Biofuel Cells Inamuddin, Mohd Imran Ahamed, Rajender Boddula, Mashallah Rezakazemi, 2021-08-03 Rapid industrialization and urbanization associated with the environment changes calls for reduced pollution and thereby least use of fossil fuels. Biofuel cells are bioenergy resources and biocompatible alternatives to conventional fuel cells. Biofuel cells are one of the new sustainable renewable energy sources that are based on the direct conversion of chemical matters to electricity with the aid of microorganisms or enzymes as biocatalysts. The gradual depletion of fossil fuels, increasing energy needs, and the pressing problem of environmental pollution have stimulated a wide range of research and development efforts for renewable and environmentally friendly energy. Energy generation from biomass resources by employing biofuel cells is crucial for sustainable development. Biofuel cells have attracted considerable attention as micro- or even nano-power sources for implantable biomedical devices, such as cardiac pacemakers, implantable self-powered sensors, and biosensors for monitoring physiological parameters. This book covers the most recent developments and offers a detailed overview of fundamentals, principles, mechanisms, properties, optimizing parameters, analytical characterization tools, various types of biofuel cells, all-category of materials, catalysts, engineering architectures, implantable biofuel cells, applications and novel innovations and challenges in this sector. This book is a reference guide for anyone working in the areas of energy and the environment.

Book Trade Catalogues in Early Modern Europe Arthur der Weduwen, Andrew Pettegree, Graeme Kemp, 2021-07-19 This edited collection offers in seventeen chapters the latest scholarship on book catalogues in early modern Europe. Contributors discuss the role that these catalogues played in bookselling and book auctions, as well as in guiding the tastes of book

collectors and inspiring some of the greatest libraries of the era. Catalogues in the Low Countries, Britain, Germany, France and the Baltic region are studied as important products of the early modern book trade, and as reconstructive tools for the history of the book. These catalogues offer a goldmine of information on the business of books, and they allow scholars to examine questions on the distribution and ownership of books that would otherwise be extremely difficult to pursue. Contributors: Helwi Blom, Pierre Delsaerdt, Arthur der Weduwen, Anna E. de Wilde, Shanti Graheli, Ann-Marie Hansen, Rindert Jagersma, Graeme Kemp, Ian Maclean, Alicia C. Montoya, Andrew Pettegree, Philippe Schmid, Forrest C. Strickland, Jasna Tingle, Marieke van Egeraat, and Elise Watson.

Cyber Zen Gregory Price Grieve, 2016-12-08 Cyber Zen ethnographically explores Buddhist practices in the online virtual world of Second Life. Does typing at a keyboard and moving avatars around the screen, however, count as real Buddhism? If authentic practices must mimic the actual world, then Second Life Buddhism does not. In fact, a critical investigation reveals that online Buddhist practices have at best only a family resemblance to canonical Asian traditions and owe

much of their methods to the late twentieth-century field of cybernetics. If, however, they are judged existentially, by how they enable users to respond to the suffering generated by living in a highly mediated consumer society, then Second Life Buddhism consists of authentic spiritual practices. Cyber Zen explores how Second Life Buddhist enthusiasts form communities, identities, locations, and practices that are both products of and authentic responses to contemporary Network Consumer Society. Gregory Price Grieve illustrates that to some extent all religion has always been virtual and gives a glimpse of possible future alternative forms of religion.

The Secret Life of Puppets Victoria Nelson, 2009-07-01 In one of those rare books that allows us to see the world not as we've never seen it before, but as we see it daily without knowing, Victoria Nelson illuminates the deep but hidden attraction the supernatural still holds for a secular mainstream culture that forced the transcendental underground and firmly displaced wonder and awe with the forces of reason, materialism, and science. In a backward look at an era now drawing to a close, *The Secret Life of Puppets* describes a curious reversal in the roles of art and religion: where art and literature once took their content from religion, we came increasingly to seek religion, covertly, through art and entertainment. In a tour of Western culture that is at once exhilarating and alarming, Nelson shows us the distorted forms in which the spiritual resurfaced in high art but also, strikingly, in the mass culture of puppets, horror-fantasy literature, and cyborgs: from the works of Kleist, Poe, Musil, and Lovecraft to Philip K. Dick and virtual reality simulations. At the end of the

millennium, discarding a convention of the demonized grotesque that endured three hundred years, a Demiurgic consciousness shaped in Late Antiquity is emerging anew to re-divinize the human as artists like Lars von Trier and Will Self reinvent Expressionism in forms familiar to our pre-Reformation ancestors. Here as never before, we see how pervasively but unwittingly, consuming art forms of the fantastic, we allow ourselves to believe.
