), Usher Syndrome (the most severe form of retinitis pigmentosa, which includes an early or congenital loss of hearing along with blindness), and Gene Therapy. In addition, the section on Basic Science Related to Retinal Degeneration is particularly strong with several laboratories reporting on new discoveries in the area of outer segment phagocytosis, a key component of photoreceptor-retinal pigment epithelial cell interactions in normal and degenerating retinas.

**Discourse and Practice** Theo van Leeuwen, 2008-05-01 Adding a new introduction and two previously unpublished papers, *Discourse and Practice: New Tools for Critical Discourse Analysis* brings together van Leeuwen's methodological work on discourse analysis of the last 15 years. Discourse, van Leeuwen argues, is a resource for representation, a knowledge about some aspect of reality which can be drawn upon when that aspect of reality has to be represented, a framework for making sense of things. And they are plural. There can be different discourses, different ways of making sense of the same aspect of reality that serve different interests and will therefore be used in different social contexts. However abstract some discourses are, discourses ultimately always represent doings, van Leeuwen argues. Doing is the foundation of knowing, and social practices are the foundation of discourses. Studying children's books, newspaper reports, brochures and other texts, as well as photographs and children's toys, van Leeuwen investigates what can happen when practices are transformed into discourses and provides analytical tools for reconstructing discourses from texts. Throughout the book, van Leeuwen makes connections between sociological and linguistic or semiotic concepts and methods to ensure the social and critical relevance of his analytical categories. van Leeuwen's work has already been widely used by critical discourse analysts across the world. This volume will be a welcome guide for anyone looking for a form of discourse analysis that is both explicit and methodical, and critically incisive.
