Writing peace Cattelain, Eric,2017-12-25 What is the word for 'peace' in Thai or in Arabic? In Hausa or in Maori? And how is it written? The answers to these questions confront us to the specific languages we have learned or will be able to learn - and which help build our own identity - just as much as to those languages we have no access to

Christian Arabic Versions of Daniel Miriam Lindgren Hjälms,2016-04-26 In *Christian Arabic Versions of Daniel*, Miriam L. Hjälms provides an insight into the Arabic transmission of the biblical Book of Daniel with a focus on translation techniques used in the early manuscripts.

A Linguistic History of Arabic Jonathan Owens,2006-05-11 *A Linguistic History of Arabic* presents a reconstruction of proto-Arabic by the methods of historical-comparative linguistics. It challenges the traditional conceptualization of an old, Classical language evolving into the contemporary Neo-Arabic dialects. Professor Owens combines established comparative linguistic methodology with a careful reading of the classical Arabic sources, such as the grammatical and exegetical traditions. He arrives at a richer and more complex picture of early Arabic language history than is current today and in doing so establishes the basis for a comprehensive, linguistically-based understanding of the history of Arabic. The arguments are set out in a concise, case by case basis, making it accessible to students and scholars of Arabic and Islamic culture, as well as to those studying Arabic and historical linguists.

The Semitic Languages John Huehnergard, Na'ama Pat-El, 2013-10-08 The Semitic Languages presents a unique, comprehensive survey of individual languages or language clusters from their origins in antiquity to their present-day forms. The Semitic family occupies a position of great historical and linguistic significance: the spoken and written languages of the Phoenicians, Hebrews and Arabs spread throughout Asia and northern and central Africa; the Old Semitic civilizations in turn contributed significantly to European culture; and modern Hebrew, modern literary Arabic, Amharic, and Tigrinya have become their nations' official languages. The book is divided into three parts and each chapter presents a self-contained article, written by a recognized expert in the field. * I. General Issues: providing an introduction to the grammatical traditions, subgrouping and writing systems of this language family. * II. Old Semitic Languages * III. Modern Semitic Languages Parts II and III contain structured chapters, which enable the reader to access and compare information easily. These individual descriptions of each language or cluster include phonology, morphology, syntax, lexis and dialects. Suggestions are made for the most useful sources of further reading and the work is comprehensively indexed.

Comparative Semitic Linguistics Patrick R. Bennett, 1998-01-01 As the title indicates, this unique resource is a manual on comparative linguistics, with the examples taken exclusively from Semitic languages. It is an innovative volume that recalls the earlier tradition of textbooks of comparative philology, which, however, exclusively treated Indo-

European languages. It is suited for students with at least a year of a Semitic language. By far the largest component of the book are the nine wordlists that provide the data to be manipulated by the student. Says reviewer Peter Daniels, the wordlists constitute a unique resource for all of comparative linguistics--a considerable quantity of uniform data from a host of related languages. They would be useful for any class in comparative linguistics, not just for those interested specifically in Semitic. Scattered throughout the text are 25 exercises based on the wordlists that provide a good introduction to the methods of comparativists. Also included are paradigms of the phonological systems of ten Semitic languages as well as Coptic and a form of Berber. A bibliography that guides the student into further reading in Semitic linguistics completes the volume.

Christian-Muslim Relations David Richard Thomas,Barbara Roggema,Juan Pedro Monferrer Sala,2009 Christian-Muslim Relations, a Bibliographical History 1 (CMR1) is the first part of a general history of relations between the faiths from the seventh century to the present. It covers the period from 600 to 1500, when encounters took place through the extended Mediterranean basin and are recorded in Syriac, Arabic, Greek, Latin and other languages. It comprises introductory essays on the treatment of Christians in the Qur'an, Qur'an commentaries, biographies of the Prophet, Hadith and Sunni law, and of Muslims in canon law, and the main body of more than two hundred detailed entries on all the works recorded, whether surviving or lost. These entries provide biographical details of the authors where known, descriptions and assessments of the works themselves, and complete accounts of manuscripts, editions, translations and studies. The result of

collaboration between leading scholars, CMR1 is intended as a basic tool for research in Christian-Muslim relations.

Toponymy on the Periphery Julien Cooper, 2020-08-03 In *Toponymy on the Periphery*, Julien Charles Cooper conducts a study of the rich geographies preserved in Egyptian texts relating to the desert regions east of Egypt. These regions, filled with mines, quarries, nomadic camps, and harbours are often considered as an unimportant hinterland of the Egyptian state, but this work reveals the wide explorations and awareness Egyptians had of the Red Sea and its adjacent deserts, from the Sinai in the north to Punt in the south. The book attempts to locate many of the placenames present in Egyptian texts and analyse their etymology in light of Egyptian linguistics and the various foreign languages spoken in the adjacent deserts and distant shores of the Red Sea--

The Septuagint of Proverbs - Jewish and/or Hellenistic Proverbs? Edward Cook, 2014-09-03 This monograph deals with an important but unexplored document of Hellenistic Judaism. The question of Hellenistic influence is addressed on the basis of an analysis of a representative number of chapters of Septuagint Proverbs (1, 2, 6, 8, 9, 24, 29, 30 and 31). Scholars have argued that this book was influenced extensively by Greek philosophy. The author follows a contextual cultural method. The Greek text is analysed on four levels: the semantic, syntactical, stylistic (which represents the translation technique of the translator), and finally the theological level. This study represents the first exhaustive

analysis of the theme. The conclusion is that the impact of Stoicism on this Greek version has been overestimated in the past. Novel views are also formulated concerning the role of the law in LXX Proverbs, its historical setting and its text-critical value.

Seven Myths of Africa in World History David Northrup, 2017-09-01 Northrup's highly accessible book breaks through the most common barriers that readers encounter in studying African history. Each chapter takes on a common myth about Africa and explains both the sources of the myth and the research that debunks it. These provocative chapters will promote lively discussions among readers while deepening their understanding of African and world history. The book is strengthened by its incorporation of actors and issues representing the African diaspora and African Americans in particular. —Rebecca Shumway, College of Charleston
