Typographic Systems of Design Kimberly Elam, 2007-05-03 Typographic organization has always been a complex system in that there are so many elements at play, such as hierarchy, order of reading, legibility, and contrast. In *Typographic Systems*, Kim Elam, author of our bestselling books, *Geometry of Design* and *Grid Systems*, explores eight major structural frameworks beyond the grid including random, radial, modular, and bilateral systems. By taking the reader through exercises, student work, and professional examples, Elam offers a broad range of design solutions. Once essential visual organization systems are understood the designer can fluidly organize words or images within a structure, combination of structures, or a variation of a structure. With clarity and substance, each system from the structured axis to the nonhierarchical radial array is explained and explored so that the reader comes away with a better understanding of these intricate complex arrangements. *Typographic Systems* is the seventh title in our bestselling *Design Briefs* series, which has sold more than 100,000 copies worldwide.

The End of Money New Scientist, 2021-08-19 The End of Money is an essential introduction to cryptocurrencies and the blockchain revolution. On this journey you'll discover how this staggering new technology has the potential to enable an ultra-libertarian society beyond government control. Murder for hire. Drug trafficking. Embezzlement. Money laundering. These might sound like plot lines of a thriller, but they are true stories from the short history of cryptocurrencies - digital currencies conceived by computer hackers and cryptographers that represent a completely new sort of financial transaction that could soon become mainstream. The most famous - or infamous - cryptocurrency is bitcoin. But look beyond its tarnished reputation and something much shinier emerges. The technology that underlies bitcoin and other cryptocurrencies - the blockchain - is hailed as the greatest advancement since the invention of the internet. It is now moving away from being the backbone for a digital currency and making inroads into other core concepts of society: identity, ownership and even the rule of law. The End of Money is your essential introduction to this transformative new technology that has governments, entrepreneurs and forward-thinking people from all walks of life sitting up and taking notice. The Alexandria Connection Adrian d'Hage, 2014-10-22 A chilling new world order is upon us . . . In the shifting desert sands of Egypt, rumours abound of a lost papyrus that will reveal the true purpose of the Pyramids of Giza. Could these ancient monoliths be the source of a new kind of energy, one that comes at no cost to the planet? CIA agent Curtis O'Connor and archaeologist Aleta Weizman are determined to find out. Close by, a shadowy and powerful group known as Pharos meets in Alexandria, its membership a closely guarded secret. Its first order of business: to orchestrate chaos on international financial markets with a series of spectacular terrorist attacks on the world's fossil-fuel supplies. And in Cairo, amid the anarchy of Tahrir Square, thieves have broken into the famed Museum of Antiquities and stolen one of the world's priceless artifacts: the mask of Tutankhamun. Is the audacious theft linked to the Pharos Group? Nimbly weaving politics, history and science through a rip-roaring plot, from Afghanistan to Washington, Sydney to London, *The Alexandria Connection* is a spectacular and stylish ride. Praise for Adrian d'Hage's Novels 'A provocative book in which every sort of dogma is questioned and every preconceived idea turned on its head.' Sunday Mail 'A fast-paced and thrilling read.' The Russian Affair Adrian d'Hage, 2018-07-02 Russian President Petrov is determined to restore his country's dominance on the world stage at any price. In order to develop deadlier nuclear weapons, he recruits Ilana Rabinovich, a beautiful but lethal scientist, to infiltrate the Mossad and

steal their research. What no one expects is for the Israelis to then assign her an even more dangerous mission of their own: to penetrate the US nuclear facilities in the deserts of Los Alamos. If the information falls into the wrong hands the results could be devastating. Especially as in the Hindu Kush, ISIS soldiers are also plotting to acquire nuclear weapons. It's up to CIA agent Curtis O'Connor to stop them before it's too late. From Russia's secret nuclear city of Sarov, across the myriad canals of St Petersburg, to an assault on an ancient castle more impenetrable than Colditz, the chase is on. But with a corrupt Russian general, a femme fatale double agent and a very unpredictable US president waiting in the wings, is it only a matter of time until a war begins?

Semi-Supervised and Unervised Machine Learning Amparo Albalade, Wolfgang Minker, 2011-01-18 This book provides a detailed and up-to-date overview on classification and data mining methods. The first part is focused on supervised classification algorithms and their applications, including recent research on the combination of classifiers. The second part deals with unsupervised data mining and knowledge discovery, with special attention to text mining. Discovering the underlying structure on a data set has been a key research topic associated to unsupervised techniques with multiple applications and challenges, from web-content mining to the inference of cancer subtypes in genomic microarray data. Among those, the book focuses on a new application for dialog systems which can be thereby made adaptable and portable to different domains. Clustering evaluation metrics and new approaches, such as the ensembles of clustering algorithms, are also described.

Might a catastrophic pole shift be on the way? From the corridors of power in Nazi Germany to modern-day Washington, from the secret archives of the Vatican to the Temple of the Lost World pyramid in the jungles of Central America, The Maya Codex takes us on a heart-stopping journey to find the codex before it's too late. The Omega Scroll Adrian d'Hage, 2006-07-31 A Dead Sea Scroll has lain undisturbed in a cave near Qumran for nearly two thousand years. The Omega Scroll contains both a terrible warning for civilisation and the coded number the Vatican fears the most. The Pope's health is failing and the Cardinal Secretary of State, the ruthless Lorenzo Petroni, has the keys to St Peter within his grasp. Three things threaten to destroy him: Cardinal Giovanni Donnelli has started an investigation into

the Vatican bank; journalist Tom Schweiker is looking into Petroni's past; and the brilliant Dr Angela Bassetti is piecing together fragments of the Omega Scroll. While they fight for their lives in a deadly race for the scroll, the Vatican will stop at nothing to keep the prophecy hidden. At the CIA's headquarters in Virginia, Mike McKinnon suspects a number of missing nuclear suitcase bombs are connected to the warning in the Omega Scroll. In the Judaen Desert a few more grains of sand trickle from the wall of a cave. The countdown for civilisation has begun.

Annals of the Revolution: Or, A History of the Doans H. K. BROOKE, 1843

The Beijing Conspiracy Adrian D'Hagé, 2007 From China's western-most province, near its border with Pakistan, comes this deadly ultimatum. In the White House Situation Room, the President and his team dismiss it as one of thousands of threats made against the US every week. But CIA agent Curtis O'Connor isn't so sure. The man making the warning is Dr Khalid Kadeer, a brilliant Muslim microbiologist. As an expert on bioterrorism, O'Connor knows Kadeer isn't bluffing. So too does Kate Braithwaite. She works in a hot-zone laboratory, on the USA's own top secret biological weapons. If the results of Kate's research fall into the wrong hands, billions of people will die. As Curtis O'Connor and Kate Braithwaite work to unravel the riddles of the Kadeer's warning and prevent a devastating attack on the world's greatest sporting event, they begin to uncover a threat more sinister than they had imagined.
