Introduction to AutoCAD 2012 Alf Yarwood,2013-02-01

Master the complexities of the world's bestselling 2D and 3D software with Alf Yarwood's new Introduction to AutoCAD 2012. Ideally suited to new users of AutoCAD, this book will be a useful resource for drawing modules in both vocational and introductory undergraduate courses in engineering and construction. Alf Yarwood has once again produced a comprehensive, step-by-step introduction to the latest release of AutoCAD. Covering all the basic principles and acting as an introduction to 2D drawing, it also contains extensive coverage of all 3D topics, including 3D solid modelling and rendering. A fold-out list of frequently used keyboard shortcuts will help you perform actions quickly while working through the book, and an appendix of ribbon references clearly describes all the software tools that are used throughout the book. Further education students in the UK will find this an invaluable textbook for City and Guilds AutoCAD qualifications as well as the relevant Computer Aided Drawing units of BTEC National Engineering, Higher National Engineering and Construction courses from Edexcel. Students enrolled in Foundation Degree courses containing CAD modules will also find this a very useful reference and learning aid. Readers will also be able to visit a free companion website at: www.introtoautocad2012.com where they will find worked solutions and AutoCAD drawing files of stages, and results for the exercises in this book, as well as further exercises and multiple-choice questions with answers.

Performance Evaluation of Computer and Communication Systems. Milestones and Future Challenges Karin Anna Hummel,Helmut Hlavacs,Wilfried Gansterer,2011-12-13 This Festschrift volume is published in honor of Günter Haring on the occasion of his emerital celebration and contains invited papers by key researchers in the field of performance evaluation presented at the workshop Performance Evaluation of Computer and

Communication Systems - Milestones and Future Challenges, PERFORM 2010, held in Vienna, Austria, in October 2010. Günter Haring has dedicated most of his scientific professional life to performance evaluation and the design of distributed systems, contributing in particular to the field of workload characterization. In addition to his own contributions and leadership in international research projects, he is and has been an excellent mentor of young researchers demonstrated by their own brilliant scientific careers. The 20 thoroughly refereed papers range from visionary to in-depth research papers and are organized in the following topical sections: milestones and evolutions; trends: green ICT and virtual machines; modeling; mobility and mobile networks; communication and computer networks; and load balancing, analysis, and management.

Modelling and use of SysML behaviour models for achieving dynamic use cases of technical products in different VR-systems Atif Mahboob,2021-01-01 This thesis presents a method that aims at achieving generic behavioural descriptions for use in Virtual Reality (VR) that can also be reused to form dynamic use cases of a product in different VR-systems. The focus lies on reducing the overall preparation effort of VR-models and on achieving high reusability of already created models. The core components of the thesis consist of the use of Model Based Systems Engineering (MBSE) to develop generic behavioural model descriptions, their use in building different use cases of a product in one VR-system and their reuse in different VR-systems as well. The Systems Modeling Language (SysML) is used to describe the behavioural models, the modelling process is described systematically and is also summarised in the form of general-purpose guidelines for later use. Furthermore, a dedicated physics engine is integrated with these descriptions. Two VR prototypes are developed to demonstrate the effectivity and use

of the presented method. Finally, one of the prototypes is put to empirical evaluation performed with the help of experts from academia as well as industry.

Innovation and Disruption at the Grid's Edge Fereidoon P. Sioshansi,2017-05-10 Innovation and Disruption at the Grid's Edge examines the viable developments in peer-to-peer transactions enabled by open platforms on the grid's edge. With consumers and prosumers using more electronic platforms to trade surplus electricity from rooftop solar panels, share a storage battery, or use smart gadgets that manage load and self-generation, the grid's edge is becoming crowded. The book examines the growing number of consumers engaging in self-generation and storage, and analyzes the underlying causes and drivers of change, as well as the implications of how the utility sector—particularly the distribution network—should/could be regulated. The book also explores how tariffs are set and revenues are collected to cover both fixed and variable costs in a sustainable way. This reference is useful for anyone interested in the areas of energy generation and regulation, especially stakeholders engaged in the generation, transmission, and distribution of power. Examines the new players that will disrupt the energy grid markets Offers unique coverage of an emerging and unpublished topic Helps the reader understand up-to-date energy regulations and pricing innovations

Alfred Herbert Ltd and the British Machine Tool Industry, 1887-1983 Roger Lloyd-Jones,M.J. Lewis,2017-09-29 At the beginning of the twentieth century Britain was amongst the

world leaders in the production of machine tools, yet by the 1980s the industry was in terminal decline. Focusing on the example of Britain's largest machine tool maker, Alfred Herbert Ltd of Coventry, this study charts the wider fortunes of this vital part of the manufacturing sector. Taking a chronological approach, the book explores how during the late nineteenth century the industry developed a reputation for excellence throughout the world, before the challenges of two world wars necessitated drastic changes and reorganisations. Despite meeting these challenges and emerging with confidence into the post-war market place, the British machine tool industry never regained its pre-eminent position, and increasingly lost ground to foreign competition. By using the example of Alfred Herbert Ltd to illuminate the broader economic and business history of the British machine tool industry, this study not only provides a valuable insight into British manufacturing, but also contributes to the ongoing debates surrounding Britain's alleged decline as a manufacturing nation.

Uruguay International Monetary Fund. Western Hemisphere Dept.,2014-01-10 This Selected Issues paper examines the drivers and implications of the agricultural land price boom in Uruguay. It finds that almost half of the increase in agricultural land prices between 2000 and 2010 can be explained by commodity price dynamics. At the same time, farmland prices are estimated to

have played an important role in the transmission of commodity price shocks to economic activity, accounting for about 30 percent of the effect of commodity price shocks on GDP growth in the region. The paper also examines the performance of Uruguay's exports and external balances over the past decade.
