Qualitative Inquiry in Clinical and Educational Settings Danica G. Hays,Anneliese A. Singh,2011-08-01 This highly readable text demystifies the qualitative research process—and helps readers conceptualize their own studies—by organizing the different research paradigms and traditions into coherent clusters. Real-world examples and firsthand perspectives illustrate the research process; instructive exercises and activities build on each other so readers can develop their own proposals or reports as they work through the book. Provided are strategies for selecting a research topic, entering and exiting sites, and navigating the complexities of ethical issues and the researcher's role. Readers learn how to use a range of data collection methods—including observational strategies, interviewing, focus groups, e-mail and chat rooms, and arts-based media—and to manage, analyze, and report the resulting data. Useful pedagogical features include:

*In-class and field activities to apply qualitative concepts. *Discussion questions, proposal development exercises, and reflexive journal activities. *Exemplary qualitative studies and two sample proposals. *Cautionary notes, or Wild Cards, about possible research pitfalls. *Tables that summarize concepts and present helpful tips.

Handbook of Qualitative Research Methods in Entrepreneurship Helle Neergaard,John P. Ulhøi,2007 . . . the Handbook of Qualitative Research Methods in Entrepreneurship is an important contribution to the field, and should be referenced in any paper using qualitative methodologies to investigate the entrepreneurial phenomenon. Craig S. Galbraith, Journal of Enterprising Communities There is no hiding behind the ramparts of dry scholarship here. The credibility of the theory being spoken of is not the stuff of constructed proofs, but alignments of critical insight and utility. This is where qualitative work can make a difference to the field, and where this book makes its mark. Robin Holt, International Journal of Entrepreneurial Behaviour and Research The Handbook of Qualitative Research Methods in Entrepreneurship is an unusually solid and multifaceted book on what qualitative methods have done, are doing and will do in entrepreneurship research. Every serious entrepreneurship scholar should read it. It points at the future! Björn Bjerke, University of Kalmar, Sweden I would warmly recommend this unique collection of qualitative methods of entrepreneurship research to both mature and beginning researchers as a menu to choose from for their planned empirical studies. For those who try to get away from only quantitative studies in both business practice and academic research, this book is their chance to find a rich inspiration in reflecting on entrepreneurship as a lived experience using grounded theory

and ethnographic, discourse and narrative approaches. It might convince editors of top journals of entrepreneurship research to welcome qualitative research submissions as an indispensable complement to quantitative only submissions. This domain is not physics. In bringing together such a variety of experts from so many nationalities in this Handbook, our Danish colleagues are making entrepreneurship research a realistic global venture. Jan Ulijn, Eindhoven University of Technology, The Netherlands Helle Neergaard and John Parm Ulhøi have compiled a remarkable collection of work that both represents the range of methods and demonstrates the depth of insight that can be achieved through qualitative approaches. This book is not simply a handbook of qualitative research methods, though it well achieves this aim, it is also an important contribution towards the field of entrepreneurship research. From the Foreword by Sara Carter This expansive and practical Handbook introduces the methods currently used to increase the understanding of the usefulness and versatility of a systematic approach to qualitative research in entrepreneurship. It fills a crucial gap in the literature on entrepreneurship theory, and, just as importantly, illustrates how these principles and techniques can be appropriately and fruitfully employed. The Handbook is underpinned by the belief that qualitative research has the potential to charter hitherto unexplored waters in the field of entrepreneurship and thus contribute significantly to its further advancement. The contributors seek to assist entrepreneurship researchers in making more informed choices and designing more rigorous and sophisticated studies. They achieve this by providing concrete examples of research experiences and tangible how to advice. By clarifying what these research methods entail, how they are currently being used and how they can be

evaluated, this Handbook constitutes a comprehensive and highly accessible methodological toolbox. Dealing with both well-accepted qualitative approaches and lesser-known, rarer and more novel approaches to the study of entrepreneurship, this Handbook will be invaluable to those studying, researching and teaching entrepreneurship.

Say it Forward Mayotte Cliff,Kiefer Claire,2018-12-04 Oral history is a universal form of storytelling. For many years Voice of Witness, cofounded by Dave Eggers, has shared powerful stories of people impacted by in- justice with a broad audience of readers. Say it Forward is an extension of this work: a guide for social justice storytelling that outlines Voice of Witness' critical methodolog y at the core of their evocative oral history collections. Expert editors and authors candidly outline how to harness the power of the personal narrative to expose larger issues of inequality. An essential resource for empathetic oral historians, this guide addresses a lot of the ideas that many people aren't sure how to talk about, such as: How do I interview people who belong to a very different community than the one I'm from? How can power dynamics impact a narrator's comfort? How do I deal with secondary trauma when listening to difficult stories? Say It Forward will support readers with everything from the initial planning phases to the deeper, more essential questions that examine the ethics of the practice. Cliff Mayotte is the Education Program Director with Voice of Witness. He previously edited The Power of the Story: The

Voice of Witness Teachers Guide to Oral History published in 2013 by Voice of Witness and McSweeney's. Claire Kiefer is the author of Bear Witness, forthcoming from Big Pencil Press in Fall 2018. She is a Voice of Witness Curriculum Specialist.
