A Linguistic History of Arabic Jonathan Owens,2006-05-11 A Linguistic History of Arabic presents a reconstruction of proto-Arabic by the methods of historical-comparative linguistics. It challenges the traditional conceptualization of an old, Classical language evolving into the contemporary Neo-Arabic dialects. Professor Owens combines established comparative linguistic methodology with a careful reading of the classical Arabic sources, such as the grammatical and exegetical traditions. He arrives at a richer and more complexpicture of early Arabic language history than is current today and in doing so establishes the basis for a comprehensive, linguistically-based understanding of the history of Arabic. The arguments are set out in a concise, case by case basis, making it accessible to students and scholars of Arabic and Islamicculture, as well as to those studying Arabic and historical linguists.

The Semitic Languages John Huehnergard,Na'ama Pat-El,2013-10-08 The Semitic Languages presents a unique, comprehensive survey of individual languages or language clusters from their origins in antiquity to their present-day forms. The Semitic family occupies a position of great historical and linguistic significance: the spoken and written languages of the Phoenicians, Hebrews and Arabs spread throughout Asia and northern and central Africa; the Old Semitic civilizations in turn contributed significantly to European culture; and modern Hebrew, modern literary Arabic, Amharic, and Tigrinya have become their nations' official languages. The book is divided into three parts and each chapter presents a self-contained article, written by a recognized expert in the field. * I. General Issues: providing an introduction to the grammatical traditions, subgrouping and writing systems of this language family. * II. Old Semitic Languages * III. Modern Semitic Languages Parts II and III contain structured chapters, which enable the reader to access and compare information easily. These individual descriptions of each language or cluster include phonology, morphology, syntax, lexis and dialects. Suggestions are made for the most useful sources of further reading and the work is comprehensively indexed.

Comparative Semitic Linguistics Patrick R. Bennett,1998-01-01 As the title indicates, this unique resource is a manual on comparative linguistics, with the examples taken exclusively from Semitic languages. It is an innovative volume that recalls the earlier tradition of textbooks of comparative philology, which, however, exclusively treated Indo-European languages. It is suited for students with at least a year of a Semitic language. By far the largest component of the book are the nine wordlists that provide the data to be manipulated by the student. Says reviewer Peter Daniels, the wordlists constitute a unique resource for all of comparative linguistics--a considerable quantity of uniform data from a host of related languages. They would be useful for any class in comparative linguistics, not just for those interested specifically in Semitic. Scattered throughout the text are 25 exercises based on the wordlists that provide a good introduction to the methods of comparativists. Also included are paradigms of the phonological systems of ten Semitic languages as well as Coptic and a form of Berber. A bibliography that guides the student into further reading in Semitic linguistics completes the volume.

Toponymy on the Periphery Julien Cooper,2020-08-03 In Toponymy on the Periphery, Julien Charles Cooper conducts a study of the rich geographies preserved in Egyptian texts relating to the desert regions east of Egypt. These regions, filled with mines, quarries, nomadic camps, and harbours are often considered as an unimportant hinterland of the Egyptian state, but this work reveals the wide explorations and awareness Egyptians had of the Red Sea and its adjacent deserts, from the Sinai in the north to Punt in the south. The book attempts to locate many of the placenames present in Egyptian texts and analyse their etymology in light of Egyptian linguistics and the various foreign languages spoken in the adjacent deserts and distant shores of the Red Sea--

The Septuagint of Proverbs - Jewish and/or Hellenistic Proverbs? Edward Cook,2014-09-03 This monograph deals with an important but unexplored document of Hellenistic Judaism. The question of Hellenistic influence is addressed on the basis of an analysis of a representative number of chapters of Septuagint Proverbs (1, 2, 6, 8, 9, 24, 29, 30 and 31). Scholars have argued that this book was influenced extensively by Greek philosophy. The author follows a contextual cultural method. The Greek text is analysed on four levels: the semantic, syntactical, stylistic (which represents the translation technique of the translator), and finally the theological level. This study represents the first exhaustive analysis of the theme. The conclusion is that the impact of Stoicism on this Greek version has been overestimated in the past. Novel views are also formulated concerning the role of the law in LXX Proverbs, its historical setting and its text-critical value.
