Public Opinion Walter Lippmann,1922 In what is widely considered the most influential book ever written by Walter Lippmann, the late journalist and social critic provides a fundamental treatise on the nature of human information and communication. The work is divided into eight parts, covering such varied issues as stereotypes, image making, and organized intelligence. The study begins with an analysis of the world outside and the pictures in our heads, a leitmotif that starts with issues of censorship and privacy, speed, words, and clarity, and ends with a careful survey of the modern newspaper. Lippmann's conclusions are as meaningful in a world of television and computers as in the earlier period when newspapers were dominant. *Public Opinion* is of enduring significance for communications scholars, historians, sociologists, and political scientists. Differential Forms in Algebraic Topology Raoul Bott,Loring W. Tu,2013-04-17 Developed from a first-year graduate course in algebraic topology, this text is an informal introduction to some of the main ideas of contemporary homotopy and cohomology theory. The materials are structured around four core areas: de Rham theory, the Cech-de Rham complex, spectral sequences, and characteristic classes. By using the de Rham theory of differential forms as a prototype of cohomology, the machineries of algebraic topology are made easier to assimilate. With its stress on concreteness, motivation, and readability, this book is equally suitable for self-study and as a one-semester course in topology.

Managing the Undesirables Michel Agier,2011-01-25 Official figures classify some fifty million of the world's people as 'victims of forced displacement'. Refugees, asylum seekers, disaster victims, the internally displaced and the temporarily tolerated - categories of the excluded proliferate, but many more are left out of count. In the face of this tragedy, humanitarian action increasingly seems the only possible response. On the ground, however, the 'facilities' put in place are more reminiscent of the logic of totalitarianism. In a situation of permanent catastrophe and endless emergency, 'undesirables' are kept apart and out of sight, while the care dispensed is designed to control, filter and confine. How should we interpret the disturbing symbiosis between the hand that cares and the hand that strikes? After seven years of study in the refugee camps, Michel Agier reveals their 'disquieting ambiguity' and stresses the imperative need to take into account forms of improvisation and challenge that are currently transforming the camps, sometimes making them into towns and heralding the emergence of political subjects. A radical critique of the foundations, contexts, and political effects of humanitarian action.

Globalization and Its Discontents Joseph E. Stiglitz,2003-04-17 This powerful, unsettling book gives us a rare glimpse behind the closed doors of global financial institutions by the winner of the 2001 Nobel Prize in Economics. When it was first published, this national bestseller quickly became a touchstone in the globalization debate. Renowned economist and Nobel Prize winner Joseph E. Stiglitz had a ringside seat for most of the major economic events of the last decade, including stints as chairman of the Council of Economic Advisers and chief economist at the World Bank. Particularly concerned with the plight of the developing nations, he became increasingly disillusioned as he saw the International Monetary Fund and other major institutions put the interests of Wall Street and the financial community ahead of the poorer nations. Those seeking to understand why globalization has engendered the hostility of protesters in Seattle and Genoa will find the reasons here. While this book includes no simple formula on how to make globalization work, Stiglitz provides a reform agenda that will provoke debate for years to come. Rarely do we get such an insider's analysis of the major

institutions of globalization as in this penetrating book. With a new foreword for this paperback edition.

Drawing Futures Bob Sheil, Frédéric Migayrou, Luke Pearson, Laura Allen, 2016-11-11 Drawing Futures brings together international designers and artists for speculations in contemporary drawing for art and architecture. Despite numerous developments in technological manufacture and computational design that provide new grounds for designers, the act of drawing still plays a central role as a vehicle for speculation. There is a rich and long history of drawing tied to innovations in technology as well as to revolutions in our philosophical understanding of the world. In reflection of a society now underpinned by computational networks and interfaces allowing hitherto unprecedented views of the world, the changing status of the drawing and its representation as a political act demands a platform for reflection and innovation. Drawing Futures will present a compendium of projects, writings and interviews that critically reassess the act of drawing and where its future may lie. Drawing Futures focuses on the discussion of how the field of drawing may expand synchronously alongside technological and computational developments. The book coincides with an international conference of the same name, taking place at The Bartlett School of Architecture, UCL, in November 2016. Bringing together practitioners from many creative fields, the book discusses how drawing is changing in relation to new technologies for the production and dissemination of ideas.

Drunks Christopher Finan, 2017-06-27 Reveals the history of our struggle with alcoholism and the emergence of a search for sobriety that is as old as our nation. In *Drunks*, Christopher Finan introduces us to a colorful cast of characters who were integral in America's moral journey to understanding alcoholism. There's the remarkable Iroquois leader named Handsome Lake, a drunk who stopped drinking and dedicated his life to helping his people achieve sobriety. In the early nineteenth century, the idealistic and energetic "Washingtonians," a group of reformed alcoholics, led the first national movement to save men like themselves. After the Civil War, doctors began to recognize that chronic drunkenness is an illness, and Dr. Leslie Keeley invented a "gold cure" that was dispensed at more than a hundred clinics around the country. But most Americans rejected a scientific explanation of alcoholism. A century after the ignominious death of Charles Adams came Carrie Nation. The wife of a drunk, she destroyed bars with a hatchet in her fury over what alcohol had done to her family. Prohibition became the law of the land, but nothing could stop the drinking. Finan also tells the dramatic story of Bill Wilson and Dr. Bob Smith, who helped each other stay sober and then created AA, which survived its tumultuous early years and finally proved that alcoholics could stay sober for a lifetime. This is narrative history at its best: entertaining and authoritative, an important portrait of one of America's great liberation movements and essential reading for anyone involved in the addiction community.
