Extracts From: 20Th Century Ad Ubi Christianus? Luigi Trafelli,Carla Podo,Franca Podo,2018-10-06 A hundred years ago, Lugi Trafelli, mathematician and physicist from Nettuno, near Rome, got his first philosophical-religious essay printed at his own expense (Pistoia, 1917) and distributed the free copies among a limited number of readers. The title was “XX Secolo dopo Cristo – Ubi Christianus? (Experimentum crucis)”. The book deals with the incompatibility between war and Christianity and represents a vivid witness of the pacifist mindset in Italy and Europe in the first half of the Twentieth Century. One of the Trafelli’s most remarkable messages is the synthesis between the brotherhood preached by Jesus Christ, the Greek-roman Stoicism’s observance of civil laws and the balance between man and nature envisioned by the Epicurean poet Lucretius Caro. The harmonious adoption of these pillars of the “liberty of human spirit” would likely help us in tackling the most pressing humanitarian and environmental challenges of the 21st Century. The publication of this book (edited by the Trafelli’s last descendants, Carla and Franca Podo) aims at creating a bridge between the world and the era described by the author and the present generations.

Handbook on Spices and Condiments (Cultivation, Processing and Extraction) H. Panda,2010-10-01 The term Spice and Condiments applies to natural plant or vegetable products or mixtures in whole or ground form, which are used for imparting flavour, aroma and piquancy to the food items. Spices and condiments are a major commercial crop in India, and earn a major part of foreign exchange annually. They have been the backbone of agricultural industry. The importance of spices and condiment in dietary, medicinal and other uses, and their commercial importance are immense. India is known the world over as the home of spices. Thus spices are an important group of agricultural goods, which are virtually indispensable in the culinary art. Spice processing includes different steps: spice cleaning, spice reconditioning and spice grinding. Some spices were also used for preserving food like meat for a year or more without refrigeration. In the 16th century cloves for instance were among the spices used to preserve food without refrigeration. Cloves contain a chemical called eugenol that inhibits the growth of bacteria. It is a natural antibiotic. It is still used to preserve food like Virginia Ham. Likewise later mustard and ground mustard were also found to have preservative qualities. India alone contributes 25 30 % of the total world trade in spices. It may be interesting to note that nine spices namely pepper ginger clove cinnamon cassia mace nutmeg pimento (allspice) and cardamom alone contributed as much as 90% of the total world trade. Pepper is the most important spice in the world and so also of India. This book basically deals with brief history of spices, uses of spices, world trade in spices area & production of spices in India, area and production of spices in India, major and minor spices of India, spice processing, quality issues with spices, bird chillies and Tabasco chillies, basil or sweet basil, seasoning blend duplication and tricks, sauces and gravies, snack seasonings, quality issues with spices, etc. This book is a single compendium which deals with all aspects and facts of spices and condiments which may meet the requirements of all those handling them at various stages, from harvesting to their end use. This book contains post harvest management, the potentials of genetic engineering, high production technology in spices with plantation and processing of various spices and condiments such as vanilla, turmeric, tamarind, saffron, black pepper, onion, mint, ginger, garlic, curry leaf, coriander etc.
