Information Needs of Communities Steven Waldman, 2011-09 In 2009, a bipartisan Knight Commission found that while the broadband age is enabling an info. and commun. renaissance, local communities in particular are being unevenly served with critical info. about local issues. Soon after the Knight Commission delivered its findings, the FCC initiated a working group to identify crosscurrent and trend, and make recommendations on how the info. needs of communities can be met in a broadband world. This report by the FCC Working Group on the Info. Needs of Communities addresses the rapidly changing media landscape in a broadband age. Contents: Media Landscape; The Policy and Regulatory Landscape; Recommendations. Charts and tables. This is a print on demand report.

Innovative Business Practices Alkis Thrassou, Demetris Vrontis, 2013-07-16 This second decade of the millennium finds the world changing at a once unimaginable pace. Businesses, tangled in the interwoven threads of galloping globalization, technological advances, cultural diversity, economic recession and deep-rooted human social evolution, struggle to keep up with incessant changes; consequently and inexorably experiencing severe difficulties and disorientation. Executives, much bewildered, habitually turn to conventional, time-honoured strategies and practices, which increasingly fail to offer the much-sought answers and means to survival, competitiveness and growth. We are currently experiencing a business era of turbulence and dynamic change – an era that inherently rejects conventionality and orthodox business theory to reward businesses embracing agility, reflex-style adaptability, innovation and creativity. This turbulence is, however, not a parenthesis or even a pattern, but the new reality in which each business must reinvent and redefine itself. This is a new reality of stakeholders that shift focus from the external to the internal, from the tangible to the intangible, and from fact to perception. This book presents research and paradigms that transcend classical theory in order to examine how business practice is positively affected by these conditions. Across a multitude of sectors and organisational types, scholars of different business specialisations set the theoretical foundations of contemporary thinking and present their practical implementations.

The Contrarian Max Chafkin, 2021-09-21 A New York Times Notable Book A biography of venture capitalist and entrepreneur Peter Thiel, the enigmatic, controversial, and hugely influential power broker who sits at the dynamic intersection of tech, business, and politics “Max Chafkin’s The Contrarian is much more than a consistently shocking biography of Peter Thiel, the most important investor in tech and a key supporter of the Donald Trump presidency. It’s also a disturbing history of Silicon Valley that will make you

reconsider the ideological foundations of America's relentless engine of creative destruction."—Brad Stone, author of *The Everything Store* and *Amazon Unbound* Since the days of the dot-com bubble in the late 1990s, no industry has made a greater impact on the world than Silicon Valley. And few individuals have done more to shape Silicon Valley than Peter Thiel. The billionaire venture capitalist and entrepreneur has been a behind-the-scenes operator influencing countless aspects of our contemporary way of life, from the technologies we use every day to the delicate power balance between Silicon Valley, Wall Street, and Washington. But despite his power and the ubiquity of his projects, no public figure is quite so mysterious. In the first major biography of Thiel, Max Chafkin traces the trajectory of the innovator's singular life and worldview, from his upbringing as the child of immigrant parents and years at Stanford as a burgeoning conservative thought leader to his founding of PayPal and Palantir, early investment in Facebook and SpaceX, and relationships with fellow tech titans Mark Zuckerberg, Elon Musk, and Eric Schmidt. *The Contrarian* illuminates the extent to which Thiel has sought to export his values to the corridors of power beyond Silicon Valley, including funding the lawsuit that destroyed the blog Gawker and strenuously backing far-right political candidates, notably Donald Trump for president in 2016. Eye-opening and deeply reported, *The Contrarian* is a revelatory biography of a one-of-a-kind leader and an incisive portrait of a tech industry whose explosive growth and power is both thrilling and fraught with controversy.

Between Truth and Power Julie E. Cohen, 2019 This work explores the relationships between legal institutions and political and economic transformation. It argues that as law is enlisted to help produce the profound economic and sociotechnical shifts that have accompanied the emergence of the informational economy, it is changing in fundamental ways.

The Responsibility to Protect SONJA GROVER, 2018-03-08 This book presents the views of various international law and human rights experts on the contested meaning, scope of application, value and viability of R2P; the principle of the Responsibility to Protect. R2P refers to the notion that the international community has a legal responsibility to protect civilians against the potential or ongoing occurrence of the mass atrocity crimes of genocide, large scale war crimes, ethnic cleansing and crimes against humanity. R2P allows for intervention where the individual State is unable or unwilling to so protect its people or is in fact a perpetrator. The book addresses also the controversial issue of whether intervention by States implementing R2P with or without the endorsement of the United Nations Security Council constitutes a State act of aggression or instead is legally justified and not an infringement on the offending State's sovereign jurisdiction. The adverse impact on global peace and security of the failure to protect civilians from mass atrocity crimes has put in stark relief the need to address anew the principle of 'responsibility to protect' and the feasibility and wisdom of its application and this book is a significant contribution to that effort. This book was originally published as a special issue of the *International Journal of Human Rights*.

Data Driven Karen Levy, 2022-12-06 A behind-the-scenes look at how digital surveillance is affecting the trucking way of life Long-haul truckers are the backbone of the American economy, transporting goods under grueling conditions and immense economic pressure. Truckers have long valued the day-to-day independence of their work, sharing a strong occupational identity rooted in a tradition of autonomy. Yet these workers increasingly find themselves under many watchful eyes. *Data Driven* examines how digital surveillance is upending life and work on the open road, and raises crucial questions about the role of data collection in broader systems of social control. Karen Levy takes readers inside a world few ever see, painting a bracing portrait of one of the last great American frontiers. Federal regulations now require truckers to buy and install digital monitors that

capture data about their locations and behaviors. Intended to address the pervasive problem of trucker fatigue by regulating the number of hours driven each day, these devices support additional surveillance by trucking firms and other companies. Traveling from industry trade shows to law offices and truck-stop bars, Levy reveals how these invasive technologies are reconfiguring industry relationships and providing new tools for managerial and legal control—and how truckers are challenging and resisting them. *Data Driven* contributes to an emerging conversation about how technology affects our work, institutions, and personal lives, and helps to guide our thinking about how to protect public interests and safeguard human dignity in the digital age.

Teens, Libraries, and Social Networking Denise E. Agosto, June Abbas, 2011-05-18
Learn how teens use social networking technologies and how these same technologies can be used to engage them in library services. *Teens and Social Networking Now: What Librarians Need to Know* is organized around ten major topics, including using social networking sites to connect teens to young adult literature, social networking and legislative issues, social networking and safety/privacy issues, and the social and educational benefits of social networking. Expert practitioners explain how such issues can and should impact library services to young adults, focusing on concrete suggestions and specific steps for best practices and program designs that will help librarians utilize social networking tools to enhance library services to teens, both online and in the library. As background, the book explores the reasons so many teens use these sites. It also shares a profile of an award-winning public library's use of social networking to engage teen library users and a national survey of the ways YA librarians are using social networking to deliver public library services.

Islamic State's Online Activity and Responses Maura Conway, Stuart Macdonald, 2020-06-09 *Islamic State's Online Activity and Responses* provides a unique examination of Islamic State's online activity at the peak of its golden age between 2014 and 2017 and evaluates some of the principal responses to this phenomenon. Featuring contributions from experts across a range of disciplines, the volume examines a variety of aspects of IS's online activity, including their strategic objectives, the content and nature of their magazines and videos, and their online targeting of females and depiction of children. It also details and analyses responses to IS's online activity – from content moderation and account suspensions to informal counter-messaging and disrupting terrorist financing – and explores the possible impact of technological developments, such as decentralised and peer-to-peer networks, going forward. Platforms discussed include dedicated jihadi forums, major social media sites such as Facebook, Twitter, and YouTube, and newer services, including Twister. *Islamic State's Online Activity and Responses* is essential reading for researchers, students, policymakers, and all those interested in the contemporary challenges posed by online terrorist propaganda and radicalisation. The chapters were originally published as a special issue of *Studies in Conflict & Terrorism*.

Social Networks as the New Frontier of Terrorism Laura Scaife, 2017-01-06 *Terrorism*. Why does this word grab our attention so? Propaganda machines have adopted modern technology as a means to always have their content available. Regardless of the hour or time zone, information is being shared by somebody, somewhere. Social media is a game changer influencing the way in which terror groups are changing their tactics and also how their acts of terror are perceived by the members of the public they intend to influence. This book explores how social media adoption by terrorists interacts with privacy law, freedom of expression, data protection and surveillance legislation through an exploration of the fascinating primary resources themselves, covering everything from the Snowden Leaks, the rise of ISIS to Charlie Hebdo. The book also covers lesser worn paths such as the travel guide that proudly boasts that you can get Bounty and Twix bars mid-conflict, and the best local hair salons for jihadi brides. These vignettes, amongst the many

others explored in this volume bring to life the legal, policy and ethical debates considered in this volume, representing an important part in the development of understanding terrorist narratives on social media, by framing the legislative debate. This book represents an invaluable guide for lawyers, government bodies, the defence services, academics, students and businesses.

Sourcing Start-up Success Adrian Rössler, 2011-09-01 Inhaltsangabe: Introduction: What are the common denominators of big buzzing brands such as Google, Facebook, Groupon, Twitter, PayPal, YouTube, or LinkedIn? First of all, they are all web-based to a large extent. Google allows you to search the web. Facebook and LinkedIn lets you connect to your friends or business contacts online. Twitter allows you to absorb and share information in an unprecedented manner. PayPal facilitates millions of payment processes on the web. YouTube is the largest resource of videos online, and Groupon allows people to team up via the web and strike deals with high discounts for local services. Second, they are all relatively young compared to companies such as Microsoft, Dell, or Apple. In fact, Google and PayPal are the seniors with 13 years, while Groupon has not even celebrated its third birthday. Third, these companies have established a global presence through the impact of the lightning fast development of the Internet and effects of globalization. With Twitter as the only exception, they are pulling in millions and millions of revenue and are valued at several billion dollars. Start-ups are an important factor contributing to economic growth. They create new jobs, new or improved services and products and thus enhance general welfare. Since Birch concluded in 1979 that small firms create more new jobs than large firms, several research streams have started to examine this phenomenon. However, every year probably thousands of newly created ventures fail to cope with the challenges that are characteristic of the start-up environment. In fact, research has shown that more than half of newly founded ventures fail within two years. Hence, a strong interest of both practitioners and research scholars has been to identify success factors and shed more light on the ecosystem of start-ups and the processes that still largely take place in a black box. The approaches and results that link certain characteristics or actions to success vary widely in their theoretical background as well as the impact and practical relevance generated. Recently, the worldwide financial and economic crisis has given rise to a renewed call for more entrepreneurship and support for start-up and innovation culture. In the wake of the crisis, opinion leaders, public policy, and media have started to look again at entrepreneurial activity and start-ups as a promising provider of growth. Also web-based start-ups that had lost their reputation [...]

Secrets and Power in Myanmar Andrew Selth, 2019-09-06 No external observer knows more about Myanmar's security and intelligence apparatus than Andrew Selth. In this book he presents an account of the structure and functions of Myanmar's deep state, along with a tale of personal ambition, rivalry and ruthless power politics worthy of John Le Carre. A thoroughly educative, entertaining and intriguing read. — Professor Michael Wesley, Dean, College of Asia and the Pacific, The Australian National University Andrew Selth has once again amply illustrated the depth and penetration of his study of Myanmar/Burma and its institutions. This work on the more recent aspects of the country's intelligence apparatus goes beyond a masterful and comprehensive analysis of the Burmese intelligence community, and probes the social and institutional bases of the attitudes giving rise to that critical aspect of power. We are once again in Dr Selth's debt. This is required reading for serious observers of the Burmese scene. — David I. Steinberg, Distinguished Professor of Asian Studies Emeritus, Georgetown University By lifting the lid on a pervasive yet secretive intelligence apparatus, Andrew Selth makes an outstanding contribution to Myanmar Studies. For scholars and practitioners alike, this book provides an essential history of a security state that remains powerful even during

the transition away from overt authoritarian rule. — Professor Ian Holliday, Vice-President (Teaching and Learning), The University of Hong Kong

Muslim Americans Nahid Afrose Kabir, 2016-08-12 With Islamophobia on the rise in the US since 9/11, Muslims remain the most misunderstood people in American society. Taking as its point of departure the question of the compatibility of Islam and democracy, this book examines Muslims' sense of belonging in American society. Based on extensive interview data across seven states in the US, the author explores the question of what it means to be American or un-American amongst Muslims, offering insights into common views of community, culture, and wider society. Through a combination of interviewees' responses and discourse analysis of print media, Muslim Americans also raises the question of whether media coverage of the issue might itself be considered 'un-American'. An empirically grounded study of race and faith-based relations, this book undertakes a rigorous questioning of what it means to be American in the contemporary US. As such, it will appeal to scholars of sociology and political science with interests in race, ethnicity, religion and national identity.

The Principal's Quick-Reference Guide to School Law Robert F. Hachiya, 2022-02-15 The go-to legal resource for today's principals! New technology and world events have upended everything we once took for granted about schools, including the laws and policies that govern them. School safety concerns, curriculum challenges, the ever-changing landscape of social media, and the 2020/2021 COVID-19 crisis have made school leadership an infinitely more complex arena. Familiarity with the law is essential to help principals maintain safe and equitable communities and minimize legal risk. The 4th edition of *The Principal's Quick-Reference Guide to School Law* provides the go-to help principals need to increase their knowledge of education law in this time of change. Within its pages, leaders can access tools to help them make better decisions when educational law related issues impact their schools. Readers will find A completely revamped design for easier reference Practical examples to help demystify complex cases Updated cases studies from 2014 to today Guidance on new topics, such as vaping, sexting, student protests and walkouts An Education Law 101 for Teachers section to help leaders provide basic legal training for staff and teachers. Written for aspiring and current school principals, this book will answer all the "what if" questions that inevitably arise at least once in every leader's tenure.

Big Data and Innovation in Tourism, Travel, and Hospitality Marianna Sigala, Roya Rahimi, Mike Thelwall, 2019-02-26 This book brings together multi-disciplinary research and practical evidence about the role and exploitation of big data in driving and supporting innovation in tourism. It also provides a consolidated framework and roadmap summarising the major issues that both researchers and practitioners have to address for effective big data innovation. The book proposes a process-based model to identify and implement big data innovation strategies in tourism. This process framework consists of four major parts: 1) inputs required for big data innovation; 2) processes required to implement big data innovation; 3) outcomes of big data innovation; and 4) contextual

factors influencing big data exploitation and advances in big data exploitation for business innovation.

Anticolonial Afterlives in Egypt Sara Salem, 2020-04-30 Through Gramsci and Fanon, Salem centers anticolonial politics by exploring the connections between Egypt's moment of decolonization and the 2011 revolution.

In The Garden of Beasts Erik Larson, 2011-08-31 'A compelling tale... a narrative that makes such a brave effort to see history as it evolves and not as it becomes.' SPECTATOR Suffused with the tense atmosphere of the times, and with brilliant portraits of Hitler, Goebbels, Goering and Himmler amongst others, Erik Larson's new book sheds unique light on events as they unfold, resulting in an unforgettable, addictively readable work of narrative history. Berlin, 1933. William E. Dodd, a mild-mannered academic from Chicago, has to his own and everyone else's surprise, become America's first ambassador to Hitler's Germany, in a year that proves to be a turning point in history. Dodd and his family, notably his vivacious daughter, Martha, observe at first-hand the many changes - some subtle, some disturbing, and some horrifically violent - that signal Hitler's consolidation of power. Dodd has little choice but to associate with key figures in the Nazi party, his increasingly concerned cables make little impact on an indifferent U.S. State Department, while Martha is drawn to the Nazis and their vision of a 'New Germany' and has a succession of affairs with senior party players, including first chief of the Gestapo, Rudolf Diels. But as the year darkens, Dodd and his daughter find their lives transformed and any last illusion they might have about Hitler are shattered by the violence of the 'Night of the Long Knives' in the summer of 1934 that established him as supreme dictator ...
