Infrared Techniques and Electro-optics in Russia Vladimir P. Ponomarenko,Anatoly M. Filachev,2007 In 1946 at the beginning of the cold war, the USSR government organized a special Institute on Infrared Technique and Electron Optics, later renamed the Federal Scientific Center Orion. On the occasion of the Orion Center's 60th anniversary, this volume chronicles the development and achievements of IR techniques, photoelectronics, and other defense technologies in the former USSR and Russia. It contains nearly 300 photographs of researchers and IR devices and systems, most published here for the first time.

Advances in Multimedia Information Processing - PCM 2008 Yueh-Min Ray Huang,Changsheng Xu,Kuo-Sheng Cheng,Jar-Ferr Kevin Yang,M.N.S. Swamy,Shipeng Li,Jen-Wen Ding,2008-12-11 Welcome to the proceedings of 9th Pacific-Rim Conference on Multimedia (PCM 2008) held at the National Cheng Kung University, Tainan, Taiwan during Dec- ber 9—13, 2008. The first PCM was held in Sydney in 2000. Since then, it has been held successfully around the Pacific Rim, including Beijing in 2001, Hsinchu in 2002, Singapore in 2003, Tokyo in 2004, Jeju in 2005, Zhejiang in 2006, Hong Kong in 2007 and finally Tainan. PCM is a major annual international conference bringing together researchers, developers, and educators in the field of multimedia from around the world. It covers a wide spectrum of multimedia research, from state-of-the-art theoretical breakthroughs to the practical systems of multimedia analysis and processing. PCM 2008 featured a comprehensive program including tutorials, keynote talks, regular oral presentations, special sessions, and poster sessions. This year, we - cepted 79 papers out of 210 submissions, giving an acceptance rate of 37%. In addition, 39 papers were accepted for poster presentation. The submissions were categorized into five different tracks: multimedia compression, communication and networking, multimedia processing, analysis and retrieval, multimedia databases, systems, and applications, multimedia human—computer interfaces, multimedia security and digital right management, with a total of 210 submissions from 18 countries and regions. Among the five tracks, "multimedia analysis and retrieval" received the most submissions (34% of the submissions). We kindly appreciate the great effort made by the Program Committee members and the additional reviewers in the reviewing of submissions.

Black and White in Photoshop CS3 and Photoshop Lightroom Leslie Alsheimer,2007-10-25 Black and white photography has come a long way in the digital world. Feeling overwhelmed by the endless conversion options in (and around) Photoshop, Lightroom and beyond? If so, you are not alone, and this is definitely the book for you! In this thoroughly up-to-date book that covers all of the new features of Photoshop CS3 and Lightroom, you'll learn how to use methods within an application or raw converter, scripts, plug-ins, and more. Leslie Alsheimer and Bryan O'Neil Hughes show you everything you need to know to uncover the secrets to successful black and white conversion and printmaking. Let the stunning images (presented in both color and black and white) show you just what is possible when you master these powerful tools. Bryan O'Neil Hughes is a Product Manager for the Photoshop team, and a Product Evangelist for the Photoshop Lightroom Team. Working for Adobe since 1999, Bryan has helped test, develop, drive and demonstrate Adobe's digital imaging applications. Beyond Adobe, Bryan is a published photographer, editor and author. Leslie Alsheimer is a freelance photographer, and photo educator based in Santa Fe, New Mexico. With the Santa Fe Digital Darkroom, Leslie travels around the country teaching photography, Photoshop and digital imaging workshops, as well as working with private clients as a creative imaging consultant, instructor, and trainer. She has worked extensively with many of the foremost digital image makers in the US. She is an instructor with the American Photo/Nikon Mentor Series and a member of the Adobe Beta Testing Team. Leslie is also the Director of Community Photography Outreach. Find out more about Leslie at: www.santafedigitaldarkroom.com/ What the readers are saying: I have a bunch of Photoshop and Lightroom books but yours is overwhelmingly the very best. Congratulations!--Leo Skogstroem Pyttis, Finland I learned more about photoshop in the three days I spent studying your book than I did in the 5 years playing around with it on my own. Your coverage of Color Management solved many issues I'd been having in trying to get the printed image to look like what I was seeing on my monitor. What I learned from you is that I was doing just about everything wrong with regards to capture and destructive editing. I have now completely changed both my pre- and post production work flow habits with amazing results. As a writer and small-publisher, I give you many kudos on creating a book that is by all accounts a real home run.--Rick Miller I just wanted to write and say this is one of the best books I have ever read! I got it today and have spent all night reading it (it's about 1 am now) and I'm almost half way through it. Everything makes so much more sense now. I just wanted to tell you great job! It has gotten me more excited about photography in six hours than otherwise in the last six years! I really like your style and would like to relearn photography with your way of explaining. Thank you so much for writing this book. It's the first time I've been impressed enough with a product to write the maker and thank them.--Zachary Miklich Nashville, TN Long story short this is probably the best book that anyone in the digital world should put their hand to, it is far from being only about BW.--Patrick Lavoie photo.net patron I am halfway through your new book on B & W in CS 3 and LR and I want to compliment you on a clear and concise treatise on CS3 and LR and your integrated workflow. Again, congratulations on an excellent book!--Jeff Peters I am enjoying your new book Black and White. It is rare to find so many wonderful images in a 'How To' book.--Robert Sachs I wish that I can tell you how I appreciate your contribution to making the digital darkroom something that I have fell in love with. Up to now I have used various books and sources: bits here and bits there. I have actually build up quite a library. No one particular reference book addressed the B+W worker with some basic understanding of Photoshop. You have produced something that fills this gap, and which is written and illustrated in a remarkable manner. I hail from the chemical darkroom, and as such have never really enjoyed correcting images on the computer. Photoshop, which is my program of choice, is quite intimidating, and the haphazard way in which I learned my skills from various sources, reflected in the inconsistent results that I was producing. Well, now all have changed. At least - something good is happening. I hope that you make a killing with

your book - you deserve to! Keep abreast of the distant 'also-runners' by releasing updates as the technology changes. -Andre du Plessis (South African, living in London) Black And White In Photoshop CS3 And Lightroom explains in clear and easy to understand steps what it takes to generate quality black and white images using Photoshop and/or Lightroom. It is really geared for the intermediate to advanced user who is looking to understand both workflow and color management techniques. There are a number of thing that I like about Black And White In Photoshop CS3 And Lightroom. First, I like the fact that it takes you down a number of paths on creating black and white images. It doesn't just say this is the best way and so that is all you learn. Second, I like the step-by-step approach to guide you through what you need to do to get results like this. I think that if you want to become a master of Black and White photography then Black And White In Photoshop CS3 And Lightroom is highly recommended reading. -T. Report of the Re-opened Formal Investigation Into the Loss of the FV Gaul David Steel,Great Britain. Department for Transport,2004 This publication sets out the report of the re-opened formal investigation into the loss of FV Gaul, a fishing trawler last seen off the Norwegian coast in February 1974, resulting in the loss of its 36 crewmen. The original formal inquiry concluded that the vessel had foundered and capsized, without making any distress calls, after being battered by heavy seas. The report is divided into two sections. The first part includes: a brief historical account of the loss of FV Gaul, and the concerns surrounding its loss; the vessel's design features, the regulatory measures in place at the time it was built and its service history; the experience of its skipper and crew; a detailed account of its last voyage and the search and investigation undertaken after it went down; and examination of concerns that its loss was due to involvement in espionage activities during the Cold War, including evidence from two members of the Security Services. The second section looks at: the findings of the maritime accident investigation undertaken in 1998 and the underwater survey undertaken in 2002, including technology used; examination of possible theories to explain the cause of the loss, including whether the vessel was fishing at the time of the loss, whether a snagged submarine cable could have caused the incident, and the prevailing weather and sea conditions. The report concludes that it is probable FV Gaul capsized amid heavy seas, when water ran down open waste chutes and flooded its lower decks, rapidly disabling the crew who were subsequently unable to send a distress call. The report, therefore, rules out other explanations for the loss of the vessel such as collision, seizure by the Russians or any other hostile force, or being pulled down by a submarine due to a snagged fishing net.
