Competing Visions Robert Cherny, Gretchen Lemke-Santangelo, Richard Griswold del Castillo, 2014 With a strong social emphasis and succinct narrative, *COMPETING VISIONS: A HISTORY OF CALIFORNIA*, 2E chronicles the stories of people who have had an impact on the state's history while presenting California as a hub of competing economic, social, and political visions. It highlights the state's cultural diversity and explicitly compares it to other Western states, the nation, and the world--illustrating the national and international significance of California's history. Its chronological organization and thematic approach enables readers to keep track of events and fully understand their significance. Telling the full story, the text concludes by discussing such current events as immigration and demographic changes, the Occupy Movement, energy challenges, and more.

Think Bayes Allen B. Downey, 2021-05-18 If you know how to program, you're ready to tackle Bayesian statistics. With this book, you'll learn how to solve statistical problems with Python code instead of mathematical formulas, using discrete probability distributions rather than continuous mathematics. Once you get the math out of the way, the Bayesian fundamentals will become clearer and you'll begin to apply these techniques to real-world problems. Bayesian statistical methods are becoming more common and more important, but there aren't many resources available to help beginners. Based on undergraduate classes taught by author Allen B. Downey, this book's computational approach helps you get a solid start. Use your programming skills to learn and understand Bayesian statistics Work with problems involving estimation, prediction, decision analysis, evidence, and Bayesian hypothesis testing Get started with simple examples, using coins, dice, and a bowl of cookies Learn computational methods for solving real-world problems

Antifragile Nassim Nicholas Taleb, 2014-01-28 *Antifragile* is a standalone book in Nassim Nicholas Taleb's landmark *Incerto* series, an investigation of opacity, luck, uncertainty, probability, human error, risk, and decision-making in a world we don't understand. The other books in the series are *Foiled by Randomness*, *The Black Swan*, *Skin in the Game*, and *The Bed of Procrustes*. Nassim Nicholas Taleb, the bestselling author of *The Black Swan* and one of the foremost thinkers of our time, reveals how to thrive in an uncertain world. Just as human bones get stronger when subjected to stress and tension, and rumors or riots intensify when someone tries to repress them, many things in life benefit from stress, disorder, volatility, and turmoil. What Taleb has identified and calls "antifragile" is that category of things that not only gain from chaos but need it in order to survive and flourish. In *The Black Swan*, Taleb showed us that highly improbable and unpredictable events underlie almost everything about our world. In *Antifragile*, Taleb stands uncertainty on its head, making it desirable, even necessary, and proposes that things be built in an antifragile manner. The antifragile is beyond the resilient or robust. The resilient resists shocks and stays the same; the antifragile gets better and better. Furthermore, the antifragile is immune to prediction errors and protected from adverse events. Why is the city-state better than the nation-state, why is debt bad for you, and why is what we call "efficient" not efficient at all? Why do government responses and social policies protect the strong and hurt the weak? Why should you write your resignation letter before even starting on the job? How did the sinking of the Titanic save lives? The book spans innovation by trial

and error, life decisions, politics, urban planning, war, personal finance, economic systems, and medicine. And throughout, in addition to the street wisdom of Fat Tony of Brooklyn, the voices and recipes of ancient wisdom, from Roman, Greek, Semitic, and medieval sources, are loud and clear. Antifragile is a blueprint for living in a Black Swan world. Erudite, witty, and iconoclastic, Taleb's message is revolutionary: The antifragile, and only the antifragile, will make it. Praise for Antifragile "Ambitious and thought-provoking . . . highly entertaining."—The Economist "A bold book explaining how and why we should embrace uncertainty, randomness, and error . . . It may just change our lives."—Newsweek

Transforming Global Information and Communication Markets Peter F. Cowhey, Jonathan D. Aronson, 2012-01-13 Innovation in information and communication technology (ICT) fuels the growth of the global economy. How ICT markets evolve depends on politics and policy, and since the 1950s periodic overhauls of ICT policy have transformed competition and innovation. For example, in the 1980s and the 1990s a revolution in communication policy (the introduction of sweeping competition) also transformed the information market. Today, the diffusion of Internet, wireless, and broadband technology, growing modularity in the design of technologies, distributed computing infrastructures, and rapidly changing business models signal another shift. This pathbreaking examination of ICT from a political economy perspective argues that continued rapid innovation and economic growth require new approaches in global governance that will reconcile diverse interests and enable competition to flourish. The authors (two of whom were architects of international ICT policy reforms in the 1990s) discuss this crucial turning point in both theoretical and practical terms.

Stochastic Optimization Johannes Schneider, Scott Kirkpatrick, 2007-08-06 This book addresses stochastic optimization procedures in a broad manner. The first part offers an overview of relevant optimization philosophies; the second deals with benchmark problems in depth, by applying a selection of optimization procedures. Written primarily with scientists and students from the physical and engineering sciences in mind, this book addresses a larger community of all who wish to learn about stochastic optimization techniques and how to use them.

Pre-Incident Indicators of Terrorist Incidents Brent L. Smith, 2011 This is a print on demand edition of a hard to find publication. Explores whether sufficient data exists to examine the temporal and spatial relationships that existed in terrorist group planning, and if so, could patterns of preparatory conduct be identified? About one-half of the terrorists resided, planned, and prepared for terrorism relatively close to their eventual target. The terrorist groups existed for 1,205 days from the first planning meeting to the date of the actual/planned terrorist incident. The planning process for specific acts began 2-3 months prior to the terrorist incident. This study examined selected terrorist groups/incidents in the U.S. from 1980-2002. It provides for the potential to identify patterns of conduct that might lead to intervention prior to the commission of the actual terrorist incidents. Illustrations.

out to write a book about the True Benjamin Franklin. Of Franklin, he says that the human in him was so interlaced with the divine that the one dragged the other into light. Fisher's book is a unique biography of Benjamin Franklin, written by an opinionated man who grew up directly in the wake of Franklin's influence on American culture.--

Men In The Public Eye Jeff Hearn, 2006-05-11 Men in the Public Eye reveals why men's domination in and of the public sphere is a vital feature of gender relations in patriarchy. It also shows how public domains dominate private domains, contributing to the intensification of public patriarchies. Jeff Hearn explores these important issues by focusing on the period 1870-1920, when there was massive growth and transformation in the power of the public domains. He demonstrates that these historical debates and dilemmas are still relevant today as men search for new, postmodern forms of masculinities.

Making Home(s) in Displacement Luce Beeckmans, Alessandra Gola, Ashika Singh, Hilde Heynen, 2022-01-17 Making Home(s) in Displacement critically rethinks the relationship between home and displacement from a spatial, material, and architectural perspective. Recent scholarship in the social

sciences has investigated how migrants and refugees create and reproduce home under new conditions, thereby unpacking the seemingly contradictory positions of making a home and overcoming its loss. Yet, making home(s) in displacement is also a spatial practice, one which intrinsically relates to the fabrication of the built environment worldwide. Conceptually the book is divided along four spatial sites, referred to as camp, shelter, city, and house, which are approached with a multitude of perspectives ranging from urban planning and architecture to anthropology, geography, philosophy, gender studies, and urban history, all with a common focus on space and spatiality. By articulating everyday homemaking experiences of migrants and refugees as spatial practices in a variety of geopolitical and historical contexts, this edited volume adds a novel perspective to the existing interdisciplinary scholarship at the intersection of home and displacement. It equally intends to broaden the canon of architectural histories and theories by including migrants' and refugees' spatial agencies and place-making practices to its annals. By highlighting the political in the spatial, and vice versa, this volume sets out to decentralise and decolonise current definitions of home and displacement, striving for a more pluralistic outlook on the idea of home.

Re-Thinking Economics Asimina Christoforou, Michael Lainé, 2014-05-30 Once again, unfettered capitalism has failed. Promises for global prosperity and peace have given way to a world of deep recession, social upheaval and political instability. Once again, mainstream economics has proved its inadequacy. Despite its technical rigour and mathematical virtuosity, it failed dramatically to respond to the current crisis. Why is this so? Mainstream economics turns a blind eye to society. By assumption, it maims its analyses by wiping away what makes us what we are. There is pressing need for a critical discussion and new ideas. We therefore turn to the insightful and stimulating work of Pierre Bourdieu. Arguably one of the major sociologists ever, he was also a major 'economist'. Yet his works on the economy have received only scant attention, especially from economists, be they 'mainstream' or 'heterodox'. Bourdieu helps to take a broader view and enrich our scientific imagination. By including dimensions of power, intuitive behaviour and social structures within the scope of his analysis, he provides for an alternative foundation of economics, based on an integrated, interdisciplinary theory. For the first time, this volume fills this gap in economics by featuring state-of-the-art research and experts from different social science disciplines. This book constitutes a first step, and hopes to become a milestone. The book offers an innovative outlook and a unique source for social scientists of all fields, particularly economists and sociologists, who wish to engage in the study of Bourdieu and his economics with a view to developing a more pertinent theory. It will also constitute a useful reference for university students and administrators who would like to explore the economy from a Bourdieusian perspective.

The Economics of Comparable Worth Mark R. Killingsworth, 1990 This is an objective analysis of the implementation of comparable worth in a city government (San Jose, California), in a state government (Minnesota), and in an entire country (Australia). Explaining comparable worth in terms of economic theory, Killingsworth presents original econometric estimates of the effects of comparable worth on female-male relative wages and employment for the three locations. He develops and estimates two competing models: a conventional model, which relates individual worker's wages to worker's characteristics; and a comparable worth model, which relates wages of job classifications to job characteristics. Killingsworth concludes that conventional remedies to discrimination are a more promising approach than comparable worth for eliminating labor market discrimination. ISBN 0-88099-086-4: \$22.95.
