Transforming the Workforce for Children Birth Through Age 8 National Research Council, Institute of Medicine, Board on Children, Youth, and Families, Committee on the Science of Children Birth to Age 8: Deepening and Broadening the Foundation for Success, 2015-07-23 Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. Transforming the Workforce for Children Birth Through Age 8 explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the

practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. Transforming the Workforce for Children Birth Through Age 8 offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.

The Startup Owner's Manual Steve Blank, Bob

Dorf, 2020-03-17 More than 100,000 entrepreneurs rely on this book. The National Science Foundation pays hundreds of startup teams each year to follow the process outlined in the book, and it's taught at Stanford, Berkeley, Columbia and more than 100 other leading universities worldwide. Why? The Startup Owner's Manual guides you, step-by-step, as you put the Customer Development process to work. This method was created by renowned Silicon Valley startup expert Steve Blank, co-creator with Eric Ries of the Lean Startup movement and tested and refined by him for more than a decade. This 608-page how-to guide includes over 100 charts, graphs, and diagrams, plus 77 valuable checklists that guide you as you drive your company toward profitability. It will help you: Avoid the 9 deadly sins that destroy startups' chances for success Use the Customer Development method to bring your business idea to life Incorporate the Business Model Canvas as the organizing principle for startup hypotheses Identify your customers and determine how to get, keep and grow customers profitably Compute how you'll drive your startup to repeatable, scalable profits. The Startup Owners Manual was originally published by K&S Ranch Publishing Inc. and is now available from Wiley. The cover, design, and content are the same as the prior release and should not be considered a new or updated product.

Big Podcast - Grow Your Podcast Audience, Build Listener Loyalty, and Get Everybody Talking About Your Show David Hooper, 2019-03-12 Is it worth doing a podcast if nobody listens? You started your podcast because you want to: - Spread an important message - Share your passion - Make money But your podcast hasn't quite taken off like you thought it would. What happened? This book is for podcasters who can't quite figure out what they're

doing wrong (and are ready to do things right). You'll learn: - Why your "natural personality" may be repelling to people and how to make it attract listeners to your podcast like a magnet (See p198) - What to do when a company tries to "lowball" you on advertising fees (do nothing, except send them the email on p424) - It's easy to screw up an interview. To be sure you don't run into any problems, use my "guest contract" on p311. - A six-word "trick" (learned from a 20-year radio veteran) that will instantly make you a better host (it's on p210) - 9 reasons to kill an interview before it happens - ignore these "red flags" and you'll be sorry (p299) - What Victoria's Secret models know about podcasting (even though you never hear them talk) - this lesson starts on p208! - Nervous on the mic? You have lots of company - 75% of podcasters to be exact. I give you a 5-step way to cure your "stage fright" on p229. - If you're scared of getting bad reviews, don't worry - I have three simple ways to handle critics on p236 (two of which can turn critics into fans) - Why copying top podcasters may be killing your podcast (I share the story on p116) and how to develop a podcasting style that works for you (and will attract more listeners) - My 3-step "episode teaser" formula - it's boring, but it works (get it on p110) - Thinking of doing a "daily" podcast? You must read p103 before you start. - Want to impress a guest? See the chapter starting on p321 for my 3-step followup "ritual" that will make being on your podcast unforgettable (and encourage guests to promote your episodes) And that's just the start ... This book contains my complete system on how to attract listeners, deliver your message effectively, and build a big podcast. You can't build a big podcast on hope. But you can build a big podcast. And if you're ready to do just that, read this book.

Introduction to Information Retrieval Christopher

D. Manning,Prabhakar Raghavan,Hinrich

Schütze,2008-07-07 Class-tested and coherent, this textbook teaches classical and web information retrieval, including web search and the related areas of text classification and text clustering from basic concepts. It gives an up-to-date treatment of all aspects of the design and implementation of systems for gathering, indexing, and searching documents; methods for evaluating systems; and an introduction to the use of machine learning methods on text collections. All the important ideas are explained using examples and figures, making it perfect for introductory courses in information retrieval for advanced undergraduates and graduate students in computer science. Based on feedback from extensive classroom experience, the book has been carefully structured in order to make teaching more natural and effective. Slides and additional exercises (with solutions for lecturers) are also available through the book's supporting website to help course instructors prepare their lectures.

Ask a Manager Alison Green, 2018-05-01 From the creator of the popular website Ask a Manager and New York's work-advice columnist comes a witty, practical guide to 200 difficult professional conversations—featuring all-new advice! There's a reason Alison Green has been called “the Dear Abby of the work world.” Ten years as a workplace-advice columnist have taught her that people avoid awkward conversations in the office because they simply don't know what to say. Thankfully, Green does—and in this incredibly helpful book, she tackles the tough discussions you may need to have during your career. You'll learn what to say when • coworkers push their work on you—then take credit for it • you accidentally

trash-talk someone in an email then hit “reply all” • you’re being micromanaged—or not being managed at all • you catch a colleague in a lie • your boss seems unhappy with your work • your cubemate’s loud speakerphone is making you homicidal • you got drunk at the holiday party

Praise for *Ask a Manager* “A must-read for anyone who works . . . [Alison Green’s] advice boils down to the idea that you should be professional (even when others are not) and that communicating in a straightforward manner with candor and kindness will get you far, no matter where you work.”—Booklist (starred review) “The author’s friendly, warm, no-nonsense writing is a pleasure to read, and her advice can be widely applied to relationships in all areas of readers’ lives. Ideal for anyone new to the job market or new to management, or anyone hoping to improve their work experience.”—Library Journal (starred review) “I am a huge fan of Alison Green’s *Ask a Manager* column. This book is even better. It teaches us how to deal with many of the most vexing big and little problems in our workplaces—and to do so with grace, confidence, and a sense of humor.”—Robert Sutton, Stanford professor and author of *The No Asshole Rule* and *The Asshole Survival Guide* “*Ask a Manager* is the ultimate playbook for navigating the traditional workforce in a diplomatic but firm way.”—Erin Lowry, author of *Broke Millennial: Stop Scraping By and Get Your Financial Life Together*

Computational Thinking Education Siu-Cheung Kong, Harold Abelson, 2019-07-04 This book is open access under a CC BY 4.0 license. This book offers a comprehensive guide, covering every important aspect of computational thinking education. It provides an in-depth discussion of computational thinking, including the notion of perceiving computational thinking practices as ways of mapping models from the abstraction of data and process structures to natural phenomena. Further, it explores how computational thinking education is implemented in different regions, and how computational thinking is being integrated into subject learning in K-12 education. In closing, it discusses computational thinking from the perspective of STEM education, the use of video games to teach computational thinking, and how computational thinking is helping to transform the quality of the workforce in the textile and apparel industry.

Saturated Fat May Save Your Life Bruce Fife, 1999

The Research Interview S. Mann, 2016-04-29

Research and Qualitative Interviews brings into focus the decisions that the interviewer faces by taking a data-led approach in order to open up choices and decisions in the process of planning for, managing, analysing and representing interviews. The chapters concentrate on the real-time, moment-by-moment nature of interview management and interaction. A key feature of the book is the inclusion of reflexive vignettes that foreground the voices and experience of qualitative researchers (both novices and more expert practitioners). The vignettes demonstrate the importance of reflecting on and learning from interactional experience. In addition, the book

provides an overview of different types of interviews, commenting on the orientation and make-up of each type. Overall, this book encourages reflective thinking about the use of research interviews. It distinguishes between reflection, reflective practice and reflexivity. All the chapters focus on recurring choices, dilemmas and puzzles; offering advice in opening out and engaging with these aspects of the research interview.

The Architecture of Computer Hardware, Systems Software, and Networking Irv Englander, Wilson Wong, 2021-04-06 The Architecture of Computer Hardware, Systems Software and Networking is designed help students majoring in information technology (IT) and information systems (IS) understand the structure and operation of computers and computer-based devices. Requiring only basic computer skills, this accessible textbook introduces the basic principles of system architecture and explores current technological practices and trends using clear, easy-to-understand language. Throughout the text, numerous relatable examples, subject-specific illustrations, and in-depth case studies reinforce key learning points and show students how important concepts are applied in the real world. This fully-updated sixth edition features a wealth of new and revised content that reflects today's technological landscape. Organized into five parts, the book first explains the role of the computer in information systems and provides an overview of its components. Subsequent sections discuss the representation of data in the computer, hardware architecture and operational concepts, the basics of computer networking, system software and operating systems, and various interconnected systems and components. Students are introduced to the material using ideas already familiar to them, allowing them to gradually

build upon what they have learned without being overwhelmed and develop a deeper knowledge of computer architecture.

So Good They Can't Ignore You Cal

Newport, 2012-09-18 In an unorthodox approach, Georgetown University professor Cal Newport debunks the long-held belief that follow your passion is good advice, and sets out on a quest to discover the reality of how people end up loving their careers. Not only are pre-existing passions rare and have little to do with how most people end up loving their work, but a focus on passion over skill can be dangerous, leading to anxiety and chronic job hopping. Spending time with organic farmers, venture capitalists, screenwriters, freelance computer programmers, and others who admitted to deriving great satisfaction from their work, Newport uncovers the strategies they used and the pitfalls they avoided in developing their compelling careers. Cal reveals that matching your job to a pre-existing passion does not matter. Passion comes after you put in the hard work to become excellent at something valuable, not before. In other words, what you do for a living is much less important than how you do it. With a title taken from the comedian Steve Martin, who once said his advice for aspiring entertainers was to be so good they can't ignore you, Cal Newport's clearly written manifesto is mandatory reading for anyone fretting about what to do with their life, or frustrated by their current job situation and eager to find a fresh new way to take control of their livelihood. He provides an evidence-based blueprint for creating work you love, and will change the way you think about careers, happiness, and the crafting of a remarkable life.

Blown to Bits Harold Abelson, Ken Ledeen, Harry R. Lewis, 2008 'Blown to Bits' is about how the digital

explosion is changing everything. The text explains the technology, why it creates so many surprises and why things often don't work the way we expect them to. It is also about things the information explosion is destroying: old assumptions about who is really in control of our lives.
