South African Urban Change Three Decades After Apartheid Anthony Lemon,Ronnie Donaldson,Gustav Visser,2021-06-10 This book provides an analysis of South African urban change over the past three decades. It draws on a seminal text, *Homes Apart*, and revisits conclusions drawn in that collection that marked the final phases of urban apartheid. It highlights changes in demography, social as well as economic structure and their differential spatial expression across a range of urban sites in South Africa. The evidence presented in this book points to a very complex set of narratives in urban South Africa and one that cannot be reduced to a singular statement so the conclusions of the various investigations are in many ways open. As urban apartheid represented one clear outcome, its post-apartheid urban legacies varies greatly from city to city. As such this book is a great resource to students and academics focused on urban change in South African cities since the demise of apartheid, and scholars of urban policy-making in South Africa and Southern urbanists generally.
