## **The Climate Crisis** Vishwas Satgar, 2018-02-01

Essays that address the question: how can people and class agency change this destructive course of history? Capitalism's addiction to fossil fuels is heating our planet at a pace and scale never before experienced. Extreme weather patterns, rising sea levels and accelerating feedback loops are a commonplace feature of our lives. The number of environmental refugees is increasing and several island states and low-lying countries are becoming vulnerable. Corporate-induced climate change has set us on an ecocidal path of species extinction. Governments and their international platforms such as the Paris Climate Agreement deliver too little, too late. Most states, including South Africa, continue on their carbon-intensive energy paths, with devastating results. Political leaders across the world are failing to provide systemic solutions to the climate crisis. This is the context in which we must ask ourselves: how can people and class agency change this destructive course of history? Volume three in the Democratic Marxism series, *The Climate Crisis* investigates eco-socialist alternatives that are emerging. It presents the thinking of leading climate justice activists, campaigners and social movements advancing systemic alternatives and developing bottom-up, just transitions to sustain life. Through a combination of theoretical and empirical work, the authors collectively examine the challenges and opportunities inherent in the current moment. This volume builds on the class-struggle focus of Volume 2 by placing ecological issues at the centre of democratic Marxism. Most importantly, it explores ways to renew historical socialism with democratic, eco-

socialist alternatives to meet current challenges in South Africa and the world.

**Accelerando** Charles Stross, 2005-07-05 The Singularity. It is the era of the posthuman. Artificial intelligences have surpassed the limits of human intellect. Biotechnological beings have rendered people all but extinct. Molecular nanotechnology runs rampant, replicating and reprogramming at will. Contact with extraterrestrial life grows more imminent with each new day. Struggling to survive and thrive in this accelerated world are three generations of the Macx clan: Manfred, an entrepreneur dealing in intelligence amplification technology whose mind

is divided between his physical environment and the Internet; his daughter, Amber, on the run from her domineering mother, seeking her fortune in the outer system as an indentured astronaut; and Sirhan, Amber's son, who finds his destiny linked to the fate of all of humanity. For something is systematically dismantling the nine planets of the solar system. Something beyond human comprehension. Something that has no use for biological life in any form...

**Special Ops: Host and Network Security for Microsoft Unix and Oracle** Syngress, 2003-03-11  
Special Ops: Internal Network Security Guide is the solution for the impossible 24-hour IT work day. By now, most companies have hardened their perimeters and locked out the bad guys, but what has been done on the inside? This book attacks the problem of the soft, chewy center in internal networks. We use a two-pronged approach-Tactical and Strategic-to give readers a complete guide to internal penetration testing. Content includes the newest vulnerabilities and exploits, assessment methodologies, host review guides, secure baselines and case studies to bring it all together. We have scoured the Internet and assembled some of the best to function as Technical Specialists and Strategic Specialists. This creates a diversified project removing restrictive corporate boundaries. The unique style of this book will allow it to cover an incredibly broad range of topics in unparalleled detail. Chapters within the book will be written using the same concepts behind software development. Chapters will be treated like functions within programming code, allowing the authors to call on each other's data. These functions will supplement the methodology when specific technologies are examined thus reducing the common redundancies found in other security books. This book is designed to be the one-stop shop for security

engineers who want all their information in one place. The technical nature of this may be too much for middle management; however technical managers can use the book to help them understand the challenges faced by the engineers who support their businesses. Ø Unprecedented Team of Security Luminaries. Led by Foundstone Principal Consultant, Erik Pace Birkholz, each of the contributing authors on this book is a recognized superstar in their respective fields. All are highly visible speakers and consultants and their frequent presentations at major industry events such as the Black Hat Briefings and the 29th Annual Computer Security Institute Show in November, 2002 will provide this book with a high-profile launch. Ø The only all-encompassing book on internal network security. Windows 2000, Windows XP, Solaris, Linux and Cisco IOS and their applications are usually running simultaneously in some form on most enterprise networks. Other books deal with these components individually, but no other book provides a comprehensive solution like Special Ops. This book's unique style will give the reader the value of 10 books in 1.

**Singularity Sky** Charles Stross,2004-06-29 In a technologically suppressed future, information demands to be free in the debut novel from Hugo Award-winning author Charlie Stross. In the twenty-first century, life as we know it changed. Faster-than-light travel was perfected, and the Eschaton, a superhuman artificial intelligence, was born. Four hundred years later, the far-flung colonies that arose as a result of these events—scattered over three thousand years of time and a thousand parsecs of space—are beginning to rediscover their origins. The New Republic is one such colony. It has existed for centuries in self-imposed isolation, rejecting all but the most basic technology. Now, under attack by a

devastating information plague, the colony must reach out to Earth for help. A battle fleet is dispatched, streaking across the stars to the rescue. But things are not what they seem—secret agendas and ulterior motives abound, both aboard the ship and on the ground. And watching over it all is the Eschaton, which has its own very definite ideas about the outcome...

*The Complete Poetry of Cicely Fox Smith [2nd Edition]* Cicely Fox Smith, 2015-06-01 The Complete Poetry of Cicely Fox Smith 2nd Edition, is now fully revised and edited with 74 new poems, edited by Charles Ipcar and James Saville. Cicely Fox Smith was once described by a reviewer as the poet of the sea. This accolade was not casually given or thinly deserved, it was a considered evaluation of the immense body of work that was admired universally by all, and in particular those who sailed and were of the sea. For the first time, this book, *The Complete Poetry of Cicely Fox Smith*, brings all her poetry together, now fully revised, in one book for all to see not only the quantity but also the quality of her poetry. Cicely Fox Smith was born February 1, 1882, and was well-educated at The Manchester High School for Girls from 1894 to 1897, where she described herself later as something of a rebel, and started writing poems at a comparatively early age. She published her first book of verses when she was 17 and it received favorable press comments. She had

a fierce desire to travel to Africa but eventually settled for a voyage to Canada, residing for the most part in the James Bay neighborhood of Victoria, British Columbia, from 1912 to 1913. Her spare time was spent roaming nearby wharves and alleys, talking to residents and sailors alike. She listened to and learned from the sailors' tales until she too was able to speak with that authoritative nautical air that pervades her written work. On November 23, 1913, Cicely returned to England. She soon put her experiences to use in a great outpouring of poetry, some of it clearly focused on supporting England's World War I efforts. Much of her poetry was from the point of view of the sailor. In fact, the detailed nautical content of her poems made it easy to understand why so many readers presumed that she was male. She was familiar with life at sea as few armchair amateurs would ever be. It was only when she was well established that she routinely used the by-line Miss C. Fox Smith or Cicely Fox Smith. Cicely had her poetry published in a wide variety of magazines and newspapers but most notably Punch magazine for which she wrote many poems between 1914 and her death in 1954. She later re-published most of these poems in poetry books. In all, she published some 660 poems. In her life she also published a wide range of books including romantic novels and children's books and also contributed many literary reviews for Punch and the Times Literary Supplement. Her literary outpourings were such as to persuade the Government to award her, at the age of 67, a modest pension for her services to literature. She kept writing to the end of her life about many things and many places but always with the accuracy and knowledge of an expert. Cicely Fox Smith died on April 8th, 1954, in the village of West Hasle Bow, Devon. Cicely is now rapidly gaining a wider appreciative audience as more musicians set her poems to music and

produce many fine songs, primarily in the nautical folk song tradition; over 100 of her poems have been adapted for singing and recorded. It is hoped that the publication of the 2nd Edition of The Complete Poetry of Cicely Fox Smith, with 74 new poems, both published and unpublished, and the important addition of an introduction by Marcia Phillips McGowan, Ph.D., will bring with it a wider recognition and the attention she so richly deserves as a true poet of the sea.
