**Notational Analysis of Sport** Mike Hughes, Ian M. Franks, 2004 This collection of essays and reviews represents the most significant and comprehensive writing on Shakespeare's *A Comedy of Errors*. Miola's edited work also features a comprehensive critical history, coupled with a full bibliography and photographs of major productions of the play from around the world. In the collection, there are five previously unpublished essays. The topics covered in these new essays are women in the play, the play's debt to contemporary theater, its critical and performance histories in Germany and Japan, the metrical variety of the play, and the distinctly modern perspective on the play as containing dark and disturbing elements. To compliment these new essays, the collection features significant scholarship and commentary on *The Comedy of Errors* that is published in obscure and difficult accessible journals, newspapers, and other sources. This collection brings together these essays for the first time.

**The Palgrave Handbook of Wine Industry Economics** Adeline Alonso Ugaglia, Jean-Marie Cardebat, Alessandro Corsi, 2019-03-15 This Palgrave Handbook offers the first international comparative study into the efficiency of the industrial organization of the global wine industry. Looking at several important vineyards of the main wine countries, the contributors analyze differences in implementation and articulation of three key stages: grape production, wine making and distribution (marketing, selling and logistics). By examining regulations, organization theory, industry organizational efficiency and vertical integration, up to date strategies in the sector are presented and appraised. Which models are most efficient? What are the most relevant factors for optimal performance? How do reputation and governance impact the industry? Should different models co-exist within the wine countries for global success? This comprehensive volume is essential reading for students, researchers and professionals in the wine industry.

**Foundations of the Nazi Police State** George C. Browder, 2021-05-11 A comprehensive study of the lesser-known organizations that formed the heart of the Nazi police state in World War II Germany. The abbreviation "Nazi," the acronym "Gestapo," and the initials "SS" have become resonant elements of our vocabulary. Less known is "SD," and hardly anyone recognizes the combination "Sipo and SD." Although Sipo and SD formed the heart of the National Socialist police state, the phrase carries none of the ominous impact that it should. Although no single organization carries full responsibility for the evils of the Third Reich, the SS-police system was the executor of terrorism and "population policy" in the same way the military carried out the Reich's imperialistic aggression. Within the police state, even the concentration camps could not rival the impact of Sipo and SD. It was the source not only of the "desk murderers" who administered terror and genocide by assigning victims to the camps, but also of the police executives for identification and arrest, and of the command and staff for a major instrument of execution, the Einsatzgruppen. *Foundations of the Nazi Police State* offers the narrative and analysis of the external struggle that created Sipo and SD. This book is the author's preface to his discussion of the internal evolution of these organizations in Hitler's *Enforcers: The Gestapo and the SS Security Service in the Nazi Revolution*. "A welcome addition to the literature on National Socialist Germany." —*American Historical Review* "Sheds new light on Himmler's role in the complex web of the Nazi police state." —*Publishers Weekly* "[The book] makes major changes in our understanding of the structure and functioning of the Nazi police state." —*Canadian Journal of History* "This is the first comprehensive study of how the Gestapo and all other detective police came to be united under the Sipo (Security Police) and tied to the SD (The Security Services of the Party and SS)." —*Educational Book Review* "The work fills an important gap in the literature on the Third Reich." —*The Historian*

**Cyclooxygenases** Samir S. Ayoub, Roderick J. Flower, Michael Seed, 2016-08-23 Since the discovery of the pharmacological and toxicological importance of inhibiting the cyclooxygenase (COX) enzymes by non-steroidal anti-inflammatory drugs (NSAIDs), much research has gone into the development of methods to study the biological functions of COX-1 and COX-2. In *Cyclooxygenases: Methods and Protocols*, experts and pioneers in the field present the most up-to-date in vitro and in vivo techniques routinely used in COX research. The volume delves into essential topics such as the purification, cloning, and expression of COX enzymes as well as in vitro assays aimed at determining the inhibitory potency of drugs on COX-1 and COX-2 activities, with chapters describing protocols used for the extraction and measurement of the prostanoids. This volume also describes in vivo disease models used to study the roles of COX-1 and COX-2 in gastrointestinal injury, inflammation, and pain. As a book in the highly successful *Methods in Molecular Biology*™ series, the protocols chapters include brief introductions to their respective topics, lists of the necessary materials and reagents, step-by-step, readily reproducible laboratory protocols, and notes on troubleshooting and avoiding known pitfalls. Authoritative and cutting-edge, *Cyclooxygenases: Methods and Protocols* serves as an indispensable tool for all scientists seeking the treatment of inflammation, pain, fever, and other harmful conditions.

**Competing for Global Talent** International Labour Office, 2006 Global talent has never been more mobile or sought after. A complex phenomenon that takes many forms, the movement of people with skills includes migrants crossing borders for temporary stays abroad as well as settlement, students moving for degrees and temporary and permanent stays, and even tourists and refugees who decide to stay abroad and use their skills. Countries attracting global talent increase their stock of human and technological skills, and in the past decade many have welcomed foreign professionals and students to redress domestic skill shortages and to quicken economic growth. This book includes general and theoretical papers on skilled migration and also papers on the country experiences of Australia, India, Japan, Singapore, the United Kingdom, and the United States. It addresses the socio-economic and cultural challenges created by increased mobility in a world where globalizing and localizing forces are at work simultaneously.

**Business as Mission** C. Neal Johnson, 2011-10-10 Business as mission (BAM) is a mission strategy whose time has

come. As global economics become increasingly interconnected, Christian business people and entrepreneurs have unanticipated opportunities to build kingdom-strategic business ventures. But Christian companies and business leaders do not automatically accomplish missional purposes. BAM requires mastery of both the world of business and the world of missions, merging and contextualizing both into something significantly different than either alone. C. Neal Johnson offers the first comprehensive guide to business as mission for practitioners. He provides conceptual foundations for understanding BAM's unique place in global mission and prerequisites for engaging in it. Then he offers practical resources for how to do BAM, including strategic planning and step-by-step operational implementation. Drawing on a wide variety of BAM models, Johnson works through details of both mission and business realities, with an eye to such issues as management, sustainability and accountability. Business as mission is a movement with enormous potential. This book breaks new ground in how faith and work intersect and are lived out in crosscultural contexts, where job creation and community transformation go hand in hand. Come, participate in what may well be one of the most strategic mission paradigms of the 21st century.

*Thermodynamic Properties of Cryogenic Fluids* Jacob W. Leachman, Richard T. Jacobsen, Eric W. Lemmon, Steven G. Penoncello, 2017-07-30 This update to a classic reference text provides practising engineers and scientists with accurate thermophysical property data for cryogenic fluids. The equations for fifteen important cryogenic fluids are presented in a basic format, accompanied by pressure-enthalpy and temperature-entropy charts and tables of thermodynamic properties. It begins with a chapter introducing the thermodynamic relations and functional forms for equations of state, and goes on to describe the requirements for thermodynamic property formulations, needed for the complete definition of the thermodynamic properties of a fluid. The core of the book comprises extensive data tables and charts for the most commonly-encountered cryogenic fluids. This new edition sees significant updates to the data presented for air, argon, carbon monoxide, deuterium, ethane, helium, hydrogen, krypton, nitrogen and xenon. The book supports and complements NIST's REFPROP - an interactive database and tool for the calculation of thermodynamic properties of cryogenic fluids.

**Strategic Deals in Emerging Capital Markets** Irina Ivashkovskaya, Svetlana Grigorieva, Eugene Nivorozhkin, 2019-12-09 The industrial development of emerging markets has been a powerful driver for mergers and acquisitions. In addition, the book explores various dimensions of M&A deals in order to summarize the main trends in corporate control markets in the largest emerging countries, and how they differ from those in developed countries; to identify deal-performance relationships and the determinants of success or failure; to reveal the drivers for the premium in M&A deals; and to capture market responses to different M&A strategies. By doing so, the book makes a significant contribution to the literature, which has to date largely focused on developed markets.

**Teaching Undergraduates with Archives** Nancy Bartlett,Elizabeth Gadelha,Cinda Nofziger,2019-12-20 Teaching Undergraduates with Archives mirrors the evolving practice and academic research on primary sources in the classroom. The result of a national symposium at the University of Michigan in 2018, the volume features case studies, reflections, and forecasts concerning critical thinking, active learning, and archival evidence. The chapters describe collaborations between faculty, archivists, librarians, and students. Ideas behind new assignments and syllabi provide an immediate utility for those who teach with primary sources. Testimonies to the challenges and benefits of robust programs speak to the emerging prioritization of teaching and learning across disciplines with archives and special collections. The contributions to this volume capture exceptionally well the passion and the creativity that archivists and special collections librarians who teach and do outreach with primary sources are bringing to their work in this increasingly important activity domain. -- Martha O'Hara Conway, Director, Special Collections Research Center, University of Michigan Library As teaching with archival materials has moved to the foreground of the archival mission for many institutions, this timely, inspiring, and practical volume, which comes out of the multi-day symposium solely devoted to teaching undergraduates with archival materials, is a required reading for anyone who teaches with archival materials, or who would like to. It really captures the spirit and enthusiasm that these authors brought to that symposium. -- Josué Hurtado, Coordinator of Public Services & Outreach, Special Collections Research Center, Temple University Libraries Reflecting the increasing priority of teaching in archives and special collections libraries, this book captures a variety of perspectives, insights, approaches, and prognostications that will enlighten, challenge, and inspire a growing community of practitioners. -- Bill Landis, Head of Public Services, Manuscripts and Archives, Yale University Library Building on the momentum generated at the symposium, this book is a treasure trove for professionals in the field who are eager for innovative ideas regarding collaboration and experimentation in teaching with archival material. -- Elizabeth Williams-Clymer, Special Collections Librarian, Kenyon College
