Social Media Data Extraction and Content Analysis Hai-Jew,

Shalin,2016-08-01 In today's society, the utilization of social media platforms has become an abundant forum for individuals to post, share, tag, and, in some cases, overshare information about their daily lives. As significant amounts of data flood these venues, it has become necessary to find ways to collect and evaluate this information. Social Media Data Extraction and Content Analysis explores various social networking platforms and the technologies being utilized to gather and analyze information being posted to these venues. Highlighting emergent research, analytical techniques, and best practices in data extraction in global electronic culture, this publication is an essential reference source for researchers, academics, and professionals.

Facebook and Conversation Analysis Matteo Farina,2018-05-17 Facebook and Conversation Analysis investigates the structure and organization of comments on a major social media platform, Facebook, using applied conversation analysis methods. Providing previously undocumented insights into the structure of comment threads, this book demonstrates that they have a meaningful organization, rather than casually following one another. Although normally used to explore the structure of spoken conversations, in recent years conversation analysis approaches have been successfully applied to examine online interactions on Twitter, discussion forums and email

exchanges. By turning this approach towards Facebook comments, Matteo Farina provides clear and important insights into the organization of this type of social interaction. Supported by a large sample of data, with findings based on a corpus of 213 comment threads, with over 1,200 comments exchanged by 266 contributors, this book makes an important contribution to our understanding of the way people communicate on Facebook.

Facebook Nation Newton Lee, 2012-09-15 President Barack Obama, in his 2011 State of the Union Address, called America the nation of Edison and the Wright brothers and of Google and Facebook. U.S. Chief Information Officer,

Steven VanRoekel, said that America has become a Facebook nation that demands increased transparency and interactivity from the federal government. Facebook as a nation in 2012 would be the third largest country in the world with over 900 million citizens, after China and India. This book portrays the social media ecosystem as a world of increasing Total Information Awareness, which is essentially a civilian version of the controversial Total Information Awareness program unveiled in 2002 by the Defense Advanced Research Projects Agency (DARPA) at the U.S. Department of Defense. Back in the 60's, DARPA initiated and funded the research and development of Advanced Research Projects Agency Network (ARPANET) that went online in 1969. The success of ARPANET gave rise to the global commercial Internet in the 90's and the new generation of Fortune 500 companies today including Amazon.com, Google, eBay, and Yahoo!. As if life comes full circle in the 21st century, private businesses and the ubiquity of social networks such as Facebook, Google+, Twitter, and YouTube are creating the technologies and infrastructures necessary for the DARPA-proposed Total Information Awareness program. WikiLeaks founder Julian Assange called Facebook the most appalling spying machine that has ever been invented. Indeed, military and civilian technologies have interwoven into every fabric of our society, as Facebook co-founder and CEO Mark Zuckerberg said, We exist at the intersection of technology and social issues. This book offers discourse and practical advice on the privacy issue in the age of big data, the rise of Facebook nation, and

Total Information Awareness. Opening with President Ronald Reagan's 1984 National Security Decision Directive and ending with George Orwell's novel 1984, the author takes us on a roller-coaster ride through Facebook's botched IPO, Carrier IQ, Kony 2012, SOPA/PIPA blackout, cyber bullying, crime fighting, and a host of other timely issues facing our Facebook nation. Social media strategists, information architects, social scientists, policymakers, and academic scholars in the Program in Science, Technology, and Society (STS) will find this book a valuable asset.

The Demons of Liberal Democracy Adrian Pabst, 2019-07-12 Liberals blame the global retreat of liberal democracy on globalisation and authoritarian leaders. Only liberalism, so they assume, can defend democratic rule against multinationals or populists at home and abroad. In this provocative book, Adrian Pabst contends that liberal democracy is illiberal and undemocratic – intolerant about the values of ordinary people while concentrating power and wealth in the hands of unaccountable elites. Under the influence of contemporary liberalism, democracy is sliding into oligarchy, demagoguery and anarchy. Liberals, far from defending open markets and free speech, promote monopolies such as the new tech giants that undermine competition and democratic debate. Liberal individualism has eroded the social bonds and civic duties on which democracy depends for trust and cooperation. To banish liberal democracy's demons, Pabst proposes radical ideas for economic democracy, a politics of persuasion and a better balance of personal freedom with social solidarity. This book's defence of democratic politics against both liberals and populists will speak to all readers trying to understand

our age of upheaval.

Supportive Conversations on Facebook Timelines Radzuwan Ab. Rashid, Kamariah Yunus, Zanirah Wahab, 2018-04-17 The emergence of social networking sites, like Facebook, and people's engagement with one another through them is a relatively under-researched area for discourse analysis. The content of the book revolves around Discourse Topic Management which is under the theme of Discourse Analysis. It is written to extend the very limited literature in the area of Discourse Topic, especially for the discourse which takes place on social networking sites. This study discusses the characteristics of

topical actions employed by English language teachers and their Facebook Friends in managing supportive conversations which take place on Timelines. In addition to employing new strategies, enabled by the particular features of the site, the teachers and their Friends also creatively adapt the strategies used in face-to-face conversations to manage their online conversations, thus contributing to the emergence of unique characteristics of discourse topic management in the context of social networking sites. The book brings together the existing frameworks of Discourse Topic Management, which are previously applied in the context of face-to-face conversations, and synthesizes the frameworks for a more comprehensive model into examining the conversations which take place on Facebook Timelines. The novelty of this book lies in its synthesized framework, the recontextualization of the framework for online conversations and the theoretical extension based on the data analysis presented in each chapter. Since people's engagement with social networking sites is an emerging behaviour, this timely book provides insights into the phenomenon and also proposes a comprehensive analytical framework for other researchers interested in similar contexts.

The Year of Living Danishly Helen Russell, 2015-01-08 * NOW WITH A NEW CHAPTER * 'A hugely enjoyable romp through the pleasures and pitfalls of setting up home in a foreign land.' - Guardian Given the opportunity of a new life in rural Jutland, Helen Russell discovered a startling statistic: Denmark, land of long dark winters, cured herring, Lego and pastries, was the happiest place on earth. Keen to know their secrets, Helen gave herself a year to uncover the formula for Danish happiness. From childcare, education, food and interior design to SAD and taxes, *The Year of Living Danishly* records a funny, poignant journey, showing us what the Danes get right, what they get wrong, and how we might all live a little more Danishly ourselves.

In this new edition, six years on Helen reveals how her life and family have changed, and explores how Denmark, too – or her understanding of it – has shifted. It's a messy and flawed place, she concludes – but can still be a model for a better way of living.
