The P.O.S. Decision Cameron Thomas,Lu Zhang,JaeMin Cha,Jeffrey Beck,2018 This case study examines the issue of Point of Sale (POS) system adoption and implementation in the context of two independent full service restaurants in Northeast Ohio. The main focus is on the restaurant company Ray's Place, which has locations in Fairlawn and Kent, Ohio. Ray's Place Fairlawn (opened in 2014) adopted a POS system prior to opening. However, some of the beneficial POS data have not been regularly tracked. Ray's Place Kent (Est. 1937) has historically, and still currently utilizes a manual guest check system. The owner and senior management team are now facing the difficult decision of whether Ray's Place Kent should adopt a similar POS system as the one installed at Ray's Place Fairlawn or continue with manual operation.

  The Human Brand Chris Malone,Susan T. Fiske,2013-10-07 Why we choose companies and brands in the same way that we unconsciously perceive, judge, and behave toward one another People everywhere describe their relationships with brands in a deeply personal way—we hate our banks, love our smartphones, and think the cable company is out to get us. What's actually going on in our brains when we make these judgments? Through original research, customer loyalty expert Chris Malone and top social psychologist Susan Fiske discovered that our perceptions arise from spontaneous judgments on warmth and competence, the same two factors that also determine our impressions of people. We see companies and brands the same way we automatically perceive, judge, and behave toward one another. As a result, to achieve sustained success, companies must forge genuine relationships with customers. And as customers, we have a right to expect relational accountability from the companies and brands we support. Applies the social psychology concepts of warmth (what intentions others have toward us) and competence (how capable they are of carrying out those intentions) to the way we perceive and relate to companies and brands Features in-depth analyses of companies such as Hershey's, Domino's, Lululemon, Zappos, Amazon, Chobani, Sprint, and more Draws from original research, evaluating over 45 companies over the course of 10 separate studies The Human Brand is essential reading for understanding how and why we make the choices we do, as well as what it takes for companies and brands to earn and keep our loyalty in the digital age.

  No-Man's Lands Scott Huler,2010-01-05 When NPR contributor Scott Huler made one more attempt to get through James Joyce's Ulysses, he had no idea it would launch an obsession with the book's inspiration: the ancient Greek epic The Odyssey and the lonely homebound journey of its Everyman hero, Odysseus. No-Man's Lands is Huler's funny and touching exploration of the life lessons embedded within The Odyssey, a legendary tale of wandering and longing that could be read as a veritable guidebook for middle-aged men everywhere. At age forty-four, with his first child on the way, Huler felt an instant bond with Odysseus, who fought for some twenty years against formidable difficulties to return home to his beloved wife and son. In reading The Odyssey, Huler saw the chance to experience a great vicarious adventure as well as the opportunity to assess the man he had become and embrace the imminent arrival of both middle age and parenthood. But Huler realized that it wasn't enough to simply read the words on the page—he needed to live Odysseus's odyssey, to visit the exotic destinations that make Homer's story so timeless. And so an ambitious pilgrimage was born . . . traveling the entire length of Odysseus's two-decade journey. In six months. Huler doggedly retraced Odysseus's every step, from the ancient ruins of Troy to his ultimate destination in Ithaca. On the way, he discovers the Cyclops's Sicilian cave, visits the land of the

dead in Italy, ponders the lotus from a Tunisian resort, and paddles a rented kayak between Scylla and Charybdis and lives to tell the tale. He writes of how and why the lessons of The Odyssey—the perils of ambition, the emptiness of glory, the value of love and family—continue to resonate so deeply with readers thousands of years later. And as he finally closes in on Odysseus's final destination, he learns to fully appreciate what Homer has been saying all along: the greatest adventures of all are the ones that bring us home to those we love. Part travelogue, part memoir, and part critical reading of the greatest adventure epic ever written, No-Man's Lands is an extraordinary description of two journeys—one ancient, one contemporary—and reveals what The Odyssey can teach us about being better bosses, better teachers, better parents, and better people.

Ethnicity and Kinship in North American and European Literatures Silvia Schultermandl,Klaus Rieser,2021-03-17 This edited collection applies kinship as an analytical concept to better understand the affective economies, discursive practices, and aesthetic dimensions through which cultural narratives of belonging establish a sense of intimacy and affiliation. In North American and European ethnic literatures, kinship has several social functions: negotiating diasporic belonging in and outside of the perimeters of bloodlines and genealogy; positioning queer-feminist interventions to counter ethno-nationalist narratives of belonging; challenging liberal sentimentalist narratives, such as those grafted onto the bodies of transnational adoptees; re-formulating cultural heterogeneity through interracial and interethnic kinship constellations outside either post-racial assumptions about colorblindness or celebrations of racial and ethnic pluralism. In all of these cases, kinship features as a common theme through which contemporary authors attend to challenges of conscribing individuals into inclusive, counter-hegemonic cultural narratives of belonging.

Violence and Mental Health Jutta Lindert,Itzhak Levav,2015-02-25 Violence is one of the most important challenges, not only for public health systems, but also for public mental health. Violence can have immediate as well as long-term and even transgenerational effects on the mental health of its victims. This book provides a comprehensive and wide-ranging assessment of the mental health legacy left by violence. It addresses the issues as they affect states, communities and families, in other words at macro-, meso- and microlevels, beginning by describing the impact of violence on neurobiology and mental health, as well as the spectrum of syndromes and disorders associated with different forms of violence. The work moves on to tackle violence at the international—and intranational—level before zeroing in on the nature of violence in communities such as villages or city districts. It also examines the results of violence in the family. Each type of violence has distinct effects on mental health and in each chapter specific groups are explored in depth to demonstrate the heterogeneity of violence as well as the diversity of its outcomes in the realm of public mental health. Finally, the book addresses the notion of 'undoing violence' by detailing case studies of effective interventions and

prevention occurring in countries, communities and families. These cases give us pause to reflect on the nature of resilience and dignity in the context of violence and mental health. All the chapters have been written by leading authors in the field and provide a state-of-the-art perspective. The authors, from different fields of expertise, facilitate interdisciplinary and international insights into the impact of violence on mental health.
