Ethnic and Religious Minorities in Stalin's Soviet Union A. S. Kotljarchuk, Olle Sundström, 2017-12-12 This anthology presents studies of Stalinism in the ethnic and religious borderlands of the Soviet Union. The authors not only cover hitherto less researched geographical areas, but have also addressed new questions and added new source material. Most of the contributors to this anthology use a micro-historical approach. With this approach, it is not the entire area of the country, with millions of separate individuals that are in focus but rather particular and cohesive ethnic and religious communities. Micro-history does not mean ignoring a macro-historical perspective. What happened on the local level had an all-Union context, and communism was a European-wide phenomenon. This means that the history of minorities in the Soviet Union during Stalin's rule cannot be grasped outside the national and international context; aspects which are also considered in this volume. The chapters of the book are case studies on various minority groups, both ethnic and religious. In this way, the book gives a more complex picture of the causes and effects of the state-run mass violence during Stalinism. The publication is the outcome of a multidisciplinary international research network lead by Andrej Kotljarchuk (Södertörn University, Sweden) and Olle Sundström (Umeå University, Sweden) and consisting of specialists from Estonia, France, Germany, Russia, Sweden, Ukraine and the United States. These scholars represent various disciplines: Anthropology, Cultural Studies, History and the History of Religions.

Holy Blood, Holy Grail Michael Baigent, Richard Leigh, Henry Lincoln, 2007-12-18 Is the traditional, accepted view of the life of Christ in some way incomplete? • Is it possible Christ

did not die on the cross? • Is it possible Jesus was married, a father, and that his bloodline still exists? • Is it possible that parchments found in the South of France a century ago reveal one of the best-kept secrets of Christendom? • Is it possible that these parchments contain the very heart of the mystery of the Holy Grail? According to the authors of this extraordinarily provocative, meticulously researched book, not only are these things possible — they are probably true! so revolutionary, so original, so convincing, that the most faithful Christians will be moved; here is the book that has sparked worldwide controversy. Enough to seriously challenge many traditional Christian beliefs, if not alter them. — Los Angeles Times Book Review Like Chariots of the Gods?...the plot has all the elements of an international thriller. — Newsweek

Information Gathering in Classical Greece Frank Santi Russell, 1999 Information Gathering in Classical Greece opens with chapters on tactical, strategic, and covert agents. Methods of communication are explored, from fire-signals to dead-letter drops. Frank Russell categorizes and defines the collectors and sources of information according to their era, methods, and spheres of operation, and he also provides evidence from ancient authors on interrogation and the handling and weighing of information. Counterintelligence is also explored, together with disinformation through leaks and agents. The author concludes this fascinating study with observations on the role that intelligence-gathering has in the kind of democratic society for which Greece has always been famous--Publisher description.

Phase Line Attila Edward J. Erickson, Mesut Uyar, 2020 This monograph will prove to be one of the more valuable works ever written on the efficacy of modern era amphibious warfare. While many students of military affairs have assumed that large-scale forcible

entry amphibious operations are a thing of the past, the authors have done an outstanding job, in just eight concise and well-written chapters, to demonstrate how amphibious warfare, in combination with other joint operations, can prove decisive on modern-day battlefields. Covering a little-known combat operation that incredibly involved two neighboring North Atlantic Treaty Organization (NATO) allies--Greece and Turkey--the 1974 battle known in Turkey as Operation Star Drop-4 and erroneously in the West as Operation Attila, took place on the perpetually restive island nation of Cyprus. Moreover, the authors have finally brought to light what is arguably only one of two such [amphibious] operations fought since 1945 that involved a substantially opposed landing. The operation also included the heavy use of airborne, airmobile, naval surface, and other follow-on armored forces that proved decisive toward relative Turkish success on Cyprus in 1974--

DNA Tumor Viruses Blossom Damania, James Pipas, 2008-12-19 This unique book focuses on the DNA viruses in the human population that are associated with cancers. It covers most of the viruses that are thought to contribute to human malignancy. This book represents a comprehensive review of the field of DNA tumor virology. Right now, while there are books out there that cover individual viruses that are also covered in this book, there is no single book that covers this topic comprehensively. This book is the first current, comprehensive review of its kind in the market.

An ideal textbook for all international courses covering media and communication studies. Considers the history of propaganda and how it has become

increasingly pervasive due to access to ever-complex and versatile media. Written in an accessible style and format, this book has proven its appeal to the general reader as the public becomes more and more cynical of the manipulations of the political sphere.

Neo-Assyrian and Greek Divination in War Krzysztof Ulanowski, 2020-10-20 Neo-Assyrian and Greek Divination in War is about practices which enabled humans contact the divine. These relations, especially in difficult times of military conflict, could be crucial in deciding the fate of individuals, cities, dynasties or even empires.

Security, Privacy, and Trust in Modern Data Management Milan Petkovic, Willem Jonker, 2007-06-12 The vision of ubiquitous computing and ambient intelligence describes a world of technology which is present anywhere, anytime in the form of smart, sensible devices that communicate with each other and provide personalized services. However, open interconnected systems are much more vulnerable to attacks and unauthorized data access. In the context of this threat, this book provides a comprehensive guide to security and privacy and trust in data management.

British Intelligence and Covert Action Jonathan Bloch, 1983

Khartoum at Night Marie Grace Brown, 2017-08-22 In the first half of the twentieth century, a pioneering generation of young women exited their homes and entered public space, marking a new era for women's civic participation in northern Sudan. A provocative new public presence, women's civic engagement was at its core a bodily experience. Amid the socio-political upheavals of imperial rule, female students, medical workers, and activists used a careful choreography of body movements and fashion to adapt to imperial mores, claim opportunities for political agency, and shape a new standard of modern,

mobile womanhood. *Khartoum at Night* is the first English-language history of these women's lives, examining how their experiences of the British Empire from 1900–1956 were expressed on and through their bodies. Central to this story is the *tobe*: a popular, modest form of dress that wrapped around a woman's head and body. Marie Grace Brown shows how northern Sudanese women manipulated the tucks, folds, and social messages of the *tobe* to deftly negotiate the competing pulls of modernization and cultural authenticity that defined much of the imperial experience. Her analysis weaves together the threads of women's education and activism, medical midwifery, urban life, consumption, and new behaviors of dress and beauty to reconstruct the worlds of politics and pleasure in which early-twentieth-century Sudanese women lived.

The Talking Greeks John Heath, 2009-07-30 What drove the ancient Greeks to explore human nature and invent Western politics? This book argues that the Greeks believed speech made humans different from other animals. But, this zoological comparison also provided the metaphorical means for viewing those 'lacking' authoritative speech--women, barbarians, and slaves, etc.--as bestial. This link between speech, humanity, and status is revealed through close study of both Homeric epics, classical Athenian culture, Aeschylus' *Oresteia*, and Plato's *Dialogues*.

Protagonists of War Raymond Fagel, 2021-10-01 Julián Romero, Sancho Dávila, Cristóbal de Mondragón, and Francisco de Valdés were prominent Spanish military commanders during the first decade of the Revolt in the Low Countries (1567–1577). Occupying key positions in this conflict, they featured as central characters in various war narratives and episodic descriptions of the events they were involved in, ranging from chronicles, poems,

theatre plays, engravings, and songs to news pamphlets. To this day, they still figure as protagonists of historical novels: brave heroes in some, cruel oppressors in others. Yet personal, first-hand accounts also exist. Archival research into the letters written by these commanders now makes it possible to include their perspectives and the way they describe their own experiences. Looking through the eyes of four Spanish commanders, *Protagonists of War* provides the reader with an alternative reading of the Revolt, contrasting the subjective experiences of these protagonists with fictionalised perceptions.

A Marxist History of the World Neil Faulkner, 2013-04-09 This magisterial analysis of human history - from Lucy, the first hominid, to the Great Recession of 2008 - combines the insights of earlier generations of Marxist historians with radical new ideas about the historical process. Reading history against the grain, Neil Faulkner reveals that what happened in the past was not predetermined. Choices were frequent and numerous. Different outcomes - liberation or barbarism - were often possible. Rejecting the top-down approach of conventional history, Faulkner contends that it is the mass action of ordinary people that drives great events. At the beginning of the 21st century - with economic disaster, war, climate catastrophe and deep class divisions - humans face perhaps the greatest crisis in the long history of our species. The lesson of *A Marxist History of the World* is that, since we created our past, we can also create a better future.

Hitler's War in Africa 1941-1942 David Mitchelhill-Green, 2021-08-04 Adolf Hitler's war in Africa arose from the urgent need to reinforce the Italian dictator, Benito Mussolini, whose 1940 invasion of Egypt had been soundly beaten. Of secondary importance to his ideological dream of conquering the Soviet Union, Germany's Führer rushed a small

mechanised force into the unfamiliar North African theatre to stave off defeat and avert any political fallout. This fresh account begins with the arrival of the largely unprepared German formations, soon to be stricken by disease and heavily reliant upon captured materiel, as they fought a bloody series of see-sawing battles across the Western Desert. David Mitchelhill-Green has gathered a wealth of personal narratives from both sides as he follows the brash exploits of General Erwin Rommel, intent on retaking Libya; the Nile firmly in his sights. Against this backdrop is the brutal human experience of war itself.

Mapping Global Theatre Histories Mark Pizzato, 2019-05-02 This textbook provides a global, chronological mapping of significant areas of theatre, sketched from its deepest history in the evolution of our brain's 'inner theatre' to ancient, medieval, modern, and postmodern developments. It considers prehistoric cave art and built temples, African trance dances, ancient Egyptian and Middle-Eastern ritual dramas, Greek and Roman theatres, Asian dance-dramas and puppetry, medieval European performances, global indigenous rituals, early modern to postmodern Euro-American developments, worldwide postcolonial theatres, and the hyper-theatricality of today's mass and social media. Timelines and numbered paragraphs form an overall outline with distilled details of what students can learn, encouraging further explorations online and in the library. Questions suggest how students might reflect on present parallels, making their own maps of global theatre histories, regarding geo-political theatrics in the media, our performances in everyday life, and the theatres inside our brains.

Cheating and Deception J. Bowyer Bell, Barton Whaley, 2017-09-04 Cheating and deception are terms often used but rarely defined. They summon up unpleasant

connotations; even those deeply involved with cheating and deception rationalize why they have been driven to it. Particularly for Americans and much of Western civilization, official cheating, government duplicity, cheating as policy, and conscious, contrived deception, are all unacceptable except as a last resort in response to threat of extinction. As a distasteful tool, deception is rarely used to achieve national interests, unless in relation to the deployment of military force. As an area of study, it has by and large been ignored. Intrigued by attitudes toward cheating and deception, the authors decided to analyze its roots, structure, and process. They asked fundamental questions: are there categories of deception, general steps in the process of deception, and ways to evaluate its results across time and in different modes? The book that results is a typology of kinds of deception, beginning with military deception, but extending into other categories and stages. In his introduction to this new edition, Bell outlines how the book came to be written, describes the mixed emotions toward the subject displayed by governmental and nongovernmental funding sources, and speculates about its critical and commercial reception. He discusses widespread new interest in the subject, the research that has been undertaken since this book was first published, and its limitations. This book provides a general overview of this complex subject, creating a framework for analysis of specific instances of cheating or deception. It will be of particular interest to political scientists, those interested in military affairs and strategy, and psychologists. The general reader will find the book written with a light touch, drawing examples of cheating and deception in the pursuit of love and money. The specialist reader will be intrigued by its broad-ranging examples drawn from policy and politics,

Of Arms and Men Robert L. O'Connell, 1990-04-19 The appearance of the crossbow on the European battle field in A.D. 1100 as the weapon of choice for shooting down knights threatened the status quo of medieval chivalric fighting techniques. By 1139 the Church had intervened, outlawing the use of the crossbow among Christians. With this edict, arms control was born. As Robert L. O'Connell reveals in this vividly written history of weapons in Western culture, that first attempt at an arms control measure characterizes the complex and often paradoxical relationship between men and arms throughout the centuries. In a sweeping narrative that ranges from prehistoric times to the nuclear age, O'Connell demonstrates how social and economic conditions determine the types of weapons and the tactics used in warfare and how, in turn, innovations in weapons technology often undercut social values. He describes, for instance, how the invention of the gun required a redefinition of courage from aggressive ferocity to calmness under fire; and how the machine gun in World War I so overthrew traditional notions of combat that Lord Kitchener exclaimed, This isn't war! The technology unleashed during the Great War radically altered our perceptions of ourselves, as these new weapons made human qualities almost irrelevant in combat. With the invention of the atomic bomb, humanity itself became subservient to the weapons it had produced. *Of Arms and Men* brilliantly integrates the evolution of politics, weapons, strategy, and tactics into a coherent narrative, one spiced with striking portraits of men in combat and penetrating insights into why men go to war.

Walled Up to Heaven Aaron Burke, 2018-07-17 As the first comprehensive study of fortification systems and defensive strategies in the Levant during the Middle Bronze Age (ca. 1900 to 1500 B.C.E.), this book is an indispensable contribution to the study of early

warfare in the ancient Near East.
