Biopolymers from Renewable Resources David L. Kaplan,2013-03-09 *Biopolymers from Renewable Resources* is a compilation of information on the diverse and useful polymers derived from agricultural, animal, and microbial sources. The volume provides insight into the diversity of polymers obtained directly from, or derived from, renewable resources. The beneficial aspects of utilizing polymers from renewable resources, when considering synthesis, processing, disposal, biodegradability, and overall material life-cycle issues, suggests that this will continue to be an important and growing area of interest. The individual chapters provide information on synthesis, processing and properties for a variety of polyamides, polysaccharides, polyesters and polyphenols. The reader will have a single volume that provides a resource from which to gain initial insights into this diverse field and from which key references and contacts can be drawn. Aspects of biology, biotechnology, polymer synthesis, polymer processing and engineering, mechanical properties and biophysics are addressed to varying degrees for the specific biopolymers. The volume can be used as a reference book or as a teaching text. At the more practical level, the range of important materials derived from renewable resources is both extensive and impressive. Gels, additives, fibers, coatings and films are generated from a variety of the biopolymers reviewed in this volume. These polymers are used in commodity materials in our everyday lives, as well as in specialty products.

Industrial Biotechnology Mukesh Yadav,Vikas Kumar,Nirmala Sehrawat,2019-10-08 *Industrial Biotechnology* summarizes different aspects of plant biotechnology such as using plants as sustainable resources, phytomedical applications, phytoremediation and genetic engineering of plant

systems. These topics are discussed from an academic as well industrial perspective and thus highlight recent developments but also practical aspects of modern biotechnology.

Strengthening Forensic Science in the United States National Research Council, Division on Engineering and Physical Sciences, Committee on Applied and Theoretical Statistics, Policy and Global Affairs, Committee on Science, Technology, and Law, Committee on Identifying the Needs of the Forensic Sciences Community, 2009-07-29 Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. *Strengthening Forensic Science in the United States: A Path Forward* provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. *Strengthening Forensic Science in the United States* gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

The Tongue and Quill Air Force, 2019-10-11 *The Tongue and Quill* has been a valued Air Force

resource for decades and many Airmen from our Total Force of uniformed and civilian members have contributed their talents to various editions over the years. This revision is built upon the foundation of governing directives and user's inputs from the unit level all the way up to Headquarters Air Force. A small team of Total Force Airmen from the Air University, the United States Air Force Academy, Headquarters Air Education and Training Command (AETC), the Air Force Reserve Command (AFRC), Air National Guard (ANG), and Headquarters Air Force compiled inputs from the field and rebuilt The Tongue and Quill to meet the needs of today's Airmen. The team put many hours into this effort over a span of almost two years to improve the content, relevance, and organization of material throughout this handbook. As the final files go to press it is the desire of The Tongue and Quill team to say thank you to every Airman who assisted in making this edition better; you have our sincere appreciation!

War by Other Means Carlota McAllister,Diane M. Nelson,2013-08-28 Between 1960 and 1996, Guatemala's civil war claimed 250,000 lives and displaced one million people. Since the peace accords, Guatemala has struggled to address the legacy of war, genocidal violence against the Maya, and the dismantling of alternative projects for the future. War by Other Means brings together new essays by leading scholars of Guatemala from a range of geographical backgrounds and disciplinary perspectives. Contributors consider a wide range of issues confronting present-day Guatemala:

returning refugees, land reform, gang violence, neoliberal economic restructuring, indigenous and women's rights, complex race relations, the politics of memory, and the challenges of sustaining hope. From a sweeping account of Guatemalan elites' centuries-long use of violence to suppress dissent to studies of intimate experiences of complicity and contestation in richly drawn localities, *War by Other Means* provides a nuanced reckoning of the injustices that made genocide possible and the ongoing attempts to overcome them. Contributors. Santiago Bastos, Jennifer Burrell, Manuela Camus, Matilde González-Izás, Jorge Ramón González Ponciano, Greg Grandin, Paul Kobrak, Deborah T. Levenson, Carlota McAllister, Diane M. Nelson, Elizabeth Oglesby, Luis Solano, Irmalicia Velásquez Nimatuj, Paula Worby

Nutrient Requirements of Dogs and Cats National Research Council, Division on Earth and Life Studies, Board on Agriculture and Natural Resources, Committee on Animal Nutrition, Subcommittee on Dog and Cat Nutrition, 2006-07-01 Updating recommendations last made by the National Research Council in the mid-1980s, this report provides nutrient recommendations based on physical activity and stage in life, major factors that influence nutrient needs. It looks at how nutrients are metabolized in the bodies of dogs and cats, indications of nutrient deficiency, and diseases related to poor nutrition. The report provides a valuable resource for industry professionals formulating diets, scientists setting research agendas, government officials developing regulations for pet food labeling, and as a university textbook for dog and cat nutrition. It can also guide pet owners feeding decisions for their pets with information on specific nutrient needs, characteristics of different types of pet foods, and factors to consider when feeding cats and dogs.

The Challenge of Human Rights David Keane, Yvonne McDermott, 2012-01-01 'This volume

represents a genuine attempt to think beyond the realms of what exists, to reflect on ideas postulated in the past that could be of great salience in the future. It presents the reader with a key question; to what extent are the contemporary concepts of human rights and the systems that support them equipped to address the challenges of a changed world? By thinking through some of the ideas of the past, with a set of promising young scholars alongside more established names, readers will gain a sense of how human rights politics have shaped the current regime while also becoming attuned to the extent to which new directions and mechanisms can be forged in the future. Many of the individuals whose contributions are encompassed in this volume have strong links to the Irish Centre for Human Rights, at the National University of Ireland, Galway, an institution that has had a significant impact in its first decade of existence under the stewardship of Professor William A. Schabas. This volume celebrates the success of the institution by showcasing some of the talent it has generated, and is likely to be of avid interest to all who care about the future of human rights.' – From the foreword by Joshua Castellino, Middlesex University, UK

The Challenge of Human Rights takes a detailed and exploratory approach to topics across the field of human rights, and seeks to map a path for future research and policy development. It examines contemporary approaches to established rights, such as the right to peace and the protection against double jeopardy, while also revisiting overlooked or forgotten rights and concepts such as slavery, apartheid and the right to resist, determining the optimal place for those rights in today's world. The contributing authors outline lacunae in human rights law where rights could be established, from voting rights for under-18s to rights for the dead to cultural and intellectual property rights, and also apply completely new approaches to questions that have troubled human rights advocates for decades. This innovative book will be essential reading for researchers and practitioners of human rights law, political

scientists, historians, and others who have a general interest in the future trajectory of human rights.

Handbook of Bioenergy Crop Plants Chittaranjan Kole,Chandrashekhar P. Joshi,David R. Shonnard,2012-03-22 As the world's population is projected to reach 10 billion or more by 2100, devastating fossil fuel shortages loom in the future unless more renewable alternatives to energy are developed. Bioenergy, in the form of cellulosic biomass, starch, sugar, and oils from crop plants, has

emerged as one of the cheaper, cleaner, and environmentally sustainable alternatives to traditional forms of energy. Handbook of Bioenergy Crop Plants brings together the work of a panel of global experts who survey the possibilities and challenges involved in biofuel production in the twenty-first century. Section One explores the genetic improvement of bioenergy crops, ecological issues and biodiversity, feedstock logistics and enzymatic cell wall degradation to produce biofuels, and process technologies of liquid transportation fuels production. It also reviews international standards for fuel quality, unique issues of biofuel-powered engines, life-cycle environmental impacts of biofuels compared with fossil fuels, and social concerns. Section Two examines commercialized bioenergy crops, including cassava, Jatropha, forest trees, maize, oil palm, oilseed Brassicas, sorghum, soybean, sugarcane, and switchgrass. Section Three profiles emerging crops such as Brachypodium, diesel trees, minor oilseeds, lower plants, Paulownia, shrub willow, sugarbeet, sunflower, and sweet potato. It also discusses unconventional biomass resources such as vegetable oils, organic waste, and municipal sludge. Highlighting the special requirements, major achievements, and unresolved concerns in bioenergy production from crop plants, the book is destined to lead to future discoveries related to the use of plants for bioenergy production. It will assist in developing innovative ways of ameliorating energy problems on the horizon.

Green Technologies for the Oil Palm Industry Dominic C.Y. Foo, Mustafa Kamal Tun Abdul Aziz, 2018-09-25 This book reports the latest work on green technologies in palm oil milling processes, including new processes and various optimisation techniques. It covers the latest developments on palm oil milling process with new technologies, alternative solvent design, residual oil recovery, palm oil mill effluent treatment, palm biomass supply chain, as well as ecoindustrial park concept. The book is intended for industrial practitioners and academics interested in green technologies for palm oil

milling processes.
