Excel Custom Functions Suat M Ozgur,2019-07-19 Excel users are used to build custom functions—called user-defined functions (UDFs)—in Windows and Mac versions of the application. UDFs can be simply written in Visual Basic Editor (VBE) using the Visual Basic for Applications (VBA) language.UDFs are not portable to Excel Online and Excel for iOS due to the missing VBA capability on these platforms. Therefore, Microsoft has improved the JavaScript API that was already being used for Office add-in development to allow developers to create custom functions attached to the add-ins. These custom functions can be used like any other native functions or UDFs in Excel. While Microsoft calls these functions JavaScript custom functions, they can also be called JavaScript UDFs, which is the name used in this book.This book shows the process of creating JavaScript UDFs in Excel in Developer Preview for Office Insider program subscribers.

Easy Programming with Visual Basic for Applications (VBA) Olga Maria Stefania Cucaro,2020-10-01 This work was born from the need found by the author to solve various problems repeated over time, concerning the data inserted in Excel sheets in the shortest possible time. The author, being a programmer and expert in Pascal, Cobol and Javascript, searched for the most suitable solution and found it in the Excel VBA. This document is intended to introduce users to programming in general and to programming in Visual Basic for Applications of Excel in particular. VBA is simple and can be used on existing Excel files, quickly processing a large amount of data. The only tool we need is Excel. The book may not contain everything you should know about programming in VBA, but it does point the finger at the key points to create some programs which are explained in detail in the various chapters. The content is divided into two parts, one which explains programming in general and the second which explains programming in VBA with concrete examples of programs.
